

REFLECTIVE TEACHING

DEFINITION

Reflective teaching is a process where teachers reflect on their own teaching practices and learn from their own experiences.

This type of reflection allows teachers to see what works well in their classrooms and what needs improvement. Reflective teaching also helps teachers to understand the impact that their teaching has on students.

EXAMPLES

Examples of reflective teaching include:

- Observing other teachers and comparing their practice to your own.
- Taking notes on your own teaching practice and thinking about ways to improve.
- Asking for feedback from your students to achieve self-improvement.

Applying Standards-Based Constructivism Pat Flynn, Paul Vermette, Don Mesibov, 2013-09-27 This book provides teachers with practical ways of constructing lessons that will engage students and help them develop personal responsibility for their own learning State learning standards and related core curricula require students to demonstrate what they know and understand Students cannot learn to demonstrate their understanding if they sit passively The authors call for constructivist practices which recognize the important role played by standards and student

accountability and which also acknowledge the practical need for lecture in an appropriate context This book also shows the links between constructivism and differentiated instruction and other approaches to teaching and learning

Education, Experience and Existence John Quay, 2013-07-18 *Education Experience and Existence* proposes a new way of understanding education that delves beneath the conflict confusion and compromise that characterize its long history At the heart of this new understanding is what John Dewey strove to expound a coherent theory of experience Dewey's reputation as a pragmatist is well known but where experience is concerned pragmatism is only half the story The other half is phenomenological as crafted by Martin Heidegger Encompassing both is Charles Sanders Peirce whose philosophy draws pragmatism and phenomenology together in an embrace which enables a truly experiential philosophy to emerge The book approaches the problem of confusion in education and philosophy by beginning with our most basic understandings of existence Existence as an interaction is the starting point of modern science and existence as individuality offers an aesthetic origin attending to existence as a simple unity In our contemporary world where scientific ways of thinking are privileged the aesthetic whole is often overlooked especially in education Yet both are connected A coherent theory of experience is therefore a marriage between phenomenology and pragmatism enabling each to maintain its position by acknowledging how both are required The book is divided into three main parts confusion in philosophy and education a coherent theory of experience a coherent theory of education Quay suggests that education benefits from such a coherent theory of experience by better comprehending its connection to life More than just knowing more than just doing education is about being This book will be of interest to philosophers educators and educational philosophers
