Refugee Health Medecins Sans Frontieres,1997 Includes statistics Handbook of Refugee Health Miriam Orcutt,Clare Shortall,Sarah Walpole,Aula Abbara,Sylvia Garry,Rita Issa,Alimuddin Zumla,Ibrahim Abubakar,2021-12-17 This book helps to recognize the rights of refugees and provides a framework to identify and approach health needs from basic elements like service mapping and initial interventions to more complex elements of ongoing healthcare and support and broader topics such as migration public health migration policy and health systems Beyond biomedical frameworks it draws on socio ecological models to inform assessments and integrated models of care to improve health and health equity Set out in three comprehensive sections public health theory Part 1 applied public health Part 2 and clinical approaches Part 3 this book draws on multiple disciplines and insights from humanitarians academics policy experts and clinicians from diverse contexts with expertise in forced migration to create an accessible reference tool to inform healthcare professionals interactions with forcibly displaced individuals and populations in all contexts for both high and low resource countries Apart from providing information across the spectrum of health issues clinical specialties and global contexts it discusses associated areas including human rights and law public health medical anthropology and cultural awareness Key Features Bridges the gap between existing academic literature on refugee health and guidelines for health management in humanitarian emergencies Helps to develop an integrated approach to healthcare provision allowing healthcare professionals and humanitarians to adapt their specialist knowledge for use in forced migration contexts and with refugees Recognizes the complex and interconnected needs in displacement scenarios and identifies holistic and systems based approaches Covers public health theory applied public health and clinical aspects of forced migration **Handbook of Disaster Medicine** Jan de Boer,Marcel Dubouloz,2020-04-28 Technological development has not only provided mankind with more prosperity but with increased destructive power as well These developments combined with an explosive growth of the world population have led to mass casualty situations varying from traffic accidents to war In the 20th Century over 200 million people were killed as a result of man made disasters a figure unequalled in the history of mankind It is not surprising therefore that a new medical discipline has emerged disaster medicine The realization that disasters have effects which cross the traditional boundaries of medical specialisms and nationality led to the foundation of the International Society of Disaster Medicine ISDM which issued an international curriculum on education and training in disaster medicine As a logical consequence the ISDM decided to develop its curriculum into a handbook now available to the global community of disaster medicine specialists This Handbook of Disaster Medicine contains contributions from international experts in the field and will be of value and interest to a wide variety of professionals in the discipline of disaster medicine and management **Principles of Medicine in Africa** Eldryd Parry,2004-03-25 For students of medicine and those who practice in the front line of medicine in Africa this fully revised edition combines classical internal medicine with a rich understanding of the major influences on health and

disease in Africa It puts disease into the context of family and culture and is not afraid to address the effects of inequality on health and the problems of limited resources for health care There is a much expanded section on non communicable diseases as well as comprehensive accounts of HIV AIDS malaria tuberculosis and other major infections in the continent Forward looking and evidence based this new edition reflects the emergence of new diseases and health risks in the region Compiled by the foremost international authorities this is the one essential text for the medical student medical officer or postgraduate student wanting the most complete and up to date reference book on medicine in Africa

The Health of Refugees Pascale Allotey, Daniel Reidpath, 2019-01-03 At the moment over 65 million people are forcibly displaced from their homes The reasons for movement range from extreme weather conditions and environmental disasters to war civil and political crises to the need for basic economic survival Amongst these 65 million people are those that have been forced to leave a country that is no longer willing or able to offer protection and those who are displaced within their own country s borders In order to improve conditions for displaced people all over the globe we need to look at the reason behind their move as this defines their migration status under international law In its turn the migration status affects the requirements of other countries to grant asylum and the individual s right to protection and support The definition of migration status and its implications has created tension in the public debate on refugees for decades and is today more relevant than ever In *The Health of Refugees Public Health Perspectives from Crisis to Settlement* the challenges and vulnerabilities created from this debate are addressed by public health policy makers clinical practitioners and researchers An analysis of public health international law the history of migration and the media s role in refugee health it is a comprehensive and critical work with a strong message in favour of international and interdisciplinary cooperation With a focus on what international obligations entail when it comes to refugees and migrants the authors present a reinforced take on our collective responsibility to leave no one behind *The Health of Refugees Public Health Perspectives from Crisis to Settlement* traces the health repercussions on individuals and populations from the moment of forced mass movement due to conflict and other disasters through to the process of resettlement in other countries These issues are addressed within the context of other global public health priorities and are part of the book s critical analysis not only of the particular vulnerabilities created by mobility but also how these interact and intersect with existing considerations across gender and age in health systems and international law With a wider geographical area and case studies from all over the globe as a basis for the studies presented this is a fully updated edition with new material discussing the current political landscape A truly multidisciplinary book *The Health of Refugees* is ideal for public health practitioners researchers and postgraduate students It is also an important work for those involved in non governmental organisations international aid and international development Furthermore it provides a critical background for clinicians mental health workers and policymakers from health welfare and migration

Health in Humanitarian Emergencies David Townes, 2018-05-31 The fields of Global Health and Global Emergency Response have

attracted increased interest and study There has been tremendous growth in the educational opportunities around humanitarian emergencies however educational resources have not yet followed the same growth This book corrects this trend offering a comprehensive single resource dedicated to health in humanitarian emergencies Providing an introduction to the public health principles of response to humanitarian emergencies the text also emphasizes the need to coordinate the public health and emergency clinical response within the architecture of the greater response effort With contributing authors among some of the world s leading health experts and policy influencers in the field the content is based on best practices peer reviewed evidence and expert consensus The text acts as a resource for clinical and public health practitioners graduate level students and individuals working in response to humanitarian emergencies for government agencies international agencies and NGOs

Conflict and Catastrophe Medicine Adriaan P.C.C. Hopperus Buma, David Burris, Alan Hawley, James Ryan, Peter F. Mahoney, 2009-04-02 Six years have passed since the first edition of Conflict and Catastrophe Medicine was published Those 6 years have not been peaceful conflict has continued in Iraq Afghanistan Africa and the Middle East Terrorist attacks have continued around the world and London has had its first experience of suicide bombings The landscape for humanitarian work is dangerous and challenging The aim of this second edition is in line with the first edition to provide an entry level resource for people working or considering work in a hostile environment Contributors with real hard one practical experience have been invited to share their views and they do this with a raw honesty in a variety of writing styles The second edition of Conflict and Catastrophe Medicine has benefited from these contributions and we hope our prospective readers will do so as well The book editors are donating their royalties from this book to the charity Help for Heroes Adriaan Hopperus Buma Alan Hawley David G Burris James M Ryan Peter F Mahoney v

Preface to the First Edition This work is intended as an entry level text aimed at medical nursing and para medical staff undertaking work in a hostile environment

Field Hospitals Elhanan Bar-On, Kobi Peleg, Yitshak Kreiss, 2020-01-09 Field hospitals are deployed in a wide range of scenarios including natural disasters epidemic outbreaks armed conflicts and refugee crises Operation in these conditions requires adaptation to disaster medicine principles and operation in an austere environment and unfamiliar cultural milieu whilst maintaining acceptable standards of care For many of those involved it may be their first encounter This book which is the first to address the preparation and operation of field hospitals brings together the experience of world leaders in the field Coming from a wide variety of organizations and backgrounds all have extensive experience in field hospital deployment in multiple scenarios The text containing both background information and practical guidelines will serve all those involved in field hospital deployment including policy makers and planners physicians and nurses paramedical professionals and logisticians It will help them deliver optimal care to people around the globe in difficult times of need

Disaster and Development Andrew E. Collins, 2009-09-10 Development to a large extent determines the way in which hazards impact on people Meanwhile the occurrence of disasters alters the scope of development Whilst a

notion of the association of disaster and development is as old as development studies itself recent decades have produced an intensifying demand for a fuller understanding Evidence of disaster and development progressing together has attracted increased institutional attention This includes recognition through global accords of a need for disaster reduction in achieving Millennium Development Goals and of sustainable development as central to disaster reduction However varied interpretations of this linkage and accessible options for future human wellbeing remain unconsolidated for most of humanity This engaging and accessible text illuminates the complexity of the relationship between disaster and development It opens with an assessment of the scope of contemporary disaster and development studies highlighting the rationale for looking at the two issues as part of the same topic The second and third chapters detail development perspectives of disaster and the influence of disaster on development The fourth chapter exemplifies how human health is both a cause and consequence of disaster and development and the following chapter illustrates some of the learning and planning processes in disaster and development oriented practice Early warning risk management mitigation response and recovery actions provide the focus for the fifth and sixth chapters The final chapter indicates some of the likely future contribution and challenges of combined disaster and development approaches With an emphasis on putting people at the centre of disaster and development the book avoids confronting readers with no hope representations instead highlighting disaster reduction opportunities This book is an essential introduction for students from multiple disciplines whose subject area may variously engage with contemporary crises and for many other people interested in finding about what is really meant by disaster reduction They include students and practitioners of development environment sociology economics public health anthropology and emergency planning amongst others It provides an entry point to a critical yet diverse topic backed up by student friendly features such as boxed case studies from the geographical areas of America to Africa and parts of Europe to parts of the East summaries discussion questions suggested further reading and web site information Humanitarian Crises Jennifer Leaning, Susan M. Briggs, Lincoln C. Chen, 1999 Since the late 1980s the international relief community has seen its resources stressed beyond capacity by humanitarian crises Covering topics from emergency public health measures to the psychological trauma of relief workers this volume presents a seasoned assessment of current practice and proposals for improving operational efforts *Machel Study 10-year Strategic Review*, 2009 The organisation of this report aims to heighten our understanding of the myriad ways in which armed conflict affects children and how children regard their participation not only in war but in programmes aimed at preventing violence against them and in promoting their recovery and reintegration The central message of this 10 year strategic review is that war violates every right of the child The report thus frames its findings within three categories political and diplomatic actions and responsibilities system wide international policies standards and architectures and prevention and response Field Epidemiology Michael B. Gregg, 2002 Field epidemiology involves the application of epidemiologic methods to unexpected health problems when a rapid on site

investigation is necessary for timely intervention This well received text based on decades of experience at CDC describes these activities in simple practical terms The thoroughly revised Second Edition includes four new chapters on unique aspects of field studies in the workplace after natural disasters in preparation for and response to possible bioterrorist attacks and by state and local health departments

Conflict and Catastrophe Medicine James M. Ryan,Adriaan P.C.C. Hopperus Buma,Charles W. Beadling,Aroop Mozumder,David M. Nott,Norman M. Rich,Walter Henny,David MacGarty,2014-01-13 The first edition of conflict and catastrophe was produced in 2002 and a second successful edition followed in 2009 The decision to produce these works sprung from painful problems experienced by colleagues and authors themselves during many humanitarian and related deployments The guide for both editions was to provide in one volume an entry level text covering all aspects of deployment with an emphasis on medicine and healthcare in these environments This third revised expanded and updated edition of Conflict and Catastrophe Medicine A Practical Guide follows its successful predecessors in providing a framework for use by health professionals visiting a resource constrained environment Encompassing problems brought about by local conflict or natural disasters the book covers preparation organisation logistics treatment of major trauma and medical emergencies and the special problems of delivering medicine in a hostile environment This book comprehensively tackles Self preparation of health professionals to face a range of medical and related problems which occur in hostile and remote environments War and disaster medicine covering acute management rehabilitation reconstruction and prevention Bridging the fields of medicine nursing international relations history politics and economics The book also touches on nutrition infection trauma psychiatry and psychological medicine and training

Humanitarianism and the Quantification of Human Needs Joël Glasman, 2020-01-06 This book provides a historical inquiry into the quantification of needs in humanitarian assistance Needs are increasingly seen as the lowest common denominator of humanity Standard definitions of basic needs however set a minimalist version of humanity both in the sense that they are narrow in what they compare and that they set a low bar for satisfaction The book argues that we cannot understand humanitarian governance if we do not understand how humanitarian agencies made human suffering commensurable across borders in the first place The book identifies four basic elements of needs As a concept as a system of classification and triage as a material apparatus and as a set of standards Drawing on a range of archival sources including the United Nations Refugee Agency UNHCR Médecins sans Frontières MSF and the Sphere Project the book traces the concept of needs from its emergence in the 1960s right through to the present day and United Nations Secretary General Ban Ki moon's call for evidence based humanitarianism Finally the book assesses how the international governmentality of needs has played out in a recent humanitarian crisis drawing on field research on Central African refugees in the Cameroonian borderland in 2014-2016 This important historical inquiry into the universal nature of human suffering will be an important read for humanitarian researchers and practitioners as well as readers with an interest in international history and development

Toolkits Louisa Gosling, Mike Edwards, 2003 Toolkits is divided into three sections underlying principles practical questions and tools This new edition brings these up to date and discusses the implications of adopting a human rights approach to development and the increased emphasis on partnership There are new chapters on impact assessment and monitoring and evaluating advocacy as well as two new tools one for improving your planning evaluation and impact assessment and one for stakeholder analysis
