agricultural development is looked at in detail This is followed by a survey of proposals to reform the system put forward by Polish Hungarian and Czechoslovakian economists A discussion of the role of money and the problems of consumer equilibrium and the problems of foreign trade both inside and outside Comecon concludes this in depth and constructive review

*Integrating Eastern Europe into the Global Economy*: J.M. Van Brabant, 2012-12-06 This book is designed as a modest contribution to the ongoing deliberations about how to ease the fairly tight constraints on the external payments of many countries of the eastern part of Europe In the first instance this inquiry is addressed to those that have embarked on wide ranging systemwide reforms External constraints have been markedly hampering the introduction of market oriented economic mutations thereby raising the cost of transition far above levels expected at the outset of the present wave of uniquely restructuring the countries involved I explore here several angles of this discussion But three stand out One is the disintegration of the postwar framework for economic cooperation in that part of the world Another is the disarray brought about by incisive economic transformations in the area Finally various national regional and international interest groups are at work there hoping to mold somehow the drift of the reform or at least key components thereof in their own image In the process it is often forgotten as Ralf Dahrendorf 1990 p 41 so pointedly remarked that all systems mean serfdom including the natural system of a total market order in which no one tries to do anything other than guard certain rules of the game discovered by a mysterious sect of economic advisers
