Parental Psychiatric Disorder

Michael Göpfert, Jeni Webster, Mary V. Seeman, 2004-05-13 A unique and innovative approach to family issues in psychiatric disorders The authors tackle a broad range of complex issues that are rarely covered in the depth or with the expertise that this volume brings This book is a major contribution to the field and provides the kind of international perspective that enhances our understanding of the complex dimensions of psychiatric disorders from a multigenerational and cross cultural perspective From a review of the first edition by Carol Nadelson Professor of Psychiatry Harvard Medical School It is indisputable that mental illness in a parent has serious and often adverse effects on the child something which is surprisingly unreflected in clinical service provision In this completely rewritten second edition an international multidisciplinary team of professionals review the most up to date treatment interventions from a practical clinical point of view It is essential reading for all professionals dealing with adult mental illness and child care

Climate Change and Urban Health Emily Ying Yang Chan, 2019-05-14 This book provides a theoretical framework and related technical skills for investigating climate change and its public health consequences and responses with a focus on urban settings and in particular Hong Kong a subtropical metropolis in Asia Specifically the book examines the impact of climate change on health in terms of mortality hospital admissions and help seeking as well as key response strategies of adaptation and mitigation Many existing books tend to consider the relationship of climate change and public health as two connected issues divided into various discrete topics Conversely this book explicitly applies public health concepts to study the human impact of climate change for example by conceptualising climate change impact and its alleviation mitigation and adaptation in a public health framework Overall this volume summarises what is known about climate change and health and ignites further debates in the area especially for urban subtropical communities from within a wider global perspective This book will be of great interest to students and scholars of environmental health public health climate change urban studies and Asian studies

Mechanisms of Psychological Influence on Physical Health

Laura L. Carstensen, 2012-12-06 In recent years ideas about the influence of psychological status on physical health have been elevated from intuition and clinical lore to a legitimate area of scientific study Mechanisms of influence are indubitably diverse Some of this influence is indirect accounted for simply by the instrumental help that social engagement associated

with good mental health affords people for example psychologically healthy people are probably more likely to comply with medication regimens and engage in other healthful behaviors to a greater extent than those who are socially withdrawn or psychologically unstable But recent studies suggest that while the importance of these more obvious factors cannot be denied the complete picture includes factors that are much more subtle and complex A body of research is beginning to accumulate that suggests that all three major regulatory systems the central nervous system the endocrine system and the immune system are affected by cognitions emotions and behavior There is no doubt that a relationship between mental and physical health exists but very little is known about the specific mechanisms by which such influence occurs At least in part empirical research in this area has been limited by the inherent need for an interdisciplinary approach and synthesis of collected data Recently a few researchers in a number of different disciplines have begun to study directly the linkage between psychological and emotional well being and health
