Remaking Europe The European Union And The Transition Economies:

Remaking Europe Jozef M. van Brabant, 1999 A watershed in efforts to integrate Europe the plans to widen the EU will inevitably conflict with forces for deepening integration Focusing on economic factors this volume explores the key questions of widening including why the negotiations are likely to be contentious for all concerned **Enlargement of the European Union** Allan F. Tatham, 2009-01-01 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture history and economics has supplanted the long dominant theme of widening and deepening particularly since the Union's expansion has become primarily eastward The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives In the course of its presentation it details the actual pre accession Europeanization process and its complex history Among the key elements discussed are the following the conflict between widening and deepening and the effect on EU institutional reform institutional requirements on candidate countries pre accession criteria and negotiations administrative capacity judicial capacity and legal approximation in accession states capacity of the EU to absorb new Member States and EC law as part of European identity Also covered are specific historical details of particular pre accession negotiations e g Greece Spain Portugal Malta and Cyprus the still inconclusive negotiations with Turkey and the Western Balkan states and political factors involved in the non accession of Norway Iceland and Switzerland Assembling powerful evidence and applying incisive analysis the author's conclusion shows that absent further and major EU institutional reform it will be difficult for an enlarging Union to continue to deliver the goods A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe this book will prove invaluable to anybody interested in the European integration project particularly lawyers academics officials and policymakers in the EU Member States Norms and Nannies Ronald Haly Linden, 2002 As the Central and East European states seek to join the European Union and NATO they face challenging demands to adhere to specific European norms and standards In this first comprehensive analysis contributors examine how this process operates in a variety of domains including civil military relations social labor and regional relations economic and information policies and foreign policy Each author considers what norms are generated by or absent from European international organizations how they are communicated to prospective members and most important what impact they have had on the policies and actions of individual countries as well as on the region as a whole These on the ground studies provide the empirical foundation needed to support theories of norm diffusion constructivism and liberalism in international relations and comparative politics alike *Developments in Central and East European Politics 3* Stephen White, Judy Batt, Paul G. Lewis, 2003 International Economic Integration: Integration schemes Miroslav Jovanovic, 1998

Negotiating the New Europe Dimitris Papadimitriou, 2018-02-06 This title was first published in 2002 Offering a new and challenging perspective on how the European Union EU sought to structure its relations with Central and Southeast Europe after the Cold War this volume draws upon key debates in both politics and international relations A historically and theoretically informed examination of the EU's engagement in Central and Eastern Europe since 1989 the book combines conceptual rigour with clear empirical analysis firmly grounding the study of the European Union's current enlargement process in established theoretical perspectives The book is written in an engaging and accessible way which will appeal to academics students and practitioners alike

The Transnational Politics of Corporate Governance Regulation Henk Overbeek, Bastiaan van Apeldoorn, Andreas Nölke, 2007-04-30 This ambitious volume explores the politics of recent changes in corporate governance regulation and the transnational forces driving the process Corporate governance has in the 1990s become a catchphrase of the global business community The Enron collapse and other recent corporate scandals as well as growing worries in Europe about the rise of Anglo Saxon finance have made issues of corporate governance the subject of political controversies and of public debate The contributors argue that the regulation of corporate governance is an inherently political affair Given the context of the deepening globalization of the corporate world it is also increasingly a transnational phenomenon In terms of the content of regulation the book shows an increasing reliance on the application of market mechanisms and a tendency for corporations themselves to become commodities The emerging new mode of regulation is characterized by increasing informalization and by forms of private regulation These changes in content and mode are driven by transnational actors first of all the owners of internationally mobile financial capital and their functionaries such as coordination service firms as well as by key public international agencies such as the European Commission The Transnational Politics of Corporate Governance Regulation will be of interest to students and researchers of international political economy politics economics and corporate governance

The Future of Europe Frances K. Scott, 2001 In support of the Academy Assembly the Directorate of Libraries Dean of the Faculty produces a special bibliography of Air Force Academy library materials relevant to the current year's theme The theme for the 2001 2002 academic year is The Future of Europe Integration or Fragmentation This year's bibliography number 98 in the library's Special Bibliography Series was prepared by Frances K Scott Social Sciences Bibliographer and Reference Librarian who has prepared the annual Academy Assembly bibliography for the past ten years

The Political Economy of the European Social Model Philip B. Whyman, Mark J. Baimbridge, Andrew Mullen, 2012-05-31 This book seeks to analyse the development of the European Union EU which was founded upon the principle of the free movement of capital goods services and people in 1957 Its central thesis is that from a practical and theoretical point of view such a basis is fundamentally at odds with the creation of an interventionist regime that the construction of a social Europe would require The authors argue convincingly that economically the EU does not currently possess the budget or the economic tools to pursue such a strategy politically close to

none of the institutions of the EU have backed such a policy practically conservative and neo liberal forces among member states and the institutions of the EU have repeatedly thwarted any moves in this direction In reality the Single Internal Market Economic and Monetary Union enlargement the Lisbon Agenda and European Constitution projects all prioritise supply side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention Consequently constructing a social Europe in the face of this would appear problematic Hence in both theory and practice the idea that there can be a social Europe vis vis neoliberalisation is a contradiction in terms This controversial book will be an educating and refreshing read for advanced students and academics involved with European politics the European Union European Economics and Economic institutions

The Changing Geopolitics of Eastern Europe Dr A H Dawson, Rick Fawn, 2013-11-05 This work covers the uncertain geopolitical situation of some countries of Central and Eastern Europe including some of those which are hoping to enter the European Union in the near future some for which entry is far off and some which may never seek or be eligible for membership

Annuaire Europeen 2000/European Yearbook 2000 Francis Rosensteel, 2001-07-01 The year 2000 s most significant international event was almost certainly neither political nor military but scientific the announcement in June that the human genome had been almost totally decoded Future generations may well see this as a major turning point opening the way to radical changes in diagnosis prognosis and medical treatment Often compared with the space programme this vast enterprise still generates misgivings this new power which human beings now have to modify the genetic heritage of living creatures raises fundamentally new ethical questions and society as a whole will have to find the answers In fact the accelerating pace of scientific and technical progress seems to be reviving atavistic anxieties some rational others less so Recent public health crises including the mad cow disease scare which lasted into 2000 have fuelled these fears The public s rejection of GMOs Genetically Modified Organisms verging on a crusade in some countries tells its own story As regards conflict 2000 saw the Middle East peace process grind to a halt and the Intifada resume In Europe the situation in Kosovo and Chechnya both the scenes of fighting in 1999 stayed precarious Peace and democracy did score some successes however particularly in Europe the centre left s victory in Croatia sweeping former President Tudjman s party off the scene the democratic party s triumph in Bosnia and the fall of the Milosevic regime in Serbia

International Currency Arrangements and Policies Julius Horváth, 2006 This book deals with exchange rate arrangements and exchange rate policies Chapter 2 classifies exchange rates into flexible intermediate and rigid arrangements The book is subdivided into an arrangement of free float managed float pegged but adjustable target zone crawling peg hard peg currency board dollarisation and monetary union This chapter also discusses hypothesis of vanishing intermediate exchange rate arrangements as well as it deals with differentiation between de jure and de facto exchange rate arrangements Chapter 3 deals with the issue of choosing an appropriate exchange rate arrangement The book briefly characterises basic approaches of how to choose an exchange rate regime Furthermore the book reviews

considerations stemming from the optimum currency area literature Chapter 4 deals with problems of exchange rate which were encountered by the most developed transition countries After discussing the initial stabilisation problems of the early 1990s it provides a general overview of the macroeconomic situation and exchange rates arrangements in these countries in the period 1990 2004 Also the book discusses issues connected with the future introduction of the euro into these countries Chapter 5 provides the reader with two case studies First a discussion of the Czech experience in the transition period till the crisis in May 1997 is presented Second a discussion of the Hungarian experience concerning banking and exchange rate policy in the 1990s till the early years of this century Finally Chapter 6 discusses different historical periods from the viewpoint of currency arrangements **Special Bibliography Series** United States Air Force Academy. Library,2001

Special Bibliography Series ,1957 **Europe Today** Ronald Tiersky,2004 This engaging book a true twenty first century enterprise is the only text that offers both country case studies and discussion of the European Union in one sustained volume Now thoroughly revised for 2004 it is the first European politics text to offer current analysis on the invasion of Iraq NATO and European security U S European relations and enlargement issues All chapters from the first edition have been comprehensively updated and completely new chapters have been added on Germany France Great Britain Spain Poland monetary union security and migration With its strong international emphasis and focus on Europe before and after Iraq professors will be able to use this text to lead students toward a coherent view of intra European conflicts Europe and the United States and Europe s international responsibilities A new website devoted exclusively to the book with regularly updated statistics analysis and links for each chapter will provide a rich resource for students seeking additional information and researching classroom assignments **Transnational Politics of the Environment** Liliana B. Andonova,2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In *Transnational Politics of the Environment* Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards *Transnational Politics of the Environment* challenges the current focus on intergovernmental cooperation between East and

West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics

Integrating Europe J.M. Van Brabant,2012-12-06 Bringing the eastern European economies in transition defined more precisely in the Introduction under the economic political and security umbrella of the European Union ED has been an ambition of many of these countries from the very start of the so called annus mirabilis in 1989 The road to gratification of this aspiration since then has been rather bumpy however one wants to look at recent events Indeed since 1989 the relationship between the EU and the economies in transition has been ebbing and flowing with the evolution of two main strands of policy stances in the EU One has been deep skepticism about bringing these countries into the Union at all in any foreseeable future This in spite of the fact that after long hesitation in mid 1993 the EU Member States committed themselves eventually to explore accession with selected transition economies as well as Cyprus and Malta The other has been their evolving attitude toward their own integration endeavors Hence the dilemmas in the EU's parlance of the deepening versus widening conundrum That indeed constitutes the paramount issue addressed in the present investigation

Company Law in the New Europe Janet Dine,Marios Koutsias,Michael Blecher,2007-01-01 This study on the potential of law to ensure the social responsibility of a company is an innovative and important study It is a topical contribution to the sociology of market economies in transition It is a unique effort to provide detailed practical guidance for the design of the company law in developing economies in general and the new Europe in particular Christian Joerges European University Institute Florence Italy This book provides comprehensive analysis of the recent enlargement of the EU shedding light on the rationale behind the EU's decisions to enlarge examining the side effects these choices have on a range of EU policies and particularly on the effect of the Acquis on candidate countries Emphasis is placed on the area of company law which occupies a central part in a country's economic planning and therefore its commercial law Past enlargements are thoroughly explained and the potential impact of the new political landscape in Europe in the wake of the popular rejection of the European Constitutional Treaty on future enlargements is evaluated A comparative methodology for commercial law drafting in transition and developing economies is put forward and the book concludes with a complete draft of a model company law for transition and developing economies The aim is to provide a template for discussion This book will be of great interest to those interested in considering the influence that the prospect of EU membership has on transition countries in general the emphasis being on laws vital to emerging market economies particularly commercial and company law

The Caribbean Economies in an Era of Free Trade Michael Witter,2017-11-28 This book is concerned with the impact of economic globalization and an unregulated global market system on the Caribbean economies The book is in three parts Part I examines theoretical issues and includes an assessment of recent globalization trends the limits of globalization and the

question of uneven development Part II considers alternative policy solutions including interventionist alternatives effective monetary strategies and innovative tourism strategies Part III focuses on Jamaica and the Bahamas Overall this book provides a rich menu for alternative economic policies in the Caribbean at the turn of the century Economia Dell'allargamento Dell'Unione Europea Franco Praussello,2003
