

A serene sunset scene over a calm body of water. The sky is a gradient of warm colors, from deep orange near the horizon to a lighter yellow at the top. The sun is just below the horizon, creating a bright glow. In the foreground, the dark silhouettes of rocky islands or cliffs are visible against the water and sky. The water reflects the colors of the sunset.

why you think, say, and do certain
things... then better yourself.

Self-Reflection for the Opaque Mind T. Parent, 2016-12-01 This volume attempts to solve a grave problem about critical self reflection The worry is that we critical thinkers are all in epistemic bad faith in light of what psychology tells us After all the research shows not merely that we are bad at detecting ego threatening thoughts la Freud It also indicates that we are ignorant of even our ordinary thoughts e g reasons for our moral judgments of others Haidt 2001 and even mundane reasons for buying one pair of stockings over another Nisbett Wilson 1977 However reflection on one s thoughts requires knowing what those thoughts are in the first place So if ignorance is the norm why attempt self reflection The activity would just display naivety about psychology Yet while respecting all the data this book argues that remarkably we are sometimes infallible in our self discerning judgments Even so infallibility does not imply indubitability and there is no Cartesian ambition to provide a foundation for empirical knowledge The point is rather to explain how self reflection as a rational activity is possible

Garrett,2018-08-06 The Gothic has long been seen as offering a subversive challenge to the norms of realism Locating both Gothic and mainstream Victorian fiction in a larger literary and cultural field Peter K Garrett argues that the oppositions usually posed between them are actually at work within both He further shows how by offering alternative versions of its stories nineteenth century Gothic fiction repeatedly reflects on narrative force the power exerted by both writers and readers Beginning with Poe s theory and practice of the Gothic tale as an exercise or fantasy of authorial power Garrett then reads earlier eighteenth century and Romantic Gothic fiction for comparable reflexive implications Throughout he stresses the ways authors doubled both characters and narrative perspectives to raise issues of power and authority in the tension between central deviant figures and social norms Garrett then shows how the great nineteenth century monster stories Frankenstein Dr Jekyll and Mr Hyde and Dracula self consciously link the extremity and isolation of their deviant figures with the social groups they confront These narratives he argues move from a Romantic concern with individual creation and responsibility to a Victorian affirmation of social solidarity that also reveals its dependence on the binding force of exclusionary violence The final section of the book extends its investigation of Gothic reflections on narrative force into the more realistic social and psychological fiction of Dickens Eliot and James Reflections of the Self Muktananda
