Dilemmas of Internationalism Dr Andrew Johnstone,2013-06-28 Dilemmas of Internationalism is a new political history of the 1940s which charts and analyses the efforts of private internationalists to define US internationalism and promote the establishment of the United Nations Internationalists hoped that the United States would shake off the fear of entangling alliances that had characterised the nation s history replacing isolationism and unilateralism with a new involved and multilateral approach to foreign affairs During and after World War II a number of private individuals and organisations were at the forefront of the fight to change the nature of US foreign policy This book focuses in particular on the most important internationalist organisation the American Association for the United Nations AAUN known as the League of Nations Association through 1944 It situates the AAUN in the vast network of private organisations promoting an internationalist foreign policy during and after World War II and analyses the connections between the AAUN and the US government and key public figures who proposed a more internationalist foreign policy One of the most innovative aspects of Dilemmas of Internationalism is its focus on state private interaction with regard to defining internationalism Most previous works on wartime internationalism neglect considerations of state private interaction or fail to significantly develop them The study also acts as a corrective to the general neglect of state private interaction during this period turning attention away from the common focus on the Cold War to the crucial phase during and immediately after World War II Beginning with the US entry into the War this study continues through the onset of the Cold War to early 1948 ending with the passing of the Marshall Plan By 1948 the path of US internationalism appeared firmly fixed by a Cold War

framework but in 1941 US entry into the Second World War offered the opportunity to develop a more multilateral approach to foreign affairs and create a more just and peaceful world This book is a much needed history of the attempt to seize that opportunity

The State and Religious Minorities in Sweden Linnea Lundgren,2023-10-24 This book a revised version of Lundgren s PhD thesis offers a deepened understanding of the changes in the governance of religious diversity and the complex relationship between state and religion Linnea Lundgren explores how the narrative of risk and resource came to be by looking beyond the developments in the last few decades particularly since 9 11 and analysing how the governance of religious diversity has developed over time In particular she focuses on the case of Sweden that is often regarded as one of

the most secular countries in the world while simultaneously being recognised as one of the most multi religious countries in Europe due to a rise in immigration This book reveals how the state has had a central role in setting the terms and conditions that both enable and limit what religious communities can do thus shaping the function and role of religion in the public realm Through the analysis of an extensive number of government documents over a period of seventy years 1952-2022 Lundgren challenges the idea that many of the recent controversies concerning religious diversity are new She argues that many of the discussions held today regarding the accommodation of Muslims are decidedly similar to previous discussions regarding the management of Catholics and the Free Churches in the 1950s and 1960s She shows that the underlying fear has remained the same that the individual's rights can become weakened or diminished in religious communities and that religious minorities will challenge the common shared values of the society In light of this Lundgren concludes that in order to understand what is really at stake in the debate regarding religious diversity in Sweden today there is a need to look at underlying tensions that exist between the state civil society and the individual a relationship that differs considerably in the Nordic context compared to other contexts This text appeals to students and researchers working in the sociology of religion and people who work with governance of religion religion and civil society and religion and law in Europe

Under threat: The challenges facing religious minorities in Bangladesh, 2016-11-17 Since 2013 Bangladesh has experienced a series of violent attacks by extremists The victims have included besides atheists secular bloggers liberals and foreigners many Buddhists Christians and Hindus as well as Ahmadis and Shi'a Muslims A large number of the attacks targeting religious minorities in particular have subsequently been

claimed by the organization Islamic State IS a claim vigorously denied by the Bangladeshi government which has attributed the attacks to domestic militant groups Regardless of their authorship since the beginning of this new outbreak of violence the authorities have visibly failed to ensure the protection of those targeted For religious minorities who have borne much of the brunt of these attacks this violence is the latest chapter in a long history of discrimination and segregation that stretches back to the country s independence and the legacy of colonialism the 1947 Partition and the bloody civil war in 1971 during which the Hindu population in particular was targeted This briefing drawing on a detailed review of published sources fieldwork by local rapporteurs and first hand author interviews with a number of activists lawyers and journalists aims to provide a fuller picture of the complex challenges facing these communities and the need for a society wide solution to the insecurity that has convulsed the country in the last few years **In Search of Eurocommunism** Richard

major changes within the SBC and also resulted in the formation of several new Baptist groups. Discussions of the schism academic and otherwise generally ignore the church's clergywomen for the roles they played and the contributions they made to the fracturing of the largest Protestant group in the United States. Ordained women are typically treated as a contentious issue between the parties. Only recently are scholars beginning to take seriously these women's contributions and interpretations as active participants in the struggle. *Anatomy of a Schism* is the first book on the Southern Baptist split to place ordained women's narratives at the center of interpretation. Author Eileen Campbell Reed brings her unique perspective as a pastoral theologian in conducting qualitative interviews with five Baptist clergywomen and allowing their narratives to focus attention on both psychological and theological issues of the split. The stories she uncovers offer a compelling new structure for understanding the path of Southern Baptists at the close of the twentieth century. The narratives of Anna, Martha, Joanna, Rebecca, and Chloe reframe the story of Southern Baptists and reinterpret the rupture and realignment in broad and significant ways. Together they offer an understanding of the schism from three interdisciplinary perspectives: gendered, psychological, and theological, not previously available together. In conversation with other historical events and documents, the women's narratives collaborate to provide specific perspectives with universal implications for understanding changes in Baptist life over the last four decades. The schism's outcomes held profound consequences for Baptist individuals and communities. *Anatomy of Schism* is an illuminating ethnographic and qualitative study sure to be indispensable to scholars of theology, history, and women's studies alike. EILEEN R. CAMPBELL REED is associate professor of practical theology at Central Baptist Theological Seminary in Nashville, Tennessee, and codirector of the Learning Pastoral Imagination Project, a longitudinal study of ministry. She is the author of *Being Baptist: A Resource for Individual and Group Study* and numerous articles about women in ministry.
