An Interdisciplinary Reflection on Market Economy, Art and Science Robrecht Vanderbeeken, Frederik Le Roy, Christel Stalpaert, Diederik AERTS, 2011-09-28 The book presents an interdisciplinary collection of analyses that discuss the impact of market economy on our culture in the post Berlin Wall era It contains two parts The first focuses on the commercialisation of science and education The second elaborates on the multiple and diverse relation between art and capital **Money Talks**

Brenda Berger, Stephanie Newman, 2012-03-12 Sometimes referred to as the last taboo money has remained something of a secret within psychoanalysis Ironically while it is an ingredient in almost every encounter between analyst and patient the analyst's personal feelings about money are rarely discussed openly or in any great depth So what is it about money that relegates it to the background both on the couch and off In Money Talks Brenda Berger Stephanie Newman and their excellent cast of contributors address this and other questions surrounding the tender topic of money how we talk about it and how it talks to us Its multiple meanings are explored in the contexts of patients and analysts and the ways in which they

relate in the training and practice of the analysts themselves as well as the psychological and cultural consequences of having too much or too little in both flush and tight economic times Throughout a clinical sensibility is brought to bear on money's softly spoken place in therapy and life Money Talks paves the way for an open discourse into the psychology of money and its pervasive influence on the psyche of both patient and analyst
