politics In Latin America as in the Middle East religious belief is a primary motivating factor for politically active citizens Edward Lynch questions the frequent pitfall of Latin American scholarship categorizing religious belief as a veil for another interest or as a purview just of churchmen thereby ignoring its hold over lay people Challenging this traditional view Lynch concludes that religious motivations are important in their own right and raises important questions about the relationship between religion and politics in Latin America Looking at the two most important Catholic lay movements Liberation Theology and Christian Democracy Lynch uses Nicaragua and Venezuela as case studies of how religious philosophy has fared when vested with political power This timely study describes the motivations driving many important political actors Divided into two parts Ideologies In Theory and Ideologies In Practice this volume features a discussion of the theoretical background of two Catholic philosophies Using Nicaragua and Venezuela as case studies Lynch finds that Liberation Theology and Christian Democracy are not as different as many scholars think in fact there are many parallels He concludes that both philosophies face their strongest challenge from a revitalized orthodox Catholic social doctrine

Outstanding Academic Title 2009 Religion and Regimes Mehran Tamadonfar, Ted G. Jelen, 2013-11-26 This work is a collection of essays that describe and analyze religion and regime relations in various nations in the contemporary world The contributors examine patterns of interaction between religious actors and national governments that include separation support and opposition In general the contributors find that most countries have a majority or plurality religious tradition which will seek a privileged position in public life The nature of the relationship between such traditions and national policy is largely determined by the nature of opposition A pattern of quasi establishment is most common in settings in which opposition to a dominant religious tradition is explicitly religious However in some instances the dominant tradition is associated with a discredited prior regime in which a pattern of legal separation is most common Conversely in some nations a dominant religion is for historical reasons strong associated with national identity Such regimes are often characterized by a lazy monopoly in which the public influence of religion is reduced *Pentecostals and Charismatics in Latin America and Latino Communities* Néstor Medina, 2015-09-30 Pentecostal charismatics in Latin America and among Latinos communities that share profound historical linguistic and cultural roots This compilation brings together practitioners and academics with pentecostal charismatic affiliations who analyse from within the development of the movement among these diverse communities
