Secularization in the Long 1960s Clive D. Field, 2017-03-16

Secularization in the Long 1960s Numerating Religion in Britain provides a major empirical contribution to the literature of secularization It moves beyond the now largely sterile and theoretical debates about the validity of the secularization thesis or paradigm Combining historical and social scientific perspectives Clive D Field uses a wide range of quantitative sources to probe the extent and pace of religious change in Britain during the long 1960s In most cases data is presented for the years 1955 80 with particular attention to the methodological and other challenges posed by each source type Following an introductory chapter which reviews the historiography introduces the sources and defines the chronological and other parameters Field provides evidence for all major facets of religious belonging behaving and believing as well as for institutional church measures The work engages with and largely refutes Callum G Brown s influential assertion that Britain experienced revolutionary secularization in the 1960s which was highly gendered in nature and with 1963 the major tipping point Instead a more nuanced picture emerges with some religious indicators in crisis others continuing on an existing downward trajectory and yet others remaining stable Building on previous research by the author and other scholars and rejecting recent proponents of counter secularization the long 1960s are ultimately located within the context of a longstanding gradualist and still ongoing process of secularization in Britain

Perspectives on Ecclesiology and Ethnography Pete Ward, 2012-03-15

Within the disciplines of religious studies systematic theology and practical theology there exists a divide between empirical and theological analyses of the church Each volume in the cross disciplinary series Studies in Ecclesiology

and Ethnography attempts to address this gap by exploring the methodological and substantive issues that arise from both theological and empirical studies of the church's practices and social reality Perspectives on Ecclesiology and Ethnography the inaugural volume in the series proposes that if theology is to regain its relevance to the church today theologians must utilize ethnographical tools in order to provide more accurate disciplined research that is situated in real contexts Using ethnography in its broadest sense encompassing any form of qualitative research this volume proposes that the church is both theological and social cultural which implies the need for a methodological shift for researchers in theology Contributions from twelve scholar practitioners lead the way forward Contributors Luke Bretherton Paul S Fiddes Nicholas M Healy Mary McClintock Fulkerson Alister E McGrath Richard R Osmer Elizabeth Phillips Christian Scharen John Swinton Pete Ward Clare Watkins John Webster

Reading Religion in Text and Context Peter Collins, 2017-05-15 To what extent is religion inherently textual What might the term textual mean in relation to religious faith and practice These are the two key questions addressed by the eleven thought provoking essays collected in this volume Accounts of the content and structure of sacred texts are commonplace The rather more adventurous aim of this book is to disclose within the context of religion the various ways in which meaning can be read of more or less obviously sacred writing and from discourses such as the body the built and natural environment drama and ritual
