Remaking The American University Market Smart And Mission Centered:

Remaking the American University Robert Zemsky, Gregory R. Wegner, William F. Massy, 2005 At one time universities educated new generations and were a source of social change Today colleges and universities are less places of public purpose than agencies of personal advantage *Remaking the American University* provides a penetrating analysis of the ways market forces have shaped and distorted the behaviors purposes and ultimately the missions of universities and colleges over the past half century The authors describe how a competitive preoccupation with rankings and markets published by the media spawned an admissions arms race that drains institutional resources and energies Equally revealing are the depictions of the ways faculty distance themselves from their universities with the resulting increase in the number of administrators which contributes substantially to institutional costs Other chapters focus on the impact of intercollegiate athletics on educational mission even among selective institutions on the unforeseen result of higher education s outsourcing a substantial share of the scholarly publication function to for profit interests and on the potentially dire consequences of today s zealous investments in e learning A central question extends through this series of explorations Can universities and colleges today still choose to be places of public purpose In the answers they provide both sobering and enlightening the authors underscore a consistent and powerful lesson academic institutions cannot ignore the workings of the markets The challenge ahead is to learn how to better use those markets to achieve public purposes

The SAGE Encyclopedia of Quality and the Service Economy Su Mi Dahlggaard-Park, 2015-05-29 Society globally has entered into what might be called the service economy Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries Services permeate all aspects of peoples lives and are becoming inseparable from most aspects of economic activity Quality management has been a dominating managerial practice since World War II With quality management initially associated with manufacturing industries one might assume the relevance of quality management might decrease with the emergence of the service economy To the contrary the emergence of the service economy strengthened the importance of quality issues which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors as well Today we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment Thus quality and services have emerged in parallel as closely interrelated fields The Encyclopedia of Quality and the Service Economy explores such relevant questions as What are the characteristics nature and definitions of quality and services How do we define quality of products quality of services or quality of life How are services distinguished from goods How do we measure various aspects of quality and services How can products and service quality be managed most effectively and efficiently What is the role of customers in creation of values These questions and more are explored within the pages of this two volume A to Z reference work

Restoring the Promise Richard K. Vedder, 2019-05-01 Higher education in America is in crisis Costs are too high

learning is too little and the payoff to students and society is increasingly problematic In *Restoring the Promise* Richard Vedder shows how the precarious position of colleges and universities results from a mostly unsuccessful expansion of governmental involvement in the academy especially at the federal level The book examines today's most serious issues in higher education including free speech and academic freedom tuition and other costs culture and curricula governance gender race and diversity due process admissions student loans and much more It diagnoses problems and identifies solutions For example the total cost of college per student in the United States is now higher than in any other country When combining the monetary costs of college with the opportunity costs of losing years of labor to the economy the true cost of higher education to American society well exceeds one trillion dollars annually Yet despite American higher education's immense price tag students are learning less than ever before and continue to be underemployed The book discusses the three I's of university reform information incentives and innovation Without information it is impossible for taxpayers and governing authorities to ensure that public education spending truly furthers the broader interests of society rather than the narrow interests of faculty and administrators Shaping incentives for management would help to reduce costs and improve quality Business practices such as Responsibility Centered Management RCM for example allow profit to motivate efficiency and encourage learning outcomes And expanding the use of innovation in technology and open online courses along with relinquishing old rules such as tenure and three month summer vacations offer new hope for institutions of higher education The book discusses such additional reforms as the following Ending or revising the federal student financial aid program Giving departments or even professors a share of overall revenue based on student enrollments in their classes Departments or professors would then be required to pay their share of travel building rental maintenance utilities and other such costs from the revenues they receive Providing earnings data on former students by college five ten or fifteen years after matriculation Prospective students and parents as well as lawmakers and oversight officials would be assisted regarding school successes and failures Increasing faculty teaching loads Instituting three year degrees and year round instruction Ending discrimination against for profit schools Ending grade inflation Ending speech codes and other barriers to academic freedom Ending affirmative action and related diversity programs And more

When the Pot Boils David A. Paul, *When the Pot Boils* examines the decline and near bankruptcy of Drexel University in the late 1980s and early 1990s and its subsequent dramatic turnaround David A Paul provides an in depth analysis of the multiple factors that contributed to this process including the role of the market the academic culture corporate governance and key leaders of the institution Drexel's story of decline through years of student protests faculty conflicts a destructive labor strike and two failed presidencies is a parable of failed corporate governance and a warning of the challenges to colleges and universities in the increasingly competitive world of higher education Paul argues that for schools facing financial difficulties retrenchment strategies must be set aside in favor of the more difficult task of developing organizational missions and programs that matter in the

marketplace **Reframing Retention Strategy for Institutional Improvement** David H. Kalsbeek, 2013-03-18 Take an in depth look at the difficulty in gaining traction at the institutional level in improving student retention and degree completion rates especially at larger four year institutions where size complexity and multiplicity of structures and processes present particular challenges This volume offers a way for institutional leaders to better focus their time energy and resources in their retention effort by framing the way they think about it using the 4 Ps of retention strategy profile progress process and promise This simple framework challenges long standing traditional assumptions about student retention that can distract and dilute institutional efforts and helps keep those efforts sharply and singularly focused on improving retention and degree completion outcomes This is the 161st volume of this Jossey Bass series Addressed to higher education decision makers on all kinds of campuses New Directions for Higher Education provides timely information and authoritative advice about major issues and administrative problems confronting every institution Organizing for Social Partnership David J.

Siegel, 2010-05-25 Organizing for Social Partnership offers a model and a strategy for universities corporations government agencies nonprofits and other organizations interested in engaging in social partnerships This mode of collaboration provides a potentially powerful arrangement for addressing large scale social issues of interest to higher education and other sectors

Management is for anyone in enrollment management admissions financial aid registration and records orientation marketing and institutional research who wish to enhance the health and vitality of his or her institution It is also an excellent text for graduate programs in higher education and student affairs *Education for Innovation* ,2008-01-01 In *Education for Innovation* Implications for India China and America distinguished thought leaders explore cutting edge questions such as Can inventiveness and ingenuity be taught and nurtured in schools and colleges What are the most effective educational strategies to promote these abilities How are vibrant economies driven by innovation What is the relationship between education for innovation and national competitiveness or economic development Focusing on the Worlds three most populous countries and largest economies this book provides a forum for international experts to address a range of critically important issues related to higher education and its role in creating innovative societies A wide diversity of educators policymakers and corporate representatives who are dependent on innovation as the well spring of their success will benefit from the perspectives provided by this volume The contributors critical analyses will be of value to higher education faculty and administrators government officials interested in innovation education policy and national economic and workforce development CEOs and other officials from the online education community and high tech corporate industries Recent focus in all three countries on higher education as a resource for national economic advancement makes the book especially timely **College Made Whole** Chris W. Gallagher,2019-09-24 How can universities shape creative adaptive integrated learners ready to confront the world This book s clear eyed optimism is a challenge to everyone in higher education American higher education is being torn apart Institutions curricula courses and faculty roles are being unbundled broken into constituent parts in the name of efficiency and cost savings As a result the college learning experience is fragmented and incoherent leaving graduates less and less equipped to confront the dire social problems that cause those divisions in the first place In *College Made Whole* Chris W Gallagher lays bare the dangers of the dis integration of the college experience and shows how we can put higher education back together again The successful colleges and universities of the future Gallagher argues will be integrated coherently and cohesively designed to help students achieve a lifelong learning experience that is more than the sum of its parts Pushing back against pernicious dichotomies that frame much discussion of US higher education Gallagher critiques many of the hottest educational trends including the overhyping of technological solutions rampant adjunctification the promotion of nondegree credentials as a suitable replacement for college degrees and the increasingly narrow focus on the vocational aims of a college education Investigating the purposes of higher education historically and today he suggests audacious proposals to enhance learning including reorganizing institutions reordering institutional priorities redesigning curricula and courses and rethinking edtech and learning technologies Lucidly written and packed with practical recommendations and real student stories *College Made Whole* will challenge higher education professionals and policy makers as well as anyone with a stake in the future of US higher education which is to say

all of us who inhabit this fragile planet **Saving Alma Mater** James C. Garland, 2009-10-15 America's public universities educate 80% of our nation's college students. But in the wake of rising demands on state treasuries, changing demographics, growing income inequality, and legislative indifference, many of these institutions have fallen into decline. Tuition costs have skyrocketed, class sizes have gone up, the number of courses offered has gone down, and the overall quality of education has decreased significantly. Here, James C. Garland draws on more than thirty years of experience as a professor, administrator, and university president to argue that a new compact between state government and public universities is needed to make these schools more affordable and financially secure. *Saving Alma Mater* challenges a change-resistant culture in academia that places too low a premium on efficiency and productivity. Seeing a crisis of campus leadership, Garland takes state legislators to task for perpetuating the decay of their public university systems and calls for reforms in the way university presidents and governing boards are selected. He concludes that the era is long past when state appropriations can enable public universities to keep their fees low and affordable. *Saving Alma Mater* thus calls for the partial deregulation of public universities and a phase-out of their state appropriations. Garland's plan would tie university revenues to their performance and exploit the competitive pressures of the academic marketplace to control costs, rein in tuition, and make schools more responsive to student needs. A much-needed blueprint for reform based on Garland's real-life successes as the head of Miami University of Ohio, *Saving Alma Mater* will be essential for anyone concerned with the costs and quality of higher education in America today. *Precipice or Crossroads?* Daniel Mark Fogel, Elizabeth Malson-Huddle, 2012-06-29 President Lincoln signed the Morrill Land Grant Act in 1862, launching a nationwide project in public higher education that would build democracy, prosperity, and competitiveness to levels undreamed of 150 years ago. As student costs skyrocket, driven by steep drops in public funding, the viability of that project like the nation itself is under threat. In *Precipice or Crossroads*, top experts in higher education address a broad range of issues central to the question of whether the quality of these institutions and of American life and democracy can be sustained. *Affective Capitalism in Academia* Daniel Nehring, Kristiina Brunila, 2023-01-16 Drawing on affect theory and research on academic capitalism, this book examines the contemporary crisis of universities. Moving through 11 international and comparative case studies, it explores diverse features of contemporary academic life, from the colonality of academic capitalism to performance management and the experience of being performance managed. Affect has emerged as a major analytical lens of social research. However, it is rarely applied to universities and their marketisation. Offering a unique exploration of the contemporary role of affect in academic labour and the organisation of scholarship, this book considers modes of subjectivation, professional and personal relationships, and organisational structures and their affective charges. Alstete, 2014-12-31 Achieving successful financial viability by broadening revenue sources is one of the most important

issues facing colleges and universities today Increasing operating costs along with the reliance on traditional student tuition government support and philanthropy are challenging universities One way administration leaders and faculty are meeting this challenge is to establish supplemental revenue streams from a variety other sources such as continuing education credit and noncredit certificates degree completion and upgrade programs study abroad domestic and international branch campuses distance education auxiliary services technology transfer and partnerships or alliances with other organizations These types of activities formerly considered secondary ventures are now integral to lasting and responsible financial strategic planning This monograph examines a wide variety of supplemental income options and opportunities as well as examples of restructuring financial planning schema While not negating the value of traditional college education these new revenue sources in fact lead to greater institutional effectiveness This is the 1st issue of the 41th volume of the Jossey Bass series ASHE Higher Education Report Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication

Getting Sociology Right Neil J. Smelser, 2014-04-12 Neil J Smelser one of the most important and influential American sociologists traces the discipline of sociology from 1969 to the early twenty first century in *Getting Sociology Right A Half Century of Reflections* Examining sociology as a vocation and building on the work of Talcott Parsons Smelser discusses his views on the discipline of sociology and shows how his perspective of the field evolved in the postwar era

How Colleges Change Adrianna Kezar, 2013-10-01 Higher education is in an unprecedented time of change and reform To address these challenges university leaders tend to focus on specific interventions and programs but ignore the change processes and the contexts that would lead to success Joining theory and practice *How Colleges Change* unmasks problematic assumptions that change agents typically possess and provides research based principles for approaching change Framed by decades of research this monumental book offers fresh insights into understanding leading and enacting change Recognizing that internal and external conditions shape and frame change processes Kezar presents an overarching practical framework that can be applied to any organizational challenge and context *How Colleges Change* is a crucial resource for aspiring and practicing campus leaders higher education practitioners scholars faculty and staff who want to learn how to apply change strategies in their own institutions

Publicly Engaged Scholars Margaret A. Post, Elaine Ward, Nicholas V. Longo, John Saltmarsh, 2023-07-03 The concern that the democratic purposes of higher education and its conception as a public good are being undermined with the growing realization that existing structures are unsuited to addressing today s complex societal problems and that our institutions are failing an increasingly diverse population all give rise to questioning the current model of the university This book presents the voices of a new generation of scholars educators and practitioners who are committed to civic renewal and the public purposes of higher education They question

existing policies structures and practices and put forward new forms of engagement that can help to shape and transform higher education to align it with societal needs The scholars featured in this book make the case for public scholarship and argue that in order to strengthen the democratic purposes of higher education for a viable future that is relevant to the needs of a changing society we must recognize and support new models of teaching and research and the need for fundamental changes in the core practices policies and cultures of the academy These scholars act on their values through collaboration inclusiveness participation task sharing and reciprocity in public problem solving Central to their approach is an authentic respect for the expertise and experience that all stakeholders contribute to education knowledge generation and community building This book offers a vision of the university as a part of an ecosystem of knowledge production addressing public problems with the purpose of advancing a more inclusive deliberative democracy and explores the new paradigm for teaching learning and knowledge creation necessary to make it a reality

Ethics at the Heart of Higher Education C. R. Crespo, Rita Kirk, 2020-08-26 Today's college students have more knowledge available to them than can be absorbed mastery of a subject area creates siloes where nearly every course is tailored to comprehending subject matter that may be outdated before they graduate But learning is more than subject matter expertise Our fast paced environment requires instantaneous reactions to complex questions Our instant messaging age champions quick response over reflection or thought even the president governs by Twitter Yet the ethical dilemmas are no less complex than the subject matter cyber security prison reform labor rights abortion artificial intelligence or gun laws are common table topics over lunch Struggling through that complexity is central to understanding its implications for our culture This book brings together some of the leading ethicists in the country to consider the rightful place of ethics in the university today The authors make the case that higher education has a special duty to empower students to cultivate their character ethically assess situations and prepare them for an increasingly complex world With contributions from Mary Camp Alexander Cole Charles E Curran Robert J Howell D Stephen Long Robin Lovin Richard O Mason William F May Thomas Wm Mayo John Sadler

In View of Academic Careers and Career-Making Scholars Victor N. Shaw, 2008-03-01 This volume connects career making to the general social context in which it takes place career making individuals to the large institutional establishment in which they operate and specifically career academicians to the overall knowledge enterprise from which they draw their intellectual inspiration on which they build their career achievements and to which they contribute their personal talents The main purpose is to explore what academic institutions the knowledge enterprise and the society as a whole can and ought to do to enhance productivity facilitate performance and improve experience of individual academicians in their career making endeavor Although various innovative ideas are presented to improve normal procedures or standard processes throughout academia answers to this focal question often lie in different levels of organizational units involved in academic operation That is what should a department do for its faculty a college for its departments a university for its colleges an association for its member

organizations or a government for its academic institutions in the best interest of the latter Similarly although reformative measures are proposed to the attention of established entities or institutionalized systems change within the existing situation or practice to a large degree depends upon how people in various social roles relate to each other in attitude as well as in behavior when they perform their specific job In other words what should a professor do for graduate students a senior scholar for junior colleagues a chair for faculty members a dean for chairs a university chancellor for deans an editor for authors or an association president for the general membership from the due perspective of the latter The logic or legitimacy of examining this focal question and its organizational unit and social role is clear a shining academician owes much to the support of his or her assistants students and followers a rising university builds on the productivity of its individual divisions and a thriving knowledge enterprise depends upon the success of individual career making scholars Beyond its own functionality and success by division of labor the higher level or the larger system has an inescapable responsibility to ensure that individual players or components therein grow develop and perform to the best of their potential In content this volume consists of sixteen chapters Chapter 1 identifies main pathways and stages in academic careers Chapters 2 5 focuses on the career process exploring major requirements that an academician has to work on and fulfill in his or her career making endeavor These requirements include educational preparation job search institutional placement and professional networking Chapters 6 15 centers on the career structure examining essential elements that a scholar has to build and maintain in his or her career identity These elements range from the academic degree position publication teaching presentation service grants awards and membership in academic associations to tenure The last chapter capitalizes on the curriculum vitae as a miniature of the academic personality that a career professional must present to the community of scholarship
