Suppression Of Terrorist Financing Hamed Tofangsaz, 2020-07-02 In the last few decades there has been a considerable effort mainly from Western liberal countries to create develop and diffuse into domestic laws an internationally harmonized counter terrorist financing regime through international treaties recommendations and resolutions This book aims to explore the penal criminalization and confiscation measures of the regime Belonging to the category of analytical research the book explores the nature of terrorist financing and critically and extensively examines how it has been conceptualized and criminalized The book argues that the application of these penal measures results in over criminalization due to the vague conceptualization of the concept of terrorist financing and due to its incompatibility with basic notions of criminalization and fundamental principles of the criminal law of many countries specifically Anglo American law Examining a number of ASEAN countries law on terrorist financing the book then shows how these controversial measures have been crept into their law resulting in the violation of human rights and democratic values which Western countries seek to promote

Evidence-Based Counterterrorism Policy Cynthia Lum, Leslie W. Kennedy, 2011-11-06 In the past eight years there has been a massive increase in government spending on counterterrorism intervention development and implementation. Given this increase, there are two evidence-based policy questions that are important to address: Is there evidence that any of these programs are effective? In other words, can they be shown to be linked to reducing terrorism, terrorist recruiting, or to improving the response and management of terrorist events? Do these interventions have secondary or collateral effects that may be costly, harmful, illegal, beneficial, or otherwise? As Lum and Kennedy discovered in an evaluation research on counterterrorism interventions, only a minuscule number of empirical studies of terrorism exist, and there is an almost complete absence of evaluation research on counterterrorism strategies. This is startling given the enormous increases in the development and use of counterterrorism programs as well as spending on counterterrorism activity. Even more disconcerting was the nature of the evaluations we did find: some programs were shown to either have no discernible effect on terrorism or lead to increases in terrorism. The emphasis of the need for empirical research in evaluating interventions and informing policy cannot be overstated and is the primary goal of Evidence-Based Counterterrorism Policy. Anti-Money Laundering Wouter H. Muller, Christian H. Kalin, John G. Goldsworth, 2007-06-13 Anti-Money Laundering is the definitive reference on money laundering and practice. First, an outline will be given of the general approach taken by supra-national organisations like the United Nations and the European Council. Next, the approach taken by international organisations and initiatives on the basis of the supra-national initiatives will be outlined by senior members of those organisations. A number of countries will then describe their specific prevention legislation. Countries involved will all be member countries of the FATF Financial Action Task Force on Money Laundering. Finally, there will be an overview to enable the reader to make a comparison between the most important topics of money laundering legislation and rules in the different countries.
