'Religion' and the Religions in the English Enlightenment Peter Harrison, 2002-05-02 This study examines the changes which took place in the understanding of religion and the religions during the Enlightenment in England the period when the decisive break with Patristic Medieval and Renaissance notions of

religion occurred Dr Harrison s view is that the principles of the English Enlightenment not only made a special contribution to our modern understanding of what religion is but they pioneered in addition the scientific or non religious approach to religious phenomena During this period a crisis of authority in the Church necessitated a rational enquiry into the various forms of Christianity and in addition into the claims of all religions This led to a concept of religion based on natural theology which could link together the apparently disparate religious beliefs and practices found in the empirical religions

Studying Religion, Past and Present Nickolas P. Roubekas, Dimitris Xygalatas, Luther H. Martin, Donald Wiebe, 2024-09-05. Celebrating the contributions of Panayotis Pachis to the field, this book discusses the past, present, and future of the study of religion in antiquity and modernity. Panayotis Pachis has dedicated his celebrated career at the Aristotle University of Thessaloniki to the study of various aspects of ancient religions. The contents of this book reflect Pachis's conviction that the study of religious ideas and practices should be focused on three pillars: the study of history, the formulation and application of theoretical frameworks, and the utilization of traditional as well as innovative methodological tools. Chapters range from the scientific study of Roman Graeco religions, cultural evolution, and neurocognitive theories in the history and study of religion to a look at why we need an integrative approach to study religion past and present.

Edward Said's Rhetoric of the Secular Mathieu E. Courville, 2011-10-20. Edward Said's *Rhetoric of the Secular* provides an important new reading of Edward W. Said's work, emphasizing not only the distinction but also the fuzzy borders between representations of the religious and the secular found within and throughout his oeuvre, and at the core of some of his most customary rhetorical strategies. Mathieu Courville begins by examining Said's own reflections on his life before moving on to key debates about Said's work within Religious Studies and Middle Eastern Studies and his relationship to French critical theorists. Through close attention to Said's use of the literal and the figurative when dealing with religious, national, and cultural matters, Courville discerns a pattern that illuminates what Said means by secular. Said's work shows that the secular is not the utter opposite of religion in the modern globalized world but may exist in a productive tension with it.
