Religious Ideas and Institutions Edmond Joseph Keller, Ruth Iyob, 2012 In the latest phase of political transitions in Africa analysts rarely consider the relationship between religion and politics This book addresses this need arguing that for democracy to be consolidated political leaders must make the right institutional choices choices that structure the incentives of their constituents as well as their own away from antagonistic forms of politics or religious extremism What impact do African contemporary religious organizations and elites have on their societies in terms of intergroup reciprocity and political bargaining The primary objective of this volume is to analyze how such organizations respond to the political signs and gestures of other groups in a like minded manner and the nature and effects of their negotiations with the State and other interests over contested matters The book s contributors

hypothesize that Africa's religious organizations can prove critical in the way their elites make demands on the State and in the way they help to shape the structure of intergroup relations in constructive or destructive directions. The authors consider the roles of both secular and religious elites and institutions in creating a political climate that enables elites to consolidate democracy. *The Law and Religious Market Theory* Jianlin Chen, 2017-10-12. With comparative case studies from China, Taiwan, and Hong Kong, Jianlin Chen's new work offers a fresh descriptive and normative perspective on law and religion. This presentation of the original law and religious market theory employs an interdisciplinary approach that sheds light on this subject for scholars in legal and sociological disciplines. It sets out the precise nature of religious competition envisaged by the current legal regimes in the three jurisdictions and analyses how certain restrictions on religious practices may facilitate normatively desirable market dynamics. This updated and invaluable resource provides a new and insightful investigation into this fascinating area of law and religion in Greater China today. *Africa's Social Cleavages and Democratization* Douglas Kimemia, 2015-12-17. Africa's Social Cleavages and Democratization offers a comparative approach to African countries by providing an in-depth analysis of the impact of ethnicity and religion on both multiparty and post-multiparty eras. By applying different theoretical frameworks, Douglas Kimemia explores and analyzes how social cleavages have affected the growth of democracy in Africa. It is crucial to assess the relationship between democratic development and the impact of social cleavages because multiparty politics have increased political competition, participation, transparency, and civic engagement in Africa. However, social divisions have significantly slowed the maturing of democracy as these social cleavages have become polarizing factors which are used by political elites for their own self-interest. As a result, politics of identity caused by competition of natural resources have led to increased conflicts and political instability in Africa. The social cleavages have also led to polarized party systems and caused adverse effects on democracy due to the highly polarized societies and political competition. Despite the many positive impacts, multiparty politics have increased the consciousness of ethnic and religious identities leading to unhealthy political competition as evidenced by highly fragmented societies prone to conflicts and violence. Kimemia comprehensively examines different governing electoral and party systems in order to determine the different incentives and how social divisions shape them. This analysis helps to distinguish more permanent political structures from the merely epiphenomenal within the African political scene. **Religiously Oriented Parties and Democratization** Luca Ozzano, Francesco Cavatorta, 2014-04-03. To the surprise of both academics and policy makers, religion has not been relegated entirely to the private sphere; quite the contrary. Over the last few decades, religion has begun to play a significant role in public affairs and in many cases directly in political systems. This edited volume analyses in detail how religion and religious precepts inform the ideology, strategies, and electoral behaviour of political parties. Working with an original and innovative typology of religiously oriented political parties, the book examines cases from different regions of the world and different religious traditions to highlight the significance of religion for party politics. This interest for

religiously oriented parties is combined with an interest in processes of democratic change and democratic consolidation. Political parties are central to the success of processes of democratization while religion is seen in many circles as an element that prevents such success because it is perceived to be a polarising factor detrimental to the consensus necessary to build a liberal democratic system. Through the different case studies presented here a much more complex picture emerges where religiously oriented political parties perform very different and often contradicting roles with respect to democratic change. This book was published as a special issue of *Democratization*.

Religion, Democracy and Democratization John Anderson, 2013-09-13 A new exploration of the troubled relationship between religion and democracy focusing in on two key questions how has religion engaged with the democratization processes that have taken place over the last thirty years how can it contribute towards democracy in the future. These questions are tackled with clarity and rigour. The Role of Civil Society in Africa's Quest for Democratization Abadir M. Ibrahim, 2016-12-08 This book tests many of the assumptions hypotheses and conclusions connected with the presumed role of civil society organizations in the democratization of African countries. Taking a comparative approach it looks at countries that have successfully democratized those that are stuck between progress and regression those that have regressed into dictatorship and those that are currently in transitional flux and evaluates what role if any civil society has played in each instance. The countries discussed South Africa Ghana Nigeria Ethiopia Egypt and Tunisia represent a diverse set of social and political circumstances and different levels of democratic achievement providing a rich set of case studies. Each sample state also offers an internal comparison as each has historically experienced different stages of democratization. Along the course of each case study the book also considers the effect that other traditionally studied factors such as culture colonization economic development and foreign aid may have had on
