Spatial Interrogatives in Europe and Beyond Thomas Stolz, Nataliya Levkovich, Aina Urdze, Julia Nintemann, Maja Robbers, 2017-08-07 The extant generalizations about the grammar of space rely heavily on the analyses of declarative sentences There is a need to check whether these generalizations also hold in the domain of interrogation To this end this book analyzes data from some 450 languages including non standard varieties The focus is on paradigms of spatial interrogatives such as English *where* *whither* and *whence* and their internal organization These paradigms are checked for recurrent patterns of morphological mismatches such as syncretism and different degrees of complexity e.g. the number of segments The data base consists of a large parallel literary corpus *Le petit prince* and translations thereof which is complemented by further sources of information such as descriptive grammars The data are analyzed from a synchronic perspective However diachronic issues are addressed unsystematically too It is shown that the distribution of phenomena which characterize paradigms of spatial interrogatives are subject to areal linguistic factors This is the first typological study of spatial interrogatives It provides new insights for students of the grammar of space morphological paradigms and language typology      Lingüística Misionera III Otto Zwartjes, Gregory James, Emilio Ridruejo Alonso, 2007 This third volume on Missionary Linguistics focuses on morphology and syntax It contains a selection of papers derived from the international conferences on missionary linguistics held in Hong Kong Macau and Valladolid As with the previous two volumes 2004 on general issues and 2005 on orthography and phonology this volume looks at methodology and descriptive techniques from a historical point of view offering articles of interest to historiographers of linguistics typologists and descriptive linguists It presents research into languages such as Tarascan Purépecha Massachusett Nahuatl Conibo Sipibo Guaran Vietnamese Tamil Southern Min Chinese dialects Mandarin Chinese Arabic Tagalog and other Austronesian languages such as Yapese and
