modern and contemporary societies It is commonly a positive assessment of many elements of the physical and human environment e g ecosystems and landscapes monuments customs gender norms religious practices gastronomy and livelihoods Heritage and tourism are strongly related to each other in that heritage gives rise to tourist attractions and activities and tourism enhances the designation of heritage sites A post humanist perspective the moral valuation of equality between humans and other animals demands that both are sentient beings and self aware of their pain and pleasure Thus the involvement of animals as heritage elements by themselves or as an element of tourist consumption in heritage sites implies their commodification and lack of agency As such these practices are usually unethical since they threaten the animals primary interests not to suffer not to feel pain and to be able to live their freedom This book contains chapters that reveal both the unethical interactions between humans and animals within heritage tourism and those that show experiences in which efforts are made to minimize damage within the commercialization of animals involved as heritage themselves

Reflections on the Astronomy of Glasgow David Clarke, 2013-05-24 How Astronomy contributed to the educational enlightenment of Glasgow to its society and to its commerce The words Astronomy and Glasgow seem an incongruous juxtaposition and yet the two are closely linked over 500 years of history This is a tale of enlightenment and scientific progress at both institutional and public levels Combined with the ambitions of civic commerce it is a story populated with noteworthy personalities and intense rivalries It is remarkable to realise that the first Astronomy teaching in the Glasgow College presented an Earth centred Universe prior to the Copernican revolution of the

mid sixteenth Century Glasgow was later known astronomically for the telescope observations of sunspots made by Wilson in the 1760s but less well known are the ideas related to mono chromaticity within light to dew point and hoar frost and Herschel s discovery of infra red energy in solar radiation by application of Glasgow made thermometers This engrossing and entertaining scientific history includes the story of Glasgow s Big Bang of 1863 the controversy over Astronomer Royal for Scotland and a historical survey of the eight observatories that once populated Glasgow David Clarke brings us a complex weave of science and accompanying social history in this unique and fascinating work Paws to Reflect Kim McLean,Devon O'Day,2012-10-01 Sometimes human communication falls short in conveying spiritual truth God speaks through whatever means He chooses and often he chooses animals Dogs teach unconditional love The purr of a kitten can bring peace Horses show us how to harness our strength with grace Paws to Reflect offers gentle daily reflections for those who seek to grow spiritually by observing the animal kingdom and all the lessons it teaches **Argos catalogue 1989 -1990 old vintage book** KCC, Argos catalogue 1989 1990 old vintage book Critical Reflection Robert Malcolm Murray,Nebojsa Kujundzic,2005 In an era of information overload our need to learn how to critically evaluate the growing flood of information has never been greater Critical Reflection showcases the role of reason in a world saturated by media enhanced persuasion and complex scientific and technological jargon Drawing from the classic philosophical texts this engaging textbook on the art of analyzing arguments is also relevant to today s undergraduates in its use of real life examples and exercises drawn mainly from media and politics Malcolm Murray and Nebojsa Kujundzic cover the standard subjects in a one semester course on critical thinking offering ways to analyze arguments **The Early Iron Age Metal Hoard from the Al Khawd Area (Sultan Qaboos University), Sultanate of Oman** Nasser S. Al-Belushi,Ali Tigani ElMahi,2021-12-23 Numerous metallic artefacts deposited in a hoard in ancient times came to light by chance on the campus of the Sultan Qaboos University in Al Khawd Sultanate of Oman Mostly fashioned from copper these objects compare well with numerous documented artefact classes from south eastern Arabia assigned to the Early Iron Age 1200 300 BCE *The Physics and Art of Photography, Volume 1* John Beaver,2018-11-26 This book uses art photography as a point of departure for learning about physics while also using physics as a point of departure for asking fundamental questions about the nature of photography as an art Although not a how to manual the topics center around hands on applications most often illustrated by photographic processes that are inexpensive and easily accessible to students including a versatile new process developed by the author and herein first described in print A central theme is the connection between the physical interaction of light and matter on the one hand and the artistry of the photographic processes and their results on the other Geometry and the Nature of Light focuses on the physics of light and the optics of lenses but also includes extended discussions of topics less commonly covered in a beginning text including symmetry in art and physics different physical processes of the scattering of light

photograms photographic shadow prints and the nature of shadows elements of 2 dimensional design pinhole photography and the view camera Although written at a beginning undergraduate level the topics are chosen for their role in a more general discussion of the relation between science and art that is of interest to readers of all backgrounds and levels of expertise

Consciousness Neil Rossman, 1991-01-21 A central claim of this book is that the emergence of humanity involves a splitting of consciousness the ability of consciousness to become reflectively aware of itself But the splitting of consciousness is simultaneously the development of the possibility of fragmentation incoherence within consciousness and alienation non unity of consciousness with others and the world Thus through the growth of reflective consciousness separation comes to permeate the whole of human experience So understood it creates the need for integration and Rossman s discussion ultimately centers on its attainment Within this perspective various aspects of consciousness including perception organic sensation desire and belief are explored There is also extensive discussion of personal identity or the experience of being a self Finally the above analyses provide the ground for discussions of freedom morality and being religious
