Reflecting on Darwin Eckart Voigts, Barbara Schaff, 2016-04-08 Taking up the historical evolution of Darwin and his theories and the cultural responses they have inspired *Reflecting on Darwin* poses the following questions How are the apparatuses in the mid nineteenth century and at the turn of the twenty first century interconnected with bio scientific paradigms in art literature culture and science How are naturalism determinism and Darwinism the eugenics of the nineteenth century and the genetic coding of the twentieth century positioned embodied and staged in various media configurations and media genres and How have particular media apparatuses formed displaced or stabilized the various concepts of humankind in the framework of evolutionary theory Ranging from the early circulation of Darwin's ideas to the present this interdisciplinary collection pays particular attention to Darwin's postmillennial reception Beginning with an overview of the historical development of contemporary ecological and ethical fears *Reflecting on Darwin* then turns to Darwin's influence on contemporary media neo Victorian literature and culture science fiction literature and film and contemporary theory In examining the plurality of ways in which Darwin has been rewritten and reappropriated this unique volume both mirrors and inspects the complexity of recent debates in Victorian and neo Victorian studies **The Influence of Darwin on Philosophy and Other Essays in Contemporary Thought** John Dewey, 2007 This critical edition of *The Influence of Darwin on Philosophy and Other Essays in Contemporary Thought* presents the results of John Dewey's patient construction throughout the previous sixteen years of the radically new view of the methods and concerns of philosophical inquiry It was a view that he continued to defend for the rest of his life **The Literary Imagination from Erasmus Darwin to H.G. Wells** Michael R. Page, 2016-03-09 At the close of the eighteenth century Erasmus Darwin declared that he would enlist the imagination under the banner of science beginning Michael Page argues a literary narrative on questions of evolution ecology and technological progress that would extend from the Romantic through the Victorian periods Examining the interchange between emerging scientific ideas specifically evolution and ecology new technologies and literature in nineteenth century Britain Page shows how British writers from Darwin to H G Wells confronted the burgeoning expansion of scientific knowledge that was radically redefining human understanding and experience of the natural world of human species and of the self The wide range of authors covered in Page's ambitious study permits him to explore an impressive array of topics that include the role of the Romantic era in the molding of scientific and cultural perspectives the engagement of William Wordsworth and Percy Shelley with questions raised by contemporary science Mary Shelley's conflicted views on the unfolding prospects of modernity and how Victorian writers like Charles Kingsley Samuel Butler and W H Hudson responded to the implications of evolutionary theory Page concludes with the scientific romances of H G Wells to demonstrate how evolutionary fantasies reached the pinnacle of synthesis between evolutionary science and the imagination at the close of the century *Essays in Moral Skepticism* Richard Joyce, 2016-01-28 Moral skepticism is the denial that there

is any such thing as moral knowledge Some moral skeptics deny that moral judgments are beliefs some allow that moral judgments are beliefs but claim that they are all untrue others claim that all moral judgments are unjustified Since the publication of *The Myth of Morality* in 2001 Richard Joyce has explored the terrain of moral skepticism and perhaps more than any other living philosopher has been willing to advocate versions of this radical view Joyce s attitude toward morality is analogous to an atheist s attitude toward religion he claims that in making moral judgments speakers attempt to state truths e g that breaking promises is usually wrong but that the world simply isn t furnished with the properties and relations necessary to render such judgments true Moral thinking he argues probably emerged as a human adaptation but one whose usefulness derived from its capacity to bolster social cohesion rather than its ability to track truths about the world This forms the basis of Joyce s evolutionary debunking argument according to which evidence that a certain kind of judgment can be explained with no reference to its truth may reveal those judgments to lack warrant *Essays in Moral Skepticism* gathers together a dozen of Joyce s most significant papers from the last decade following the developments in his ideas presenting responses to critics and charting his exploration of the complex landscape of modern moral skepticism

Nineteenth Century Religious Thought in the West Ninian Smart,1988 Now available in paperback the successful three volumes of *Nineteenth Century Religious Thought in the West* provide a fresh appraisal of the most important thinkers of that time Some essays centre on major figures of the period others cover topics trends and schools of thought between the French Revolution and the First World War The contributors are among the leading scholars in their field and analyse not only what was said but also why it was said and explore what is of lasting value in it Contributions are sufficiently clear to be of use to students in religious studies and cognate disciplines but have enough depth and detail to appeal to scholars *Reflections of a Darwinian* Gavin Rylands de Beer,1962 *The Reception of Darwinian Evolution in Britain, 1859-1909* Martin

Hewitt,2024-10-20 *The Reception of Darwinian Evolution in Britain 1859 1909* Darwinism s Generations uses the impact of Charles Darwin s *On the Origin of Species* 1859 in the 50 years after its publication to demonstrate the effectiveness of a generational framework for understanding the cultural and intellectual history of Britain in the nineteenth century It challenges conventional notions of the Darwinian Revolution by examining how people from across all sections of society actually responded to Darwin s writings Drawing on the opinions and interventions of over 2 000 Victorians drawn from an exceptionally wide range of archival and printed sources it argues that the spread of Darwinian belief was slower more complicated more stratified by age and ultimately shaped far more powerfully by divergent generational responses than has previously been recognised In doing so it makes a number of important contributions It offers by far the richest and most comprehensive account to date of how contemporaries came to terms with the intellectual and emotional shocks of evolutionary theory It makes a compelling case for taking proper account of age as a fundamental historical dynamic and for the powerful generational patternings of the effects that age produced It demonstrates the extent to which the most common

sub periodisation of the Victorian period are best understood not merely as constituted by the exigencies of events but are also formed by the shifting balance generational influence Taken together these insights present a significant challenge to the ways historians currently approach the task of describing the nature and experience of historical change and have fundamental implications for our current conceptions of the shape and pace of historical time **A Calendar of the**

Correspondence of Charles Darwin, 1821-1882 Frederick Burkhardt, Sydney Smith, 1994-03-10 This Calendar is a catalogue of the letters the editors of the Correspondence of Charles Darwin have found to date Information on the source and location of each letter is given together with a brief summary of the content First published in 1985 the Calendar has been amended to take account of recently discovered material and re interpretations or re dating of known letters A new supplement lists over 1000 amendments to the main body of the text together with over 500 addenda relating to newly discovered material **Natural History**, 1982 **Darwin** Adrian J. Desmond, James Richard Moore, 1994 In lively and accessible style the authors tell how Darwin came to his world changing conclusions and how he kept his thoughts secret for twenty years Hailed as the definitive biography this book explains Darwin's paradox and offers a window on Victorian science theology and mores Contains a wealth of new information and 90 photographs [The Human Eros](#) Thomas Alexander, 2013-05-21 Studies in the philosophy of John Dewey Ralph Waldo Emerson George Santayana and Native American philosophy that argue for an ecological aesthetic form of philosophy **The Publishers Weekly**, 1911

Science Fraud: Darwin's Plagiarism of Patrick Matthew's Theory Mike Sutton, 2023 Patrick Matthew in 1831 originated the complete theory of evolution by natural selection in his book *On Naval Timber and Arboriculture* and did so before Charles Darwin and Alfred Wallace claimed to independently replicate it in 1858 Unjustly and against the Arago convention on priority a ruling that gives origination of any science theory to the first to publish Matthew has been illicitly denied his priority on the grounds he never influenced anyone with his breakthrough Today Big Data research has uncovered Darwin's science fraud by plagiarism revealing evidence which proves beyond all reasonable doubt that he and Alfred Wallace both independently plagiarised the theory of evolution by natural selection from Patrick Matthew Books have been newly unearthed in the publication record to show that at least 30 people cited Matthew's work in published literature before 1858 and that several were known influencers of Darwin's and Wallace's work in the field Additionally several people in Darwin's and Wallace's social circles were first to be second into print using original terms coined by Matthew in his bombshell breakthrough book This book reveals all the newly unearthed data and essentially explains it alongside the deplorable treatment of Patrick Matthew in scholarly historical context Dr Mike Sutton further reveals using social science participatory observation methods and experimental results how members of the so called Darwin Industry enabled and facilitated by the deliberate publication of falsehoods and other grossly misleading editing on Wikipedia have disgracefully worked to re bury these newly unearthed facts by means of knee jerk blind sight ignorant rejection blatant and deliberate

[The Huxleys](#) Alison Bashford, 2022-11-16 A New Yorker and Economist Best Book of the Year Two hundred years of modern science and culture told through one family history This momentous biography tells the story of the Huxleys the Victorian natural historian T H Huxley Darwin's Bulldog and his grandson the scientist conservationist and zoologist Julian Huxley Between them they communicated to the world the great modern story of the theory of evolution by natural selection In The Huxleys celebrated historian Alison Bashford writes seamlessly about these omnivorous intellects together almost as if they were a single man whose long vital life bookended the colossal shifts in world history from the age of sail to the Space Age and from colonial wars to world wars to the cold war The Huxleys specialty was evolution in all its forms at the grandest level of species deep time the Earth and at the most personal and intimate They illuminated the problems and wonders of the modern world and they fundamentally shaped how we see ourselves as individuals and as a species But perhaps their greatest subject was themselves Bashford's engaging brilliantly ambitious book interweaves the Huxleys momentous public achievements with their private triumphs and tragedies The result is the history of a family but also a history of humanity grappling with its place in nature This book shows how much we owe for better or worse to the unceasing curiosity self absorption and enthusiasm of a small strange group of men and women

Annals of the History and Philosophy of Biology 10/2005 ,2006 The name DGGTB Deutsche Gesellschaft f r Geschichte und Theorie der Biologie German Society for the History and Theory of Biology reflects recent history as well as German tradition The Society is a relatively late addition to a series of German societies of science and medicine that began with the Deutsche Gesellschaft f r Geschichte der Medizin und der Naturwissenschaften founded in 1910 by Leipzig University's Karl Sudhoff 1853-1938 who wrote We want to establish a German society in order to gather German speaking historians together in our special disciplines so that they form the core of an international society Yet Sudhoff at this time of burgeoning academic internationalism was quite willing to accommodate the wishes of a number of founding members and drop the word German in the title of the Society and have it merge with an international society The founding and naming of the Society at that time derived from a specific set of historical circumstances and the same was true some 80 years later when in 1991 in the wake of German reunification the Deutsche Gesellschaft f r Geschichte und Theorie der Biologie was founded From the start the Society has been committed to bringing studies in the history and philosophy of biology to a wide audience using for this purpose its Jahrbuch f r Geschichte und Theorie der Biologie Parallel to the Jahrbuch the Verhandlungen zur Geschichte und Theorie der Biologie has become the by now traditional medium for the publication of papers delivered at the Society's annual meetings In 2005 the Jahrbuch was renamed Annals of the History and Philosophy of Biology reflecting the Society's
