Star Movie Star offers a new perspective on the role of stardom within the convergence of media industries While hardly the first popular music culture to see its stars making the transition to screen the timing of rock s emergence and its staying power within popular culture proved fortuitous for a motion picture business searching for its place in the face of continuous technological and cultural change At the same time a post star system film industry provided a welcoming context for rock stars who have valued authenticity creative autonomy and personal expression This book uses illuminating archival resources to demonstrate how rock stars have often proven themselves to be prominent film workers exploring this terrain of platforms old and new ideal media laborers whose power lies in the fact that they are rarely recognized as such Combining star studies with media industry studies this book proposes an integrated methodology for writing media history that combines the actions of individuals and the practices of industries It demonstrates how stars have operated as both the gravitational center of media production as well as social actors who have taken on a decisive role in the purposes to which their images are used

Motion Picture Biographies John Cones, 2015-04-01 Hollywood movies are famous for promoting negative stereotypes of all kinds especially against minorities women Southerners and Christians To what extent are biographical films selected for production according to certain biases conscious or unconscious among the Hollywood elite An expert on the U S film industry gives readers brief synopses of Hollywood biopics produced and or released from 1912 through 1994 This survey provides the basis for discussion and analysis Tracking these one sided depictions over a longer period of time the patterns of bias and the source of the problem become more clear The problem appears to be that most of the people who have green light authority in the U S film industry for either the production and or distribution of a motion picture share a common ethnic religious cultural background Thus the stories of their own cohort and those of all other ethnic religious and or cultural groups whose members seldom achieve positions of power in Hollywood are being filtered through the cultural sensibilities of a single group John Cones suggests that the solution could lie in increasing diversity at the highest levels in the U S film industry

communications which had to be decoded in terms of ideology and contextualized in terms of power and control Robert Watson's *Film and Television in Education* with its telling subtitle *An Aesthetic Approach to the Moving Image* sets out to remedy the neglect

Hollywood's America Stephen P Powers, 2018-02-19 American motion pictures still dominate the world market with an impact that is difficult to measure Their role in American culture has been a powerful one since the 1930s and is a hallmark of our culture today Though much has been written about the film industry there has been very little systematic attention paid to the ideology of its creative elite How does the outlook of that elite impact on the portrayals of America that appear on the screen How do their views interact with the demands of the market and the structure of the industry to determine the product that is seen by mass audiences *Hollywood's America* is a marvellously rich and careful discussion of these questions It combines a meticulous systematic content analysis of fifty years of top-grossing films with a history of the changing structure of the industry To that mixture it adds an in-depth survey of Hollywood's creative elite comparing them to other leadership groups The result is a balanced discussion of unique breadth and depth on a subject of national importance Placing the film industry in the context of American society as a whole the authors point out that Hollywood's creative leadership impacts the larger society even as it is influenced by that society The creators of films cannot remove themselves too far from the values of the audiences that they serve However the fact that films are made by a relatively small number of people who as the authors demonstrate tend to share a common outlook means that over time motion pictures have had an undeniable impact on the beliefs lifestyles and action of Americans This study contributes to the debate over the role and influence of those who create and distribute the products of mass culture in the United States The book also contains a devastating critique of the poststructuralist theories that currently dominate academic film criticism demonstrating how they fail in their attempt to explain the political significance of motion pictures
