The Hidden Form of Capital Peter L. Berger, Gordon Redding, 2011-10-01 The Hidden Form of Capital

presents evidence from several parts of the changing world about how the realm of the spirit affects the economy. Instead of adding to the theoretical speculation on the role of culture in economic progress, this book provides evidence from recent analytical studies in Europe, Asia, Africa, Russia, and the United States. **Society Shaped by Theology** Robin Gill, 2013. *Society Shaped by Theology* explores the possibility that theological concepts may sometimes still be influential in the modern world. It follows in the tradition of Max Weber, arguing that theological virtues and debates can at times be transposed wittingly or unwittingly into society at large. Gill examines the unusual instance of the public debate about *Honest to God* in the 1960s but then turns to the current debate about faith and social capital, adding fresh and unexpected evidence.

Society Shaped by Theology Professor Robin Gill, 2013-05-28. Over the last thirty years, a number of theologians have been using aspects of sociology alongside the more traditional resources of philosophy. In turn, sociologists with an interest in theology have also contributed to an interaction between theology and sociology. The time is right to revisit the dialogue between theologians and sociologists. In his new trilogy on Sociological Theology, Robin Gill makes a renewed contribution to the mapping of three abiding ways of relating theology and sociology with the three volumes covering *Theology in a Social Context*, *Theology Shaped by Society*, and *Society Shaped by Theology*. *Society Shaped by Theology* explores the possibility that theological concepts may sometimes still be influential in the modern world. It follows in the tradition of Max Weber, arguing that theological virtues and debates can at times be transposed wittingly or unwittingly into society at large. Robin Gill examines the unusual instance of the public debate about *Honest to God* in the 1960s but then turns to the current debate about faith and social capital, adding fresh and unexpected evidence. Finally, Gill argues that bioethics in the public domain, especially on global issues such as AIDS, can be enriched and deepened by a judicious use of theological virtues.

Persecution, Persuasion and Power James A. Kelhoffer, 2010. James A. Kelhoffer examines an often overlooked aspect of New Testament constructions of legitimacy: namely, the value of Christians withstanding persecution as a means of corroborating their religious identity as Christ's followers. The introductory chapter defines the problem in interaction with sociologist Pierre Bourdieu's concept of cultural capital. Chapters 2-10 examine the depictions of persecuted Christians in the Pauline letters, First Peter, Hebrews, Revelation, the NT Gospels, and Acts. These exegetical analyses support the conclusion that assertions of standing authority and power claimed on the basis of persecution play a significant and heretofore underappreciated role in much of the NT. It is also argued that depictions of persecution can have both positive implications for the persecuted and negative implications for the depicted persecutors in constructions of legitimation. An epilogue considers later examples of early Christian martyrs and confessors as well as John Foxe's *Book of Martyrs*. The epilogue also addresses the ethical and hermeneutical problem of asserting the withstanding of persecution as a basis of legitimacy in ancient and modern contexts. This problem stems from the observation that although the NT authors present their construals of withstanding persecution as a basis of legitimation as if they were self-evident, such assertions are actually the culmination of

numerous presuppositions and are therefore open to dissenting viewpoints Yet the NT authors do not acknowledge the possibility of competing interpretations or that oppressed Christians could someday become oppressors Accordingly this exegetical study calls attention to an ethical and hermeneutical problem that the NT bequeaths to the modern interpreter a problem inviting input from ethicists and other theologians Values and Violence Ibrahim A. Karawan, Wayne McCormack, Stephen E. Reynolds, 2008-10-11 Most books on terrorism deal with descriptions of terrorist organizations and activities some examine privacy and civil liberties issues and others treat terrorism as a series of policy choices Hardly any books deal with the foundational questions of values and violence as they relate to terrorism The two unique features of this book are that it deals with violence at the normative foundations of values and human dignity and that it includes many of the best known authors in the world from a variety of disciplines making it a paradigmatic example of cutting edge study in interdisciplinary scholarship with a focus on bringing theories and policy issues closer together Values and Violence includes chapters by a dozen of the leading scholars in the world on patterns of political violence responses to terrorism and the basic value choices inherent in them **Religion and the Health of the Public** G. Gunderson, J. Cochrane, 2012-02-14 The book proposes a critical theory of the role and place of religion in public health and argues for a programmatic reorientation of these two fields of practice and inquiry to more effectively align religious health assets widely present in many contexts and public health services and facilities **Ecosystems, Society, and Health** Lars K. Hallström, Nicholas P. Guehlstorf, Margot W. Parkes, 2015-05-01 The modern world has created complex systems that have interrelated concerns Ecosystems Society and Health presents new perspectives on how the challenges relating to these concerns must be examined not as disparate political narratives but as dynamic transformational stories that demand integrative systems of research analysis practice and action Struggles over healthy watersheds diseases associated with environmental change and public health impacts of unsafe food exemplify the demand for integrated understanding and action Contributors argue that traditional science power politics and linear ideals of public policy are inadequate to address sustainability justice safety and responsibility Drawing from a series of case studies that range from nursing to watershed management to environmental health and risk communication this collection strikes an informed balance between practical lessons and a sophisticated theoretical context with which to interpret them Demonstrating the diverse contextual understanding demanded by today's complex issues Ecosystems Society and Health is a timely resource with guidance for practitioners researchers and educators The Future of Religious Freedom Allen D. Hertzke, 2013 Based on a symposium held in Istanbul Turkey Understanding Youth Participation Across Europe Hilary Pilkington, Gary Pollock, Renata Franc, 2017-10-07 This edited volume presents findings from a major cross European research project mapping the civic and political engagement of young Europeans in the context of both shared and diverse political heritages Drawing on new survey interview and ethnographic data the authors discuss substantive issues relating to young people's attitudes and activism including attitudes to the European Union and to history

understanding of political ideologies how attitudes to democracy are shaped by political heritage activism in radical right wing groups and religion based organisations and digital activism These contributions make the book s case that transnational and multi method projects can enrich our understanding of how young people envisage their place and role in Europe s political and civic space The book challenges methodological assumptions that survey research shows the big picture but at the cost of local nuance or that qualitative research cannot speak beyond the individual case and demonstrates the added explanatory value of triangulating different kinds of data Understanding Youth Participation Across Europe will be of interest to students and scholars across a range of disciplines including Sociology Political Sociology Youth Studies and Political and Civic Participation
