Religious Inventions Four Essays:

Religious Inventions Max Charlesworth, 2010-08-04 Many scholars assume that all genuine religions are basically similar and that it is possible to define the sphere of religion in terms of the sacred In his latest book Max Charlesworth argues that we must take the diversity of religions as a primary fact Any religion is an active response to a revelation of the divine and human beings receive these revelations interpret them and develop them in a variety of ways Charlesworth illustrates his thesis with examples ranging from Australian Aboriginal religion to twentieth century Roman Catholicism

[Regional, Critical, and Historical Approaches](#) Peter

Antes, Armin W. Geertz, Randi R. Warne, 2008-12-19 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies. The work follows in the footsteps of two former publications: Classical Approaches to the Study of Religion edited by Jacques Waardenburg 1973 and Contemporary Approaches to the Study of Religion edited by Frank Whaling 1984. 85 New Approaches to the Study of Religion completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades. Many of the chapters however are also pathbreaking and point the way to future approaches. Religion and Change in Australia Adam Possamai, David Tittensor, 2022-03-30 This timely book offers a panoramic overview of the enduring significance of religion in modern Australian society. Applying sociological perspectives and contemporary theories of religion in society, it challenges conventional assumptions around the extent of secularisation in Australia and instead argues that religious institutions, groups and individuals have proved remarkably adaptable to social change and continue to play a major role in Australian life. In doing so, it explores how religion intersects with a wide range of other contemporary issues including politics, race, migration, gender and new media. Religion and Change in Australia explores Australia's unique history regarding religion. Christianity was originally imported as a tool of social control to keep convicts, settlers and Australian Aboriginal peoples in check. This had a profound impact on the social memory of the nation and lingering resentment towards the excessive presence of religion continues to be felt today. Freedom of religion was enshrined in Section 116 of the Australian Constitution in 1901. Nevertheless, the White Australia Policy effectively prevented adherents of non-Christian faiths from migrating to Australia and the nation remained overwhelmingly Christian. However, after WWII, Australia, in common with other western societies, appears to have become increasingly secularised as religious observance declined dramatically. However, Religion and Change in Australia employs a range of social theories to challenge this secularist view and argues that Australia is a post-secular society. The 2016 census revealed that over half of the population still identify as Christian. In politics, the socially conservative religious right has come to exert considerable influence on the ruling Liberal National Coalition, particularly under John Howard and Scott Morrison. New technologies such as the Internet and social media have provided new avenues for religious expression and proselytisation, whilst so-called megachurches have been built to cater to their increasing congregations. The adoption of multiculturalism and increased immigration from Asia has led to a religiously pluralist society, though this has often been controversial. In particular, the position of Islam in Australia has been the subject of fierce debate and Islamophobic attitudes remain common. Atheism, non-belief and alternative spiritualities have also become increasingly widespread, especially amongst the young. Religion and Change in Australia analyses these developments to offer new perspectives on religion and its continued relevance within Australian society. This book is therefore a vital resource for students, academics and general readers seeking to understand contemporary debates surrounding religion and secularisation in Australia. **Clashes of Knowledge** Peter

Meusburger, Michael Welker, Edgar Wunder, 2008-04-15 Do traditional distinctions between belief and knowledge still make sense How are differences between knowledge and belief understood in different cultural contexts This book explores conflicts between various types of knowledge especially between orthodox and heterodox knowledge systems ranging from religious fundamentalism to heresies within the scientific community itself Beyond addressing many fields in the academy the book discusses learned individuals interested in the often puzzling spatial and cultural disparities of knowledge and clashes of knowledge

Inventing Catholic Tradition Terrence W. Tilley, 2011-06-07 This creative argument that traditions are neither found nor made but are invented and reinvented in practice is carried out in dialogue with scholars such as Yves Congar and George Lindbeck Tilley examines the actual practices as the bearers of tradition and argues that vibrant and meaningful traditions must be reinvented or reconstructed in every generation He demonstrates how deliberately invented or imposed traditions are often resisted Tilley applies his analysis to the Catholic Intellectual Tradition and in the last chapter shows how truth revelation and authority can be accommodated by a constructivist practical theology of tradition

New Approaches to the Study of Religion: Regional, critical, and historical approaches Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications Classical Approaches to the Study of Religion edited by Jacques Waardenburg 1973 and Contemporary Approaches to the Study of Religion edited by Frank Whaling 1984 85 New Approaches to the Study of Religion completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future approaches

Aboriginal Religions in Australia Françoise Dussart, Howard Morphy, 2017-09-08 Over the last 25 years there has been an explosion of interest in the Aboriginal religions of Australia and this anthology provides a variety of recent writings by a wide range of scholars Australian Aboriginal Religions are probably the oldest extant religious systems Over some 50 000 years they have coped with change and re-invented themselves in an astonishingly creative way The Dreaming the mythical time when the Ancestor Spirits shaped the territories of the Aborigines and laid down a moral and ritual law for their occupants is the fundamental religious reality It is the basis of the Aborigines s view of their land or country kinship relationships ritual and

art However the Dreaming is not a static principle since it is interpreted in different ways as in the extraordinary movement in contemporary indigenous painting and in attempts at an accommodation with Christianity The contributions of anthropologists cultural historians philosophers of religion and others are included in this anthology which not only guides readers through the literature but also ensures this still largely inaccessible material is available to a wider range of readers and non specialist students and academics
