Regeneration Of Coalfield Areas Anglogerman Perspectives:

Regeneration of the Coalfield Areas C. Critcher, Klaus Schubert, David P. Waddington, 1995 The UK government's pit closure programme dramatically highlights the steady decline of heavy industry especially coal and steel during the post war period in many industrial regions of Europe Whilst the political controversy over pit closures may have died down in the UK the problem remains for planners and policy makers of regenerating areas which previously had high levels of employment and strong communities

Re-Constructing the Post-Soviet Industrial Region Adam Swain, 2007-04-11 This book examines the political economy of attempts to restructure the Donbass one of the Soviet Union's most important old economy rustbelt industrial regions It shows how local interest groups have successfully frustrated the central government's and the World Bank's proposed market oriented restructuring and how a manufacturing based regional economy is surviving partially with restructuring postponed

Out of the Ashes? David Waddington, 2001 The long term decline of the British coal industry has had serious and lasting implications for miners their families and communities Out of the Ashes Presents an authoritative review of the history and current state of this process Drawing on their own research in Nottinghamshire and South Yorkshire mining communities the authors chart the impact of pit closures of their threat on community life The viability and working practices of the restructured industry are examined alongside case studies of successful and failed worker take overs The management of decline and attempts to stimulate the local economies affected are compared with very different strategies pursued in Germany Belgium and Spain The book concludes with an examination of the likely future of what remains of the industry and the prospects of the communities it once supported Written in an accessible style Out of the Ashes Will engage all who have a professional or personal interest in the decline of the British coal mining industry as well as academic and students of regional studies sociology psychology and the social sciences in general

Developing Coalfields Communities David Waddington, 2003-12-03 In 1998 following a sobering report by the Coalfields Task Force New Labour unveiled a 350 million package of measures to remedy coalfield deprivation and social exclusion This book examines the impact of this investment in Warsop Vale a village which has starkly emphasised the negative consequences of coalfield decline

Changing Work and Community Identities in European Regions John Kirk, Sylvie Contrepois, Steve Jefferys, 2016-03-09 This book juxtaposes the experiences of regions that have lived or are living through industrial transition in coal mining and manufacturing centres throughout Europe opening the way to a deeper understanding of the intensity of change and of how work helps shape new identities

The British Miner in the Age of De-Industrialization Jörg Arnold, 2024 A book which challenges received understandings of the place of the miner in contemporary British history arguing that the British coal miners went through a cyclical movement from loser to winner and back again as Britain underwent a de industrial revolution in the final decades of the twentieth century

The Global Economy, National States and the Regulation of Labour Paul Edwards, Tony Elger, 2014-06-03 The implications of globalization for labour are

more often asserted than analyzed This collection and its companion volume Globalization and Patterns of Labour Resistance edited by Jeremy Waddington seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour It considers the ways in which national and supra national regimes of labour regulation are being actively reconstructed in the context of the internationalization of production The contributors analyze the implications of changes in different national labour regimes for relations between state capital and labour and for class and gender segmentation and discuss the scope and limits of recent initiatives in the implementation of international labour standards

Ibss: Economics: 1995 Compiled by the British Library of Political and Economic Science at the London School of Economics, 1996 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences

Welfare Research Fiona William, Jennie Popay, Ann Oakley, 2005-08-12 First published in 1998 This book attempts to contribute a new framework for social research in the welfare field As such it engages with new theories new approaches and new methods alongside a constructive critique of both the old and the new It attempts to illustrate approaches to conceptualization and operationalization within policy relevant research to reflect and explore both new thinking in social theory and in welfare policy as well as to maintain a connection with old concerns Our concern is with welfare research both theory and method broadly defined as the wider landscape of policy and provision captured in the past at least by the notion of the welfare state The new thinking with which the book is primarily concerned involves a shift away from seeing people as the passive beneficiaries of welfare provided through state interventions and professional expertise and from seeing them as fixed single social categories of poor old single parent or as one dimensional objective socio economic classifications

Global Challenges to CSR and Sustainable Development Stephen Vertigans, Samuel O. Idowu, 2021-02-24 This book examines and analyzes the challenges programmes for Corporate Social Responsibility CSR and sustainable development are facing in global management practice It looks at the dichotomy of a general and popular demand for responsible and resilient management and the counterplayers that impact the positive effect of such efforts The book assembles latest research looking at the root causes for this opposition and new case studies that showcase the dilemma and possible solutions to overcome it Overall the book juxtaposes short terminism within CSR programmes and longer term sustainable development mis allocation of resources and failed promises associated with CSR and sketches pathways how CSR and sustainable development can be directed towards the most pressing issues

The Natural Wealth of Nations David Roodman, 2014-04-08 Every year the world s governments spend over US 700 billion subsidizing activities that harm the environment The Natural Wealth of Nations shows how cutting these wasteful subsidies can actually boost the economy save tax and help the environment By raising taxes on harmful activities like air pollution whilst cutting taxes on payrolls and profits pollution is discouraged and both work and investment boosted In a comprehensive global survey The

Natural Wealth of Nations provides examples from Sweden to Spain to Malaysia of the growing number of countries that are successfully using these market based approaches to clean up their environments This is an accessible practical book offering concrete proposals for cleaning up the world s environment and overcoming ecological ignorance *Organizational Studies* Warwick Organizational Behaviour Staff,2001 Edited by a collective of ten academics at the University of Warwick this set incorporates some of the best works within organization studies

Complexity and Co-evolution Elizabeth Garnsey,James McGlade,2006-01-01 in my opinion readers should find in this book both several remarkable insights concerning basic statements of evolutionary theorising and concrete results that can be acquired by applying such basic statements in computer simulation models and in various fields of analysis Mauro Lombardi The Journal of Artificial Societies and Social Simulation Complexity theory first emerged three decades or so ago but only recently has its potential relevance for the study of social and economic phenomena really begun to be recognised This timely collection of essays clearly demonstrates both conceptually and empirically how complexity theory ideas can provide considerable insight into how socio economic systems cities societies industries technologies and economies evolve and adapt over time It is essential reading for anyone interested in how order and evolution emerge out of the seemingly chaotic socio economic world around us Ron Martin University of Cambridge UK I read Complexity and Co Evolution with real pleasure These authors have done the near impossible they have made the concepts of a new and evolving science accessible to people who can apply it in practical ways The clarity of writing reflects the sort of confidence only the truly informed can muster for they need no jargon to cover confusions Their mastery allows them to present the essentials in simple unadorned forms and through genuinely illustrative examples Any manager or director trying to navigate dynamic markets can use this book to learn new ways of thinking explore new possibilities and study historical experiences Robert Artigiani United States Naval Academy Current thinking about evolutionary dynamics increasingly relies on co evolution and co evolution increasingly implies complex dynamics of one sort or another This volume brings together a capable and well balanced group of thinkers on these topics who explore these deeply related concepts with up to date and advanced tools and concepts For anyone wishing to learn about the latest developments in these rapidly developing areas this book is highly recommended J Barkley Rosser Jr James Madison University US This book applies ideas and methods from the complexity perspective to key concerns in the social sciences exploring co evolutionary processes that have not yet been addressed in the technical or popular literature on complexity Authorities in a variety of fields including evolutionary economics innovation and regeneration studies urban modelling and history re evaluate their disciplines within this framework The book explores the complex dynamic processes that give rise to socio economic change over space and time with reference to empirical cases including the emergence of knowledge intensive industries and decline of mature regions the operation of innovative networks and the evolution of localities and cities Sustainability is a persistent theme and the practicability of intervention is examined in the light of these perspectives

Specialists in disciplines that include economics evolutionary theory innovation industrial manufacturing technology change and archaeology will find much to interest them in this book In addition the strong interdisciplinary emphasis of the book will attract a non specialist audience interested in keeping abreast of current theoretical and methodological approaches through evidence based and practical examples **Memory and the Language of Contention** ,2025-03-10 How does language shape the memory of activism And how do memories of hope or of repression inflect the language used by social movements in the present day This edited volume featuring international scholars across literary and cultural studies anthropology legal studies and linguistics shows how memories of activism live in the medium of language It contends that working with and working on the historical resonance of words and linguistic commonplaces is a central feature of political contention

Directory of Published Proceedings ,2004 **Men, Gender Divisions and Welfare** Jeanette Edwards,Jeff Hearn,Prof Jeff Hearn,Jennie Popay,2002-05-03 A fresh look at the balance of responsibilities and control in care giving both in the public and private spheres Using previously unpublished empirical data contributors focus on male experiences of welfare services *Journal for the Study of British Cultures* ,1996 Cleaner Coal in China International Energy Agency,Organisation for Economic Co-operation and Development,2009 China s coal mined locally and available at a relatively low cost has brought enormous benefits to energy consumers in China and to those outside the country who enjoy the products of its coal based economy Yet from another perspective China s coal use has a high cost Despite progress health and safety in the thousands of small coal mines lag far behind the standards achieved in China s modern large mines Environmental degradation is a real and pressing problem at all stages of coal production supply and use Adding to these burdens emissions of carbon dioxide are of concern to the Chinese government as it embarks on its own climate protection strategy Technology solutions are already transforming the way coal is used in China and elsewhere This study explores the context in which the development and deployment of these technologies can be accelerated Providing a large amount of new data it describes in detail the situation in China as well as the experiences of other countries in making coal cleaner Above all the report calls for much greater levels of collaboration existing bi lateral and multi lateral co operation with China on coal is found lacking China s growing openness presents many commercial opportunities Establishing a global market for cleaner coal technologies is key to unlocking the potential of technology one of ten major recommendations made in this study
