Hawaii and Christian Religious Addiction James Slobodzien, 2004 A literature review was conducted on the relatively newly recognized phenomenon of religious addiction within Christianity The symptoms beliefs and stages of religious addiction along with the characteristics of religiously addictive organizations are also considered In addition a religious attitudes inventory was designed to assess general spirituality religious addictive beliefs religious addictive symptoms and church leadership practices The author surveyed ministers psychologists psychiatrists and the general public to assess the relationship between religious addiction and church leadership More specifically the purpose of this survey was to attempt to determine if religious addictive beliefs and symptoms are more positively correlated with churches structured upon a self selected authoritarian hierarchial style of leadership versus an elected collegial style of church leadership In the latter power and authority is equally vested in each of a number of elected church leaders The results of this survey suggest the possibility

of a positive correlation between the self selected minister group and their responses to religious addictive beliefs and symptoms Further study of a prospective nature with larger samples is necessary to define this relationship more clearly Additional research with onsite observation and assessments is necessary to adequately verify the possible link between religious addiction and church leadership practices Future research must replicate this study with different samples to determine whether results obtained in the present survey generalize to similar groups

[Ethics and Values in Psychotherapy](#) Alan Tjeltveit, 2003-09-02 Ethics and Values in Psychotherapy is an examination of the role of the therapist as ethicist and the ways in which the ethical convictions of both therapist and client contribute to the practical process of psychotherapy As Psychotherapy strives to establish itself as a Profession practitioners are increasingly focusing on the issue of ethics as they attempt to agree on guidelines and standards for professional practice Alan Tjeltveit argues that any discussion of

professional and ethical practice in psychotherapy is inadequate if carried out in ignorance of or in isolation from traditional ethical theories. He applies this approach to issues such as the role of therapy in society, the goals and outcomes of psychotherapy, techniques and practices, the existence and operation of values, the intellectual and social context in which therapy takes place. In the second part of the book, he uses clinical examples and case studies to relate this theoretical discussion to clinical practice. **Ethics and Values in Psychotherapy** will be welcomed by the growing number of experienced psychotherapists and post graduate students who are interested in the increasingly contentious issue of professional ethics.

Religion and Psychiatry Peter Verhagen, Herman M. Van Praag, Juan José Lopez-Ibor, John Cox, Driss Moussaoui, 2012-02-27 Religion and spirituality is very much alive and shapes the cultural values and aspirations of psychiatrist and patient alike, as does the choice of not identifying with a particular faith. Patients bring their beliefs and convictions into the doctor-patient relationship. The challenge for mental health professionals, whatever their own world view is, to develop and refine their vocabularies such that they truly understand what is communicated to them by their patients. Religion and Psychiatry provides psychiatrists with a framework for this understanding and highlights the importance of religion and spirituality in mental well-being. This book aims to inform and explain, as well as to be thought-provoking and even controversial. Patiently and thoroughly, the authors consider why and how, when and where religion and spirituality are at stake in the life of psychiatric patients. The interface between psychiatry and religion is explored at different levels, varying from daily clinical practice to conceptual fieldwork. The book covers phenomenology, epidemiology, research data, explanatory models, and theories. It also reviews the development of DSM-V and its awareness of the importance of religion and spirituality in mental health. What can religious traditions learn from each other to assist the patient? Religion and Psychiatry discusses this, as well as the neurological basis of religious experiences. It describes training programmes that successfully incorporate aspects of religion and demonstrates how different religious and spiritual traditions can be brought together to improve psychiatric training and daily practice. Describes the relationship of the main world religions with psychiatry. Considers training, policy, and service delivery. Provides powerful support for more effective partnerships between psychiatry and religion in day-to-day clinical care. This is the first
