Modern Catholic Social Documents and Political Economy Albino F. Barrera,2001-08-09 As western economies have moved from feudalism to industrialism to the information age Catholic social thought has kept pace responding to the economic realities of the day Linking Catholic social teaching with modern economic theory Albino F Barrera examines the changing political economy embedded within the moral theology and social justice documents issued by the Church during the last hundred years Barrera discusses the evolution of Catholic social teachings from scholastic thinking on the concept of the just price to a modern emphasis on the importance of a living wage As the conduct of economic life according to traditional custom and common law has given way to institutional and impersonal market forces these teachings have moved from a preoccupation with personal moral behavior to an intense scrutiny of the structures of society Amidst these changes the Church s social documents have sought to address systemic shortcomings as a

means of promoting the common good through economic justice Barrera also looks ahead to the challenges posed by a postindustrial society characterized by a global knowledge based economy arguing that Catholic social thought will likely shift its focus from advocacy of the living wage to demands for greater equality of socioeconomic participation Written for scholars and students of economics theology and political science interested in religious social thought this book bridges the gap between moral theology and economic theory *The Politics of Expertise in Latin America* Miguel A. Centeno,Patricio Silva,2016-07-27 The ascendancy of technocratic personnel and their imposition of neo liberal economic policies have come to define Latin American politics in the 1980s and 1990s This book is the first comparative analysis of these events and their implications for the future of democracy on the continent Individual chapters discuss the rise to power of these technocrats in Mexico Chile Argentina Brazil and Peru as well as the historical antecedents of expert rule in the 19th and early 20th centuries **Urban Informality** Ananya Roy,Nezar AlSayyad,2004-01-01 The turn of the century has been a moment of rapid urbanization Much of this urban growth is taking place in the cities of the developing world and much of it in informal settlements This book presents cutting edge research from various world regions to demonstrate these trends The contributions reveal that informal housing is no longer the domain of the urban poor rather it is a significant zone of transactions for the middle class and even transnational elites Indeed the book presents a rich view of urban informality as a system of regulations and norms that governs the use of space and makes possible new forms of social and political power The book is organized as a transnational endeavor It brings together three regional domains of research the Middle East Latin America and South Asia that are rarely in conversation with one another It also unsettles the hierarchy of development and underdevelopment by looking at some First World processes of informality through a Third World research lens

Latin America And The Caribbean In The International System G. Pope Atkins,2018-02-06 The fourth edition of this widely praised text has been thoroughly revised to reflect the evolving characteristics of the current international system that have had a dramatic effect on every aspect of international relations of Latin America and the Caribbean The original purpose of this book is unchanged It continues to provide a topically current and analytically integrated survey of the region's role in the world Still organized around the idea of Latin America and the Caribbean as a separate subsystem within the global international system the discussion gives special emphasis to complex interstate and transnational structures and processes Within this framework Atkins analyzes the foreign policies of the Latin American states themselves and those of the United States and other countries toward Latin America and the Caribbean He also looks closely at the nature and role of transnational actors in the region such as the multinational corporations the Holy See Protestant Churches transnational political parties international labor nongovernmental organizations and others He gives special attention to Latin American participation in international institutions at all levels Migration, Urbanization, and Development Richard E. Bilborrow,1998 Internal migration and urbanization are key dimensions of the process of socioeconomic development The

unprecedented movement of peoples within the borders of their own countries is one of the greatest transformations witnessed in the 20th century Policy analysts especially those from developing countries where internal migration can be felt at first hand view migration as one of the most important factors affecting the course of development It is within this context that UNFPA convened the Symposium on Internal Migration and Urbanization in Developing Countries in January 1996 in preparation for the United Nations World Conference on Human Settlements in Istanbul in June 1996 The final results of the symposium are found in this book This volume provides a better understanding at global level of internal migration issues of concern to policy analysts
