*Religion, Science, and Non-science* William Sweet, 2003      *Critical Thinking, Science, and Pseudoscience* Caleb W. Lack, Jacques Rousseau, 2016-03-08 This unique text for undergraduate courses teaches students to apply critical thinking skills across all academic disciplines by examining popular pseudoscientific claims through a multidisciplinary lens Rather than merely focusing on critical thinking grounded in philosophy and psychology the text incorporates the perspectives of biology physics medicine and other disciplines to reinforce different categories of rational explanation The book is also distinguished by its respectful approach to individuals whose ideas are according to the authors deeply flawed Accessible and engaging it describes what critical thinking is why it is important and how to learn and apply skills using scientific methods that promote it The text also examines why critical thinking can be difficult to engage in and explores the psychological and social reasons why people are drawn to and find credence in extraordinary claims From alien abductions and psychic phenomena to strange creatures and unsupported alternative medical treatments the text uses examples from a wide range of pseudoscience fields and brings evidence from diverse disciplines to critically examine these erroneous claims Particularly timely is the text s examination of how using the narrative of today s culture wars religion and culture impact science The authors focus on how the human brain rife with natural biases does not process information in a rational fashion and the social factors that prevent individuals from gaining an unbiased critical perspective on information Authored by a psychologist and a philosopher who have extensive experience teaching and writing on critical thinking and skeptical inquiry this work will help students to strengthen their skills in reasoning and debate become intelligent consumers of research and make well informed choices as citizens Key Features Addresses the foundations of critical thinking and how to apply it through the popular activity of examining pseudoscience Explains why humans are vulnerable to pseudoscientific claims and how critical thinking can overcome fallacies and biases Reinforces critical thinking through multidisciplinary analyses of pseudoscience Examines how religion and culture impact science Enlightens using an engaging entertaining approach Written by experienced and innovative scholar educators well known in the skeptic community Features teaching resources including an Instructor s Guide and Powepoint slides      **Feng Shui: Teaching About Science and Pseudoscience**

Michael R. Matthews, 2019-07-18 This book provides a richly documented account of the historical cultural philosophical and practical dimensions of feng shui It argues that where feng shui is entrenched educational systems have a responsibility to examine its claims and that this examination provides opportunities for students to better learn about the key features of the nature of science the demarcation of science and non science the characteristics of pseudoscience and the engagement of science with culture and worldviews The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal Feng shui is a deeply entrenched three millennia old system of Asian beliefs and practices about nature architecture health and divination that has

garnered a growing presence outside of Asia. It is part of a comprehensive and ancient worldview built around belief in chi qi, the putative universal energy or life force that animates all existence: the cosmos, the solar system, the earth, and human bodies. Harmonious living requires building in accord with local chi streams; good health requires replenishment and manipulation of internal chi flow; and a beneficent afterlife is enhanced when buried in conformity with chi directions. Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture, tai chi, and qigong exercise and herbal dietary supplements. Matthews has produced another tour de force that will repay close study by students, scientists, and all those concerned to understand science, culture, and the science-culture nexus. Harvey Siegel, Philosophy, University of Miami, USA. With great erudition and even greater fluidity of style, Matthews introduces us to this now world-wide belief system. Michael Ruse, Philosophy, Florida State University, USA. The book is one of the best research works published on Feng Shui. Wang Youjun, Philosophy, Shanghai Normal University, China. The history is fascinating. The analysis makes an important contribution to science literature. James Alcock, Psychology, York University, Canada. This book provides an in-depth study of Feng Shui in different periods, considering its philosophical, historical, and educational dimensions, especially from a perspective of the demarcation problem between science and pseudoscience. Yao Dazhi, Chinese Academy of Sciences, China.

**Science and Religion in India** Renny Thomas, 2021-12-30. This book provides an in-depth ethnographic study of science and religion in the context of South Asia, giving voice to Indian scientists and shedding valuable light on their engagement with religion. Drawing on biographical, autobiographical, historical, and ethnographic material, the volume focuses on scientists' religious life and practices and the variety of ways in which they express them. Renny Thomas challenges the idea that science and religion in India are naturally connected and argues that the discussion has to go beyond binary models of conflict and complementarity. By complicating the understanding of science and religion in India, the book engages with new ways of looking at these categories. *Religion, Supernaturalism, the Paranormal and Pseudoscience* Homayun Sidky, 2019-11-30. *Religion, Supernaturalism, the Paranormal and Pseudoscience* provides a comprehensive rejoinder to the challenges posed to science, scientific anthropology, evolutionary theory, and rationality by the advocates of supernatural, paranormal, and pseudoscientific perspectives and modes of thought associated with the current rise of irrationalism, anti-intellectualism, and emboldened religious fundamentalism and violence. Drawing upon H. Sidky's scientific anthropological background and ethnographic field research of supernatural and paranormal beliefs and practices in several cultures over three decades, the book answers several important questions: Why do humans have a proclivity for the supernatural and paranormal thinking? Why has humanity remained shackled to sets of ideas inherited from a violent past that have no basis in reality and which bestow an illusionary solace, promote bloodshed, endless cruelties, and fervent hatreds, and have come at a high cost? Why have ancient superstitions been held as sacred, inviolate truths while other aspects of the archaic belief systems of which they were a part have long been discarded? Why have not humans outgrown religion and paranormal beliefs?

**State Ideology, Science, and Pseudoscience in Russia** Baasanjav Terbish, 2022-02-25 This book recounts the entangled stories of three distinctly Russian movements state ideology Russian cosmism and Eurasianism from their inception at the end of the nineteenth century and beginning of the twentieth century until now Despite harboring pseudoscientific and mystical ideas specific to Russia all three movements were propagated by their followers as universal sciences and all three vied for scientific supremacy and universal acceptance Suppressed by the Bolsheviks and their state ideology as unscientific in the 1920s Russian cosmism and Eurasianism led an esoteric underground existence during the Soviet period and re emerged in the dying years of the Soviet Union seeking not only to reclaim their scientific status but also to potentially fill the perplexing vacuum left by the ensuing demise of Soviet state ideology This study relates the post Soviet search for a new state ideology or new National Idea at the federal and regional levels based on the Kremlin s projects and the case of the ethnic Republic of Kalmykia in south west Russia      Secularity and Non-Religion Elisabeth Arweck, Stephen Bullivant, Lois Lee, 2016-03-16 The present collection brings together a set of essays which shed light on recent research into non religion secularity and atheism topics which have been emerging as important areas of current research in a number of different disciplines The essays cover a wide span in terms of the various stances they discuss secular atheist non religious the settings in which these topics are relevant families wider society politics demography and the different perspectives which relate to socialisation and social relations belief acquisition discrimination Written by authors from a variety of national settings and academic disciplines the collection presents a range of methodologies combining theoretical approaches with quantitative and qualitative research findings The authors address issues related to an important academic field which had been neglected for some time but which has been made relevant by the increasing percentage of people professing a non religious stance This collection represents a major contribution to this area of academic research not only because it puts the themes of non religion and secularity firmly on the academic map but also because it offers a variety of different viewpoints and aims to bring clarity into the use of concepts and terminology The authors make important contributions to the emerging body of research in this area and point out areas where further research is needed The first essay provides a thorough introduction to this field taking stock of the work done so far highlighting the overarching issues and embedding the essays in the wider context of existing literature This book was originally published as a special issue of the Journal of Contemporary Religion      *Reconfigurations of Philosophy of Religion* Jim Kanaris, 2018-04-01 Explores the place and meaning of philosophy of religion in our current poststructuralist postsecular postcolonialist context This collection addresses as it exemplifies an identity crisis in contemporary philosophy of religion It represents a unique two way dialogue between philosophers of religion and scholars of religion and broaches issues pertaining to the philosophy of religion and the philosophical tradition on the one hand and religious studies theology and the modern academy on the other While each author manages the current challenges in philosophy of religion differently one can

nonetheless discern a polyphony of interests surrounding a postcritical postsecular appreciation of religion In part 1 contributors ask how philosophy of religion can accommodate both the strengths and weaknesses of Western analytic and continental traditions incorporate developments in ideology critique gender studies and Asian philosophies and negotiate the perceived stalemate in philosophy of religion Part 2 addresses these questions in terms of a philosophy of religion that is postcolonial in intention and multidisciplinary in orientation and features scholarship from the fields of both religion and theology An underlying theme is the importance of ushering philosophy of religion into a postphenomenological era of religious studies and theology This is a neglected dimension in many laudable discussions about philosophy of religion that this volume hopes to emend This gathering of important voices and the differences of approach and opinion that they represent invites provokes reflection self examination by philosophers of religion and further work Jeffrey Dudiak author of *The Intrigue of Ethics A Reading of the Idea of Discourse in the Thought of Emmanuel Levinas*      **Religion and the**

**Good Science, Bad Science, Pseudoscience, and Just Plain Bunk** Peter Daempfle, 2013 We are constantly bombarded with breaking scientific news in the media but we are almost never provided with enough information to assess the truth of these claims This book teaches readers how to think like a scientist to question claims like these more critically

**Teaching Evolution in a Creation Nation** Adam Laats, Harvey Siegel, 2016-03-03 No fight over what gets taught in American classrooms is more heated than the battle over humanity's origins. For more than a century we have argued about evolutionary theory and creationism and its successor theory intelligent design yet we seem no closer to a resolution than we were in Darwin's day. In this thoughtful examination of how we teach origins, historian Adam Laats and philosopher Harvey Siegel offer crucial new ways to think not just about the evolution debate but how science and religion can make peace in the classroom. Laats and Siegel agree with most scientists: creationism is flawed as science. But they argue students who believe it nevertheless need to be accommodated in public school science classes. Scientific or not, creationism maintains an important role in American history and culture as a point of religious dissent, a sustained form of protest that has weathered a century of broad and often dramatic social changes. At the same time, evolutionary theory has become a critical building block of modern knowledge. The key to accommodating both viewpoints, they show, is to disentangle belief from knowledge. A student does not need to believe in evolution in order to understand its tenets and evidence and in this way can be fully literate in modern scientific thought and still maintain contrary religious or cultural views. Altogether, Laats and Siegel offer the kind of level-headed analysis that is crucial to finding a way out of our culture war deadlock.

**Revolutionary Change and Democratic Religion** Celucien L. Joseph, 2020-04-15 In *Revolutionary Change and Democratic Religion*, Celucien Joseph provides a fresh and careful reexamination of Haiti's intellectual history by focusing on the ideas and writings of five prominent thinkers and public intellectuals: Toussaint Louverture, Joseph Antenor Firmin, Jacques Roumain, Dantes Bellegarde, and Jean Price Mars. The book articulates a twofold argument. First of all, Haiti has produced a strong intellectual tradition from the revolutionary era to the postcolonial present, and that Haitian thought is not homogeneous and monolithic. Joseph puts forth the idea that the general interweaving themes of rhetoric, the race concept, race vindication, universal emancipation, religious pluralism, secular humanism, the particular and the universal, and cosmopolitanism are representative of Haiti's intellectual tradition. Secondly, the book also contends that Haitian intellectuals have produced a religious discourse in the twentieth century that could be phrased as religious métissage. The religious ideas of these thinkers have been shaped by various forces: ideologies, religious traditions, and philosophical schools. In the same way, the religious experience of the Haitian people should be understood in terms of conflicting heterodox and pluralistic manifestations of religious piety, as the people in Haiti reacted to the crisis of slavery, Western colonialism and imperialism, and the arrogance of race in modernity in their striving to reposition themselves within the framework of universal and human metanarratives. The book departs from the dominant contemporary Vodou scholarship that is often characteristic of North American and Western studies on the religious life of the Haitian people and Haitian thinkers.

**Culture and Religion** Basil Pohlong, 2004 The book mainly discusses conceptual issues in relation to the central role that religion plays in culture.

[Confucianism as a World Religion](#) Anna Sun, 2013-04-21 Is Confucianism a religion? If so, why do most Chinese think it isn't? From ancient Confucian

temples to nineteenth century archives to the testimony of people interviewed by the author throughout China over a period of more than a decade this book traces the birth and growth of the idea of Confucianism as a world religion The book begins at Oxford in the late nineteenth century when Friedrich Max Müller and James Legge classified Confucianism as a world religion in the new discourse of world religions and the emerging discipline of comparative religion Anna Sun shows how that decisive moment continues to influence the understanding of Confucianism in the contemporary world not only in the West but also in China where the politics of Confucianism has become important to the present regime in a time of transition Contested histories of Confucianism are vital signs of social and political change Sun also examines the revival of Confucianism in contemporary China and the social significance of the ritual practice of Confucian temples While the Chinese government turns to Confucianism to justify its political agenda Confucian activists have started a movement to turn Confucianism into a religion Confucianism as a world religion might have begun as a scholarly construction but are we witnessing its transformation into a social and political reality With historical analysis extensive research and thoughtful reflection Confucianism as a World Religion will engage all those interested in religion and global politics at the beginning of the Chinese century **Good Science, Bad Science, Pseudoscience, and Just Plain Bunk** Peter A.
