**Nagasaki** Susan Southard, 2017-08-31 On August 9th 1945 the US dropped an atomic bomb on Nagasaki It killed a third of the population instantly and the survivors or hibakusha would be affected by the life altering medical conditions caused by the radiation for the rest of their lives They were also marked with the stigma of their exposure to radiation and fears of the consequences for their children Nagasaki follows the previously unknown stories of five survivors and their families from 1945 to the present day It captures the full range of pain fear bravery and compassion unleashed by the destruction of a city Susan Southard has interviewed the hibakusha over many years and her intimate portraits of their lives show the consequences of nuclear war Nagasaki tells the neglected story of life after nuclear war and will help shape public debate over one of the most controversial wartime acts in history Published for the 70th anniversary of the Hiroshima and Nagasaki bombs this is the first study to be based on eye witness accounts of Nagasaki in the style of John Hersey s Hiroshima On August 9th 1945 three days after the atomic

bombing of Hiroshima a 5 tonne plutonium bomb was dropped on the small coastal city of Nagasaki The explosion destroyed factories shops and homes and killed 74 000 people while injuring another 75 000 The two atomic bombs marked the end of a global war but for the tens of thousands of survivors it was the beginning of a new life marked with the stigma of being hibakusha atomic bomb affected people Susan Southard has spent a decade interviewing and researching the lives of the hibakusha raw emotive eye witness accounts which reconstruct the days months and years after the bombing the isolation of their hospitalisation and recovery the difficulty of re entering daily life and the enduring impact of life as the only people in history who have lived through a nuclear attack and its aftermath Following five teenage survivors from 1945 to the present day Southard unveils the lives they have led their injuries in the annihilation of the bomb the dozens of radiation related cancers and illnesses they have suffered the humiliating and frightening choices about marriage they were forced into as a result of their fears of the genetic diseases that may be passed through their families for generations to come The power of Nagasaki lies in the detail of the survivors stories as deaths continued for decades because of the radiation contamination which caused various forms of cancer Intimate and compassionate while being grounded in historical research Nagasaki reveals the censorship that kept the suffering endured by the hibakusha hidden around the world For years after the bombings news reports and scientific research were censored by U S occupation forces and the U S government led an efficient campaign to justify the necessity and morality of dropping the bombs As we pass the seventieth anniversary of the only atomic bomb attacks in history Susan Southard captures the full range of pain fear bravery and compassion unleashed by the destruction of a city The personal stories of those who survived beneath the mushroom clouds will transform the abstract perception of nuclear war into a visceral human experience Nagasaki tells the neglected story of life after nuclear war and will help shape public discussion and debate over one of the most controversial wartime acts in history **The**

European Review of Social Psychology is an annual series that reflects the dynamism of social psychology in Europe and has been widely accepted as one of the major international series in social psychology. The series is open to authors from all nations and its major purpose is to further the international exchange of ideas by providing an outlet for substantial accounts of theoretical and empirical work. However, even though the series is worldwide in terms of the nationality of the authors, it is European in terms of the nationality of the editors who select the contributions and shape the editorial policies. With the help of an editorial board consisting of senior scholars from various European countries, Australasia and North America, the editors invite outstanding researchers to contribute to these volumes. Invitations are based either on suggestions from editorial board members or made in response to proposals submitted to the editors. The emphasis of these contributions is on critical assessment of major areas of research and of substantial individual programmes of research as well as on topics and initiatives of contemporary interest and originality.

Now he is torn between the mission he is honor bound to complete and the woman his heart yearns to protect.

**Remembering with Emotion in Dynamic Psychotherapy** Steven B. Sandler, 2011-06-10 This book takes a new look at dynamic psychotherapy from its most basic theory to the furthest limits of its capabilities. It invites the reader to re-examine a few of the most basic concepts underlying the practice of psychotherapy: What is emotion? What is a defense mechanism? It begins with emotion theory, an area of academic study that has traditionally been neglected in psychotherapy training programs. Throughout the book, it is argued that the patient's experience of emotion is critical for a successful outcome in therapy and that the therapist's understanding of emotion will provide a solid theoretical foundation for practice. Attachment theory is also used extensively throughout the book. Case examples offer interventions that are designed to translate the theory into practical applications. In the middle chapters of the book, these basic ideas—emotion theory and attachment theory—are applied in an extended case example using ample segments of verbatim dialogue. Memory theory is used to explain some of the treatment failures in

dynamic psychotherapy Memory theory can lead to a revised approach that provides more durable outcomes Dynamic psychotherapy has largely been a therapy of bad memories therefore a systematic approach to focusing on positive memories of early attachment experiences is outlined We must not only help the patient to face negative memories of his past we must also help revive and strengthen positive memories until they have trace dominance over negative ones Finally the possibility that dynamic psychotherapy can lead to spiritual growth is explored Early parent child experiences of oneness can serve as the developmental precursors of the spiritual experience Some of the child development literature including Mahler s notion of symbiosis is reviewed Some preliminary work with patients is presented in which they are invited to broaden their new emotional connection with a parent and others until it leads to a greater sense of spiritual connection and o **The Duck Hunter Diaries, Book 1** William R. Nisbett,2017-07-05 Recently there has been growing awareness and acceptance of the proposition that people do not exist in a world of physically defined forces and events but in a world defined by their own perceptions cognitions conclusions and imaginations We respond and react not to some objectively defined set of stimuli but to our own apperceptions of stimuli that

we define subjectively The original essays in this volume center on one aspect of this process of attribution The extent to which the perception of events and causes results in the determination modification or alteration of emotions feelings and affective states This book is divided into five sections each of which elucidates and extends these theoretical conceptions Part 1 provides a historical background and analytical framework for the rest of the book Part 2 presents chapters dealing with the sorts of internal cues which may give rise to a feeling state Part 3 presents a chapter discussing the evaluative needs aroused by the internal cues Part 4 is concerned with the process of explanation triggered by the evaluative needs Part 5 deals with various external cues and how they are used to label the internal feeling state There is a concluding discussion of the cognitive alteration of feeling states The authors deal with aggression boredom obesity the control of pain and delusional systems This volume is of continuing importance to clinical and experimental psychologists as well as social psychologists Each of the authors takes the theoretical concept of cognition and relates it to research in biofeedback physiology social psychology altered states of consciousness etc Thus the book bridges the gap between cognitive theory and the use of that theory in applied research
