Reflective Practice of Multi-Unicultural School Leaders Dr. Roberto F. Casas, Dr. Paul A. Rodríguez, 2012-02-21 We have written this book because of our unique and real concern for improving education for children who are at risk of school failure Whether these students are of different ethnicities or speak different languages the students are not failures but have difficulty maneuvering in a system we call school In order to improve education we have to improve schools and the practices of school leaders This transformation of schools requires change and improvement of individuals in school leadership positions In order to change school leaders and their practices toward improvement we must replicate what is working for kids through reflective practice Osterman and Kottkamp 1993 offered this perspective We believe that reflective practice an approach to educational improvement that is both situational and places the professional in the very center of the attempt to create improvement not only stands in contrast to most other current ideas but has the greatest potential of any approach improving individuals and through them schools and education p vii The book was written because we share professional practices and intellectual interests in reflection and reflective practice We are passionate that

reflection has the best hope and significant change in how leaders examine their personal beliefs values and behaviors in such a way that members of the school community realize that it is they who must adapt their practices to meet the needs of students at risk and the diverse communities they serve However before we discuss the importance of reflective practice we need to arrive at a definition of reflective practice Schon 1983 defines reflective practice as the capacity to reflect on action so as to engage in a process of continuous learning Similarly Bolton 2010 stated that reflective practice involves playing critical attention to practical values and theories which inform everyday action by examining practice reflectively and reflexively This leads to developmental insight Another idea by Boud et al 1985 states Reflection is an important human activity in which people recapture their experience think about it mull it over and evaluate it It is this working with experience that is important in learning As for education Larrivee 2000 argues Reflective practice refers to the process of the educator studying his or her own teaching methods and determining what works best for students It involves the consideration of the ethical consequences of classroom procedures on students

Handbook of Reflection and Reflective Inquiry Nona Lyons,2010-04-07 Philosophers have warned of the perils of a life spent without reflection but what constitutes reflective

inquiry and why it is necessary in our lives can be an elusive concept Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire the Handbook of Reflection and Reflective Inquiry presents reflective thought in its most vital aspects not as a fanciful or nostalgic exercise but as a powerful means of seeing familiar events anew encouraging critical thinking and crucial insight teaching and learning In its opening pages two seasoned educators Maxine Greene and Lee Shulman discuss reflective inquiry as a form of active attention Thoreau's wide awakeness an act of consciousness and a process by which people can understand themselves their work particularly in the form of life projects and others Building on this foundation the Handbook analyzes through the work of 40 internationally oriented authors Definitional issues concerning reflection what it is and is not Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education Reflection as promoted across professional educational domains including K 12 education teacher education occupational therapy and the law Methods of facilitating and scaffolding reflective engagement Current pedagogical and research practices in reflection Approaches to assessing reflective inquiry Educators across the professions as well as adult educators counselors and psychologists and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times [Reflective Practice for Teachers](#) Maura Sellars, 2017-05-15 Reflective Practice for Teachers explores a range of key issues that you will need to engage with during your teacher preparation and early career in the classroom in order to deepen your understanding of teaching practice Case studies and What does this mean for you boxes in every chapter take ideas from research and show how they can apply to the real world of teaching This second edition has been updated with a new chapter on assessment extended discussion of metacognition in the classroom critical perspective on what we really know about brain based learning further coverage models of reflective practice **Interdisciplinary Reflective Practice through Duoethnography** Joe Norris, Richard Sawyer, 2016-09-24 This book explores the value of duoethnography to the study of interdisciplinary practice Through rich stories scholars illustrate how dialogic and relational forms of research help to facilitate deeply emic personal and situated understandings of practice and promote personal reflexivity and changes in practice In this book students teachers and practitioners use duoethnography to become more aware dialogic imaginative and relational in their teaching Forms of practice examined in this book include education drama nursing counseling and art in classroom university and larger professional spaces *Teaching As A Reflective Practice* Ian Westbury, Stefan Hopmann, Kurt Riquarts, 2012-08-06 This volume presents a mix of translations of classical and modern papers from the German Didaktik tradition newly prepared essays by German scholars and practitioners writing from within the tradition and interpretive essays by U S scholars It brings this tradition which virtually dominated German curricular thought and teacher education until the 1960s when American curriculum theory entered Germany and which is now experiencing a renaissance to the English speaking world where it has been essentially unknown The intent is to capture in one volume the core at least of the tradition of

Didaktik and to communicate its potential relevance to English language curricularists and teacher educators It introduces a theoretical tradition which although very different in almost every respect from those we know offers a set of approaches that suggest ways of thinking about problems of reflection on curricular and teaching praxis the core focus of the tradition which the editors believe are accessible to North American readers with appropriate translation These ways of thinking and related praxis are very relevant to notions such as reflective teaching and the discourse on teachers as professionals By raising the possibility that the new tradition of Didaktik can be highly suggestive for thinking through issues related to a number of central ideas within contemporary discourse and for exploring the implications of these ideas for both teacher education and for a curriculum theory appropriate to these new contexts for theorizing this book opens up a gold mine of theoretical and practical possibilities The Teacher's Reflective Practice Handbook Paula Nadine
