Reform In Undergraduate Science Teaching:

Reform in Undergraduate Science Teaching for the 21st Century Dennis W. Sunal, Emmett L. Wright, Jeanelle Bland, 2006-05-01 The mission of the book series Research in Science Education is to provide a comprehensive view of current and emerging knowledge research strategies and policy in specific professional fields of science education This series would present currently unavailable or difficult to gather materials from a variety of viewpoints and sources in a usable and organized format Each volume in the series would present a juried scholarly and accessible review of research theory and or policy in a specific field of science education K 16 Topics covered in each volume would be determined by present issues and trends as well as generative themes related to current research and theory Published volumes will include empirical studies policy analysis literature reviews and positing of theoretical and conceptual bases Research Based Undergraduate Science Teaching Dennis W. Sunal, Cynthia S Sunal, Emmett L. Wright, Cheryl L. Mason, Dean Zollman, 2014-07-01 Research in Science Education RISE Volume 6 Research Based Undergraduate Science Teaching examines research theory and practice concerning issues of teaching science with undergraduates This RISE volume addresses higher education faculty and all who teach entry level science The focus is on helping undergraduates develop a basic science literacy leading to scientific expertise RISE Volume 6 focuses on research based reforms leading to best practices in teaching undergraduates in science and engineering The goal of this volume is to provide a research foundation for the professional development of faculty teaching undergraduate science Such science instruction should have short and longterm impacts on student outcomes The goal was carried out through a series of events over several years The website at <http://nseus.org> documents materials from these events The international call for manuscripts for this volume requested the inclusion of major priorities and critical research areas methodological concerns and results of implementation of faculty professional development programs and reform in teaching in undergraduate science classrooms In developing research manuscripts to be reviewed for RISE Volume 6 researchers were asked to consider the status and effectiveness of current and experimental practices for reforming undergraduate science courses involving all undergraduates including groups of students who are not always well represented in STEM education To influence practice it is important to understand how researchbased practice is made and how it is implemented The volume should be considered as a first step in thinking through what reform in undergraduate science teaching might look like and how we help faculty to implement such reform

Institution-wide Reform of Undergraduate Education in Science, Mathematics, Engineering and Technology National Science Foundation (U.S.). Division of Undergraduate Education, 1996 **Transforming Undergraduate Education in Science, Mathematics, Engineering, and Technology** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Undergraduate Science Education, 1999-03-25 Today's undergraduate students future leaders policymakers teachers and citizens as well as scientists and engineers will need to

make important decisions based on their understanding of scientific and technological concepts However many undergraduates in the United States do not study science mathematics engineering or technology SME T for more than one year if at all Additionally many of the SME T courses that students take are focused on one discipline and often do not give students an understanding about how disciplines are interconnected or relevant to students lives and society To address these issues the National Research Council convened a series of symposia and forums of representatives from SME T educational and industrial communities Those discussions contributed to this book which provides six vision statements and recommendations for how to improve SME T education for all undergraduates The book addresses pre college preparation for students in SME T and the joint roles and responsibilities of faculty and administrators in arts and sciences and in schools of education to better educate teachers of K 12 mathematics science and technology It suggests how colleges can improve and evaluate lower division undergraduate courses for all students strengthen institutional infrastructures to encourage quality teaching and better prepare graduate students who will become future SME T faculty

Inside Science Education Reform J. Myron Atkin, Paul Black, 2003-01-01 Two international leaders offer important insights into the ways in which the discipline of science education has developed and how school curriculum has been shaped by both scientific discovery and social change J Myron Atkin U S and Paul Black U K share their vast and varied experiences in this historical account that chronicles the many developments in the field from the end of World War II to the present The chapters in this volume cover the aims and politics of science education curriculum development subject matter boundaries pedagogy and learning assessment and evaluation educational research and practice and the teaching profession Each theme is introduced in its historical and philosophical context with current issues emphasized The authors then analyze these themes by drawing on relevant episodes from their transatlantic careers These episodes act as a springboard for developing insights into each theme including comparisons between educational practices in the United States and the United Kingdom Featuring compelling examples and a cohesive presentation this groundbreaking volume is essential reading for anyone making decisions about the future of science education

Science/Technology/Society as Reform in Science Education Robert E. Yager, 1996-01-04 Science Technology Society S T S is a reform effort to broaden science as a discipline in schools and colleges to relate science to other facets of the curriculum and to relate science specifically to technology and to the society that supports and produces new conceptualizations of both S T S is also defined as the teaching and learning of science technology in the context of human experience It focuses on a method of teaching that recognizes the importance that experience in the real world has on the learning process And it recognizes that real learning can occur only when the learner is engaged and able to construct her or his own meaning Science Technology Society as Reform in Science Education is rich with examples of such teaching and learning It includes impressive research evidence that illustrates that progress has been made and goals have been met For teachers and administrators alike this book provides and validates new visions for science

education Undergraduate Science, Math, and Engineering Education United States. Congress. House. Committee on Science. Subcommittee on Research, 2006 *Handbook of College Science Teaching* Joel J. Mintzes, 2006 The Handbook offers models of teaching and learning that go beyond the typical lecture laboratory format and provides rationales for new practices in the college classroom It is ideal for graduate teaching assistants senior faculty and graduate coordinators and mid career professors in search of reinvigoration **Improving Undergraduate Instruction in Science, Technology, Engineering, and Mathematics** National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Undergraduate Science Education, Steering Committee on Criteria and Benchmarks for Increased Learning from Undergraduate STEM Instruction, 2003-06-28 Participants in this workshop were asked to explore three related questions 1 how to create measures of undergraduate learning in STEM courses 2 how such measures might be organized into a framework of criteria and benchmarks to assess instruction and 3 how such a framework might be used at the institutional level to assess STEM courses and curricula to promote ongoing improvements The following issues were highlighted Effective science instruction identifies explicit measurable learning objectives Effective teaching assists students in reconciling their incomplete or erroneous preconceptions with new knowledge Instruction that is limited to passive delivery of information requiring memorization of lecture and text contents is likely to be unsuccessful in eliciting desired learning outcomes Models of effective instruction that promote conceptual understanding in students and the ability of the learner to apply knowledge in new situations are available Institutions need better assessment tools for evaluating course design and effective instruction Deans and department chairs often fail to recognize measures they have at their disposal to enhance incentives for improving education Much is still to be learned from research into how to improve instruction in ways that enhance student learning **Undergraduate Science, Mathematics, Engineering, and Technology Education Improvement Act** United States.
