Inclusive Urban Design: Public Toilets Clara Greed,2007-06-01 This is a unique text providing both design guidance and policy direction for the provision and design of public toilets covering city wide district level and site specific principles It highlights the role of urban design in reversing the trend of inadequate toilet provision and sets out guidelines for design which meets both user need and provider requirements Greed presents the fundamental principle that toilets should not be dealt with in isolation from mainstream urban policy but that they should be seen as a serious core component in both strategic urban policy and local area design She argues toilets are valuable townscape features in their own right as manifestation civic pride and good urban design essential architectural components which add to the quality and viability of an area Although a range of design guidance on toilets exists there is still considerable dissatisfaction with the end product in terms of building design levels of provision location safety layout DDA requirements and accessibility By outlining user demands and provider constraints Greed shows that it is essential for architects to have an informed understanding and practical knowledge of toilet issues when working with public and private sector providers Examples of toilet architecture from other countries and policies from different cultural settings are included for comparative purposes to invigorate UK perspectives

The World's First Railway System Mark Casson,2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other s territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography

**Railway Renaissance** Gareth David,2020-01-31

David's superb book looks at the defiant renaissance of such heritage railways in contrast to Beeching's vision of a streamlined railway network. Books Monthly. When a 35 mile stretch of the former Waverley route from Edinburgh to Carlisle reopened on 6 September 2015 it became the most significant reopening of any UK railway since the infamous Beeching Report. The Reshaping of British Railways was published in March 1963. In his report Dr Richard Beeching recommended sweeping closures of lines across the UK to improve the financial performance of British railways which led to wholesale closures over the following decade and a reduction in the UK rail network from 18 000 miles in 1963 to some 11 000 miles a decade later. But since that low point was reached in the early 1970s a revolution has been taking place. Passenger traffic on the railways is now at its highest level since the 1940s and from Alloa to Aberdare as well as from Mansfield to Maesteg closed lines have reopened and the tide of Beeching closures has been gradually rolled back. Scores of stations have been reopened and on many of the newly revived lines passenger traffic is far exceeding the forecasts used to support their reopening. In this comprehensive survey of new and reopened railways and stations across England, Scotland and Wales Gareth David asks what it tells us about Dr Beeching's report looking at how lines that were earmarked for closure in that report but escaped the axe have fared and reviews the host of further routes which are either set to be reopened or are the focus of reopening campaigns.

**Bristol: A Worshipful Town and Famous City** Nigel Baker, Jonathan Brett, Robert Jones, 2018-02-21. Bristol is a major city and port in the south west of England. In medieval times it became the third largest city in the kingdom behind London and York. Bristol was founded in the late Saxon period and grew rapidly in the 12th and 13th centuries. Initially seaborne trading links with Ireland and France were particularly significant, later from the 16th century onwards the city became a focus for trade with Iberia, Africa and the New World. This led to the growth of new industries such as brass manufacture, glass production and sugar refining, producing items for export and processing imported raw materials. Bristol also derived wealth from the slave trade between Africa and the New World. The city has a long history of antiquarian and archaeological investigation. This volume provides for the first time a comprehensive overview of the historical development of Bristol based on archaeological and architectural evidence. Part 1 describes the geological and topographical context of Bristol and discusses evidence for the environment prior to the foundation of the city. The history of archaeological work in Bristol is discussed in detail as is the pictorial record and the cartographic evidence for the city. In Part 2 a series of period based chapters considers the historical background and archaeological evidence for Bristol's development from the prehistoric Roman and post Roman eras through the establishment and growth of Bristol between about 950 and 1200 AD, the medieval city, early modern period and the period from 1700 to 1900 AD when Bristol was particularly important for its role in transatlantic trade. Each chapter discusses the major civic, military and religious monuments of the time and the complex topographical evolution of the city. Part 3 assesses the significance of Bristol's archaeology and presents a range of themes for future research.
