At the end of this module, you are expected to:

1. Explain how globalization affects religious practices and beliefs;
2. Analyze the relationship between religion and global conflict, and conversely, global peace.

### WHAT IS RELIGION?

The English word *religion* is from the Latin verb *religare*, which means "to tie" or "to bind fast". A contemporary scholar defines religion as "a system of beliefs, rituals, and practices, usually institutionalized in one manner or another, which connects this world with the beyond. It provides the bridge that allows humans to approach the divine, the universal life force that both encompasses and transcends the world". This substantive definition of religion limits religion to the belief in supernatural or divine force. However, for its functional definition, religion is anything that provides an individual

## **Religion In The Contemporary World:**

Religion in the Contemporary World Alan Aldridge, 2013-04-03 In the new edition of this widely praised text Alan Aldridge examines the complex realities of religious belief practice and institutions Religion is a powerful and controversial force in the contemporary world even in supposedly secular societies Almost all societies seek to cultivate religions and faith communities as sources of social stability and engines of social progress They also try to combat real and imagined abuses and excess regulating cults that brainwash vulnerable people containing fundamentalism that threatens democracy and the progress of science and identifying terrorists who threaten atrocities in the name of religion The third edition has been carefully revised to make sure it is fully up to date with recent developments and debates Major themes in the revised edition include the recently erupted culture war between progressive secularists and conservative believers the diverse manifestations of fundamentalism and their impact on the wider society new individual forms of religious expression in opposition to traditional structures of authority and the backlash against multiculturalism with its controversial implications for the social integration of ethnic and religious minority communities Impressive in its scholarly analysis of a vibrant and challenging aspect of human societies the third edition will appeal strongly to students taking courses in the sociology of religion and religious studies as well as to everyone interested in the place of religion in the contemporary world Religion

in the Contemporary World Alan Aldridge, 2007-10-09 Examines the complex realities of religious belief practice and institutions ranging from the high growth rates of successful minority religious movements such as Mormons and Jehovah's Witnesses to the phenomenal rise of Pentecostalism the challenge of fundamentalism and the apparent turn from religion to spirituality **Religion in the Contemporary World** Alan E. Religion: Insecurity and Religiosity in the Contemporary World Francesco Molteni, 2020-12-07 In A Need for Religion Insecurity and Religiosity in the Contemporary World Francesco Molteni tries to answer one of the broadest questions for scholars of religion why is religiosity declining in developed countries He does so by inspecting all the different nuances of the insecurity theory which links the feeling of security typical of modern societies with the diminished need for religion as source of reassurance support and predictability In this respect he notes that much of the evidence is far less clear than expected and that secularization processes are at an advanced stage only in a rather small group of worldwide countries

**Religions in Movement** Robert Hefner, John Hutchinson, Sara Mels, Christiane Timmerman, 2013-10-23 There has long been a debate about implications of globalization for the survival of the world of sovereign nation states and the role of nationalism as both an agent of and a response to globalization In contrast until recently there has been much less debate about the fate of religion Globalization has been viewed as part of the rationalization process which has already relegated

religion to the dustbin of history just as it threatens the nation as the world moves toward a cosmopolitan ethics and politics. The chapters in this book however make the case for the salience and resilience of religion often in conjunction with nationalism in the contemporary world in several ways. This book highlights the diverse ways in which religions first and foremost make use of the traditional power and communication channels available to them like strategies of conversion, the preservation of traditional value systems and the intertwining of religious and political power. Nevertheless, challenged by a more culturally and religiously diversified societies and by the growth of new religious sects, contemporary religions are also forced to let go of these well known strategies of preservation and formulate new ways of establishing their position in local contexts. This collection of essays by established and emerging scholars brings together theory driven and empirically based research and case studies about the global and bottom up strategies of religions and religious traditions in Europe and beyond to rethink their positions in their local communities and in the world.

**Religious Fundamentalism in the Contemporary World** Santosh C. Saha, 2004-01-01. Today new and ever more pernicious forms of terrorist violence threaten the world. Because these new forms of violence are so often linked to religious radicalism, modern terrorism has challenged the secular ethics of contemporary civil society. There is a pressing need to understand modern religious movements that have added militancy and belligerence as fundamental elements of religious practice. Contributors to this volume painstakingly tackle the question of how to define the contours of current religious fundamentalism as they examine the private and public postures of fundamentalist rhetoric, the importance of its regional variants and the damage it can do to regional and national education systems. Their analysis tracks trends in religious movements that aspire to radicalize reform and violently topple governments and nations while highlighting the difference between fundamentalist interpretations and other longstanding juridical, political and intellectual traditions.

Examines religious freedom and diversity including agnostics and atheists on a global scale, highlighting trends over the past 100 years and projecting estimates for the year 2050. Outlines the issues and challenges related to definitions, taxonomies, sources, analyses and other techniques in interpreting data on religious adherence. Considers data from religious communities, censuses, surveys and scholarly research along with several in depth case studies on the global Muslim population, religion in China and the religious demography of recently created Sudan and South Sudan. Argues against the belief that the twentieth century was a secular period by putting forward new evidence to the contrary.
