Belief in God in an Age of Science John Polkinghorne, 1998-03-30 John Polkinghorne is a major figure in today's debates over the compatibility of science and religion Internationally known as both a theoretical physicist and a theologian the only ordained member of the Royal Society Polkinghorne brings unique qualifications to his inquiry into the possibilities of believing in God in an age of science In this thought provoking book the author focuses on the collegiality between science and theology contending that these intellectual cousins are both concerned with interpreted experience and with the quest for truth about reality He argues eloquently that scientific and theological inquiries are parallel The book begins with a discussion of what belief in God can mean in our times Polkinghorne explores a new natural theology and emphasizes the importance of moral and aesthetic experience and the human intuition of value and hope In other chapters he compares science's struggle to understand the nature of light with Christian theology's struggle to understand the nature of Christ He addresses the question Does God act in the physical world And he extends his ideas about the role of chaos theory surveys the prospects for future dialogue between scientific and theological thinkers and defends a critical realist understanding of the activities of both disciplines Polkinghorne concludes with a consideration of the nature of mathematical truths and the links between the complementary realities of physical and mental experience

God in the Age of Science? Herman Philipse, 2012-02-23 *God in the Age of Science* is a critical examination of strategies for the philosophical defence of religious belief The main options may be presented as the end nodes of a decision tree for religious believers The faithful can interpret a creedal statement e.g. God exists either as a truth claim or otherwise If it is a truth claim they can either be warranted to endorse it without evidence or not Finally if evidence is needed should its evidential support be assessed by the same logical criteria that we use in evaluating evidence in science or not Each of these options has been defended by prominent analytic philosophers of religion In part I Herman Philipse assesses these options and argues that the most promising for believers who want to be justified in accepting their creed in our scientific age is the Bayesian cumulative case strategy developed by Richard Swinburne Parts II and III are devoted to an in depth analysis of this case for theism Using a strategy of subsidiary arguments Philipse concludes 1 that theism cannot be stated meaningfully 2 that if theism were meaningful it would have no predictive power concerning existing evidence so that Bayesian arguments cannot get started and 3 that if the Bayesian

cumulative case strategy did work one should conclude that atheism is more probable than theism Philipse provides a careful rigorous and original critique of theism in the world today The Spiritual Crisis of the Scientific Age G. D.

Yarnold,2024-11-15 First published in 1959 the original blurb reads No good purpose is served today by treating the relationship between Christianity and the natural sciences as a conflict even as a conflict to be resolved The modern world is passing through a crisis of far reaching proportions which is the direct consequence of its inability to assimilate new scientific knowledge and to direct rightly the new technical skills The crisis which is essentially spiritual in character is examined in its three principal aspects Accordingly the first part of the book deals with our understanding of the order of nature the second with some of the central doctrines of the Christian faith and the final section with the pressing ethical and moral problems of the industrial and nuclear age Today it can be read and enjoyed in its historical context This book is a re issue originally published in 1959 The language used and views portrayed are a reflection of its era and no offence is meant by the Publishers to any reader by this re publication *William James and a Science of Religions* Wayne

Proudfoot,2004-08-04 The science of religion is an important element in the interpretation of William James s work and in the methodology of the study of religion An authority on pragmatism and the philosophy of religion Wayne Proudfoot and a stellar group of contributors from a variety of disciplines including religion philosophy psychology and history bring innovative perspectives to James s work Each contributor focuses on a specific theme in The Varieties of Religious Experience and suggests how James s treatment of that theme can fruitfully be brought to bear sometimes with revisions or extensions on current debate about religious experience A Brief Guide to Beliefs Linda Edwards,2001-01-01 Coves the

major faiths including alternative movements neo paganism and New Age offering a comprehensive introduction to each that covers contemporary issues regarding God and the supernatural Original Star Trek and Faith, Volume 1 Mark S.

Hansard,2025-07-29 From The Original Series of the 1960s to Strange New Worlds today Star Trek has always explored philosophical and religious ideas pushing the boundaries of thought and entertaining us along the way While full of secular concepts the franchise has interacted with Christian beliefs for decades In Star Trek and Faith Mark S Hansard examines the intersection of Star Trek and Christianity utilizing logic and critical thinking to investigate the ideas in both new and old Trek series to compare them with a Christian worldview Is Christianity manipulative Is God capricious angry and insecure Is it rational to believe in the resurrection of Jesus Does predestination contradict our free will Join Hansard in a thrilling ride through the galaxy exploring Christian ideas through the lens of Star Trek **God Revised** Galen Guengerich,2013-05-28

Over the past few decades the ever expanding scientific knowledge of the universe and the human condition combined with the evolution from religion based to personal morality has led to a mass crisis of faith Leaders of most Protestant and Catholic religious traditions which include nearly 80 percent of Americans have watched their memberships stagnate or dwindle Over the years philosophers and scientists have argued that science has in fact killed God and that if we believe the

facts science has presented we must also accept that God is fiction Others holding fast to their long standing doctrines attempt to justify their beliefs by using God to explain gaps in scientific knowledge Having left an upbringing in a family of Mennonite preachers to discover his own experience of God Galen Guengerich understands the modern American struggle to combine modern world views with outdated religious dogma Drawing upon his own experiences he proposes that just as humanity has had to evolve its conception of the universe to coincide with new scientific discoveries we are long overdue in evolving our concept of God Gone are the days of the magical supernatural deity in the sky who visits wrath upon those who have not followed his word Especially in a scientific age we need an experience of a God we can believe in an experience that grounds our morality unites us in community and engages us with a world that still holds more mystery than answers

Truth and Religious Belief Curtis L. Hancock, Brendan Sweetman, Randolph Feezell, 2016-09-16 This book contains a thorough and balanced series of dialogues introducing key topics in philosophy of religion such as the existence and nature of God the problem of evil religious pluralism the nature of religious experience immortality and the meaning of life A realistic cast of characters in a natural setting engages in a series of thought provoking conversations the dialogue format of these conversations captures typical student attitudes and questions concerning religious belief allows comparison of important themes throughout the dialogues encourages the interjection of insights observations questions and objections and introduces related points when they would naturally arise instead of relegating them to a later chapter As well as presenting a detailed and probing discussion each dialogue includes a list of key terms a set of study questions and a bibliography all of which make this an excellent text for courses in philosophy of religion and introductory philosophy classes

The Big Questions in Science and Religion Keith Ward, 2008-05 Can religious beliefs survive in the scientific age Are they resoundingly outdated Or is there something in them of great importance even if the way they are expressed will have to change given new scientific context These questions are among those at the core of the science religion dialogue An Anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge He identifies ten basic questions about the nature of the universe and human life Among these are Does the universe have a goal or purpose Do the laws of nature exclude miracles Can science provide a wholly naturalistic explanation for moral and religious beliefs Has science made belief in God obsolete Are there any good science based arguments for God Ward considers concepts from Buddhism Confucianism Taoism Islam Hinduism Judaism and Christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers

Reluctant Modernism George Cotkin, 2004-09-15 In the last two decades of the nineteenth century Americans were faced with the challenges and uncertainties of a new era The comfortable Victorian values of continuity progress and order clashed with the unsettling modern notions of constant change relative truth and chaos Attempting to embrace the intellectual challenges of modernism American thinkers of the day were yet reluctant to welcome the wholesale rejection of the past and destruction of

traditional values In *Reluctant Modernism American Thought and Culture 1880 1900* George Cotkin surveys the intellectual life of this crucial transitional period His story begins with the Darwinian controversies since the mainstream of American culture was just beginning to come to grips with the implications of the *Origins of Species* published in 1859 Cotkin demonstrates the effects of this shift in thinking on philosophy anthropology and the newly developing field of psychology Drawing on his extensive knowledge of these fields he explains clearly and concisely the essential tenets of such major thinkers and writers as William James Franz Boas Charlotte Perkins Gilman Henry Adams and Kate Chopin Throughout this fascinating readable history of the American fin de siècle run the contrasting themes of continuity and change faith and rationalism despair over the meaninglessness of life and ultimately a guarded optimism about the future **Serious Talk** John Polkinghorne, 1995-04-01 Polkinghorne argues that the habits of thought that are natural to the scientist are the same habits of thought that can be followed also in the search for a wider and deeper kind of truth about the world The Modern Predicament Paton, H J, 2014-04-04 First published in 2002 Routledge is an imprint of Taylor Francis an informa company **Religious Beliefs, Evolutionary Psychiatry, and Mental Health in America** Kevin J. Flannelly, 2017-04-08 This book provides a new perspective on the association between religious beliefs and mental health The book is divided into five parts the first of which traces the development of theories of organic evolution in the cultural and religious context before Charles Darwin Part II describes the major evolutionary theories that Darwin proposed in his three books on evolution and the religious sociological and scientific reactions to his theories Part III introduces the reader to the concept of evolutionary psychiatry It discusses how different regions of the brain evolved over time and explains that certain brain regions evolved to protect us from danger by assessing threats of harm in the environment including other humans Specifically this part describes how psychiatric symptoms that are commonly experienced by normal individuals during their everyday lives are the product of brain mechanisms that evolved to protect us from harm the prevalence rate of psychiatric symptoms in the U S general population how religious and other beliefs influence the brain mechanisms that underlie psychiatric symptoms and the brain regions that are involved in different psychiatric disorders Part IV presents the findings of U S studies demonstrating that positive beliefs about God and life after death and belief in meaning in life and divine forgiveness have salutary associations with mental health whereas negative beliefs about God and life after death belief in the Devil and human evil and doubts about one's religious beliefs have pernicious associations with mental health The last part of the book summarizes each section and recommends research on the brain mechanism underlying psychiatric symptoms and the relationships among these brain mechanisms religious beliefs and mental health in the context of ETAS Theory The Conflict of the Ages Teacher Edition I The Scientific History of Origins Michael J. Findley, Mary C. Findley, Teacher Edition includes complete student text review questions vocabulary and answer keys The Conflict of the Ages is a Multi Part exploration of History Science and ancient Literature This first installment covers the concepts of God time

Creation physics cosmology and specifics about each day of Creation We make comparisons with ancient sources to see where they agree with the Scriptural account We reference classic and modern scientific views exposing errors preconceptions presuppositions and falsehoods taught as fact by the mainstream scientific community God is the first witness and the Bible the first eyewitness account of beginnings and origins Other ancient documents contain at least some truths and parallel accounts

Aldous Huxley and the Mysticism of Science J. Deery, 1996-07-05 Can religious belief survive in a scientific era Aldous Huxley thought so His early recognition of the profound significance of twentieth century science and the need for moral and spiritual direction resulted in his espousal of mysticism An examination of his fiction and nonfiction reveals Huxley s significance for cross disciplinary debates between religion science and literature and provides examples of the transmission or refraction of knowledge from one discourse to another
