**Material Culture and Asian Religions** Benjamin Fleming, Richard Mann, 2014-03-26 Traditionally research on the history of Asian religions has been marked by a bias for literary evidence privileging canonical texts penned in classical languages Not only has a focus on literary evidence shaped the dominant narratives about the religious histories of Asia in both scholarship and popular culture but it has contributed to the tendency to study different religious traditions in relative isolation from one another Today moreover historical work is often based on modern textual editions and increasingly on electronic databases What may be lost in the process is the visceral sense of the text as artifact as a material object that formed part of a broader material culture in which the boundaries between religious traditions were sometimes more fluid than canonical literature might suggest This volume brings together specialists in a variety of Asian cultures to discuss the methodological challenges involved in integrating material evidence for the reconstruction of the religious histories of South Southeast Central and East Asia By means of specific test cases the volume explores the importance of considering material and literary evidence in concert What untold stories do these sources help us to recover How might they push us to reevaluate historical narratives traditionally told from literary sources By addressing these questions from the perspectives of different subfields and religious traditions contributors map out the challenges involved in interpreting different types of data assessing the problems of interpretation distinct to specific types of material evidence e g coins temple art manuscripts donative inscriptions and considering the

issues raised by the different patterns in the preservation of such evidence in different locales Special attention is paid to newly discovered and neglected sources to our evidence for trade migration and inter regional cultural exchange and to geographical locales that served as contact zones connecting cultures In addition the chapters in this volume represent the rich range of religious traditions across Asia including Hinduism Buddhism Taoism Shinto and Chinese religions as well as Islam and eastern Christianities

**A History of Lost Knowledge in Sanskrit**

**Literature** Henry Romano, The discovery of Sanskrit literature at the end of the eighteenth century was the most significant cultural event since the Renaissance The Greeks became acquainted with the Indians after Alexander s invasion the Arabs brought Indian science to the West during the Middle Ages some European missionaries from the sixteenth century on gained some familiarity with the ancient language of India and Abraham Roger translated the Sanskrit poet Bhartihari into Dutch in 1651 However it is only now that this highly advanced knowledge is being revealed The existence of Sanskrit literature was only vaguely known in Europe about two hundred years ago expressed in stories about Indian wisdom In ancient times our modern age has discovered tales of Vimanas flying aircraft their poems preserve glacial rivers from the Ice Age Our Indian possessions gave us the first impetus to study Sanskrit Warren Hastings Governor General seeing the advantages of ruling the Hindus according to their laws and customs commissioned several Brahmins to prepare a digest based on the best ancient Indian legal authorities Early in 1776 a Persian translation of this Sanskrit compilation was published in English The introduction provided reliable information about the ancient Indian language literature and

specimens of the Sanskrit script With this era s technology a limited understanding of Vedic civilization s advanced knowledge was possible Throughout the last 200 years we have had revelation after revelation of the advanced Vedic civilization that once existed and we are missing an essential episode in the history of humanity Nevertheless Charles Wilkins took the first steps toward introducing others to actual Sanskrit writings Having acquired knowledge of Sanskrit at Benares at the behest of Warren Hastings he translated in 1785 the Bhagavad gita or The Song of the Adorable One and published two years later Hitopade a or Friendly Advice a collection of fables Ancient India and the Vedic Gods Henry Romano, DTTV Publications, These four Vedas comprise a highly developed religious system the Rig Sama Atharva and Yajur Vedas Through the worship of the demigods or the Vedic gods these Vedas were primarily intended to encourage the satisfaction of material desires Thus the Vedas clearly explain how to perform the required worship and sacrifices or rituals to these devas demigods to receive the blessings required to increase one s power and position or reach the heavens in the future or for other purposes The point is that the devas participate and affect all universal management and activities including the weather or who is blessed with certain opulence such as riches beautiful spouses large families good health etc A person could worship Agni to gain power Durgadevi to obtain good fortune Indra to have a healthy sexual life or Vasus to earn money Karma kanda is the section of the Vedas that many consider the most essential part of Vedic teachings Thus people will be able to live a good life and enjoy a decent existence Of course various actions or karmas are motivated by our aspirations to achieve specific results Several sections in the Vedas deal with Karma Kanda Although this is not the complete understanding of the karma kanda segment which provides rituals for purifying our minds and actions in pursuit of our desires and not limiting ourselves to only acquiring everything that one needs from the demigods One s habits and thoughts become purified when one has faith and steadiness in the performance of the ritual As one becomes pure and free of those desires one gradually acquires one s needs and assuages one s desires When we purify our consciousness we can achieve a higher level of spiritual activity The karma kanda rituals had this higher purpose Unless one recognizes this one misses the point and remains attached to ways to satisfy material desires which will keep one in earthly existence *The Evolution of Religions* Lance Grande, 2024-02-13 Thousands of religions have adherents today and countless more have existed throughout history What accounts for this astonishing diversity This extraordinarily ambitious and comprehensive book demonstrates how evolutionary systematics and philosophy can yield new insight into the development of organized religion Lance Grande a leading evolutionary systematist examines the growth and diversification of hundreds of religions over time highlighting their historical interrelationships Combining evolutionary theory with a wealth of cultural records he explores the formation extinction and diversification of different world religions including the many branches of Asian cyclicism polytheism and monotheism Grande deploys an illuminating graphic system of evolutionary trees to illustrate historical interrelationships among the world s major religious traditions rejecting colonialist and hierarchical ladder of progress views

of evolution Extensive and informative illustrations clearly and vividly indicate complex historical developments and help readers grasp the breadth of interconnections across eras and cultures The Evolution of Religions marshals compelling evidence starting far back in time that all major belief systems are related despite the many conflicts that have taken place among them By emphasizing these broad historical interconnections this book promotes the need for greater tolerance and deeper unbiased understanding of cultural diversity Such traits may be necessary for the future survival of humanity

Decoding the Vedic System of Knowledge Henry Romano, One of the oldest libraries of texts in India is the Vedas Vedic texts are painstakingly corrected by the teacher Instructors and students still teach them orally today Virtual classrooms have allowed females to learn the Vedas and how they were changed through technology Samaveda has a much more intricate connection with Rigveda than the other Vedas Because all its verses except seventy five are directly drawn from the Rigveda it holds great historical significance The eighth and especially the ninth of the Soma book provide the bulk of its content It is similar to the Yajurveda in having been composed only for ritual use since the verses are all intended for chanting during the offering ceremonies Unlike those in the Rigveda these stanzas appear in the Sama Veda as if they were to be spoken or recited Their significance is solely determined by their relevance to particular rites removed from their context in the Rigveda The Vedas have been the subject of voluminous literature over the centuries written in many languages including English Due to their symbolic language the Vedas remain elusive Despite exploring every ancient Indian sourcebook Shankara Ramanuja and Madhva did not write full commentaries on the Vedas Vedas are enigmatic and ethereal and this adds to their mystery In contrast to the voluminous commentary on Upanishads Bhagawad Gita Brahma sutras and Mahapuranas Sri Madhva wrote a short Rigbhyasya Sayana Madhava also known as Sayanacharya is the most common source of information on the Vedas Vedic texts are covered in complete detail in this voluminous work basically a literal translation of the Vedas Those who criticize it point out that it ignores the Vedas symbolism and the Vedic tenets hidden meanings It is for this reason that the Vedas remain inadequately illuminated In addition Vedic Sanskrit differs from classical Sanskrit a currently taught written and spoken language A widespread family of languages the proto Indo European languages is derived from it

*The Rise of Civilizations Concerning Vedic Knowledge* Henry Romano, Between 3300 and 2900 BC archaeologists believe that civilization the rise of Sumeria the Indus Valley Civilization and Egypt marked the beginning of complex cities The Neolithic Revolution when agriculture animal domestication pottery and the plow came together seems not to hold together as we explored in the final chapter of descending Treta Yuga There had already been millennia of critical discoveries and developments Why then the abrupt shift to city living stratified societies and overproduction of food and other goods for trade or export Archaeologists believe that man could finally do these things that he was using recent inventions to an additional advantage Our study of the yugas tells us that man suddenly wanted to do these things that he was using innovations known for millennia in new ways to suit his new motivation Several large cities

existed before descending Dwapara Yuga but a new breed of city sprang up with Dwapara Yuga These were larger and more complex and built around commerce Many had shared granaries artisans districts and marketplaces and were typically made on trade routes along rivers and coasts We also see these cities first significant division of labor and societal stratification Artisans scribes and traders all became increasingly common occupations Furthermore there was of course the tax collector As a result governments began levying taxes on commerce as they had already levied tariffs on agriculture Sumeria and the city of Eridu are credited with being the first of the trend Urdu is believed to have risen along the banks of the Euphrates River around 3300 BC The famous city of Ur and dozens of others sprang up in the Tigris and Euphrates Valleys over the next 300 400 years and Babylon was not far behind **The Far East and Australasia 2003** Europa Publications,2002 A unique survey of each country in the region It includes an extensive collection of facts statistics analysis and directory information in one accessible volume Introducing World Religions Charles E.
