Renaissance Papers 1994:

Renaissance papers 1994 Barbara J. Baines, 1995 **Theater of a City** Jean E. Howard, 2011-06-03 Arguing that the commercial stage depended on the unprecedented demographic growth and commercial vibrancy of London to fuel its own development Jean E Howard posits a particular synergy between the early modern stage and the city in which it flourished In London comedy place functions as the material arena in which social relations are regulated urban problems negotiated and city space rendered socially intelligible Rather than simply describing London the stage participated in interpreting it and giving it social meaning Each chapter of this book focuses on a particular place within the city the Royal Exchange the Counters London's warehouses and its academies of manners and examines the theater's role in creating distinctive narratives about each In these stories specific locations are transformed into venues defined by particular kinds of interactions whether between citizen and alien debtor and creditor prostitute and client or dancing master and country gentleman Collectively they suggest how city space could be used and by whom and they make place the arena for addressing pressing urban problems demographic change and the influx of foreigners and strangers into the city new ways of making money and losing it changing gender roles within the metropolis and the rise of a distinctive town culture in the West End Drawing on a wide range of familiar and little studied plays from four decades of a defining era of theater history Theater of a City shows how the stage imaginatively shaped and responded to the changing face of early modern London

productions of seventeenth and eighteenth century women Latinists are more extensive and more varied than those of their predecessors and include scientific writing and ambitious translations By the mid nineteenth century the integration of studious women into the wider academy was well under way The Last Plantagenet Consorts Kavita Mudan

Print Culture and the Medieval Author Alexandra Gillespie, 2006-11-30 Print Culture and the Medieval Author is a book about books Examining hundreds of early printed books and their late medieval analogues Alexandra Gillespie writes a bibliographical history of the poet Geoffrey Chaucer and his follower John Lydgate in the century after the arrival of printing in England Her study is an important new contribution to the emerging sociology of the text in English literary and historical studies At the centre of this study is a familiar question what is an author The idea of the vernacular writer was already contested and unstable in medieval England Gillespie demonstrates that in the late Middle Ages it was also a way for book producers and readers to mediate the risks commercial political religious and imaginative involved in the publication of literary texts Gillespie's discussion focuses on the changes associated with the shift to print scribal precedents for these changes and contemporary understanding of them The treatment of texts associated with Chaucer and Lydgate is an index to the sometimes flexible sometimes resistant responses of book printers copyists decorators distributors patrons censors owners and readers to a gradual but profoundly influential bibliographical transition The research is conducted across somewhat intractable boundaries Gillespie writes about medieval and modern history about manuscript and print about canonical and marginal authors about literary works and books as objects In the process she finds new meanings for some medieval vernacular texts and a new place for some old books in a history of English culture

The Oxford History of Classical Reception in English Literature David Hopkins, Charles Martindale, Norman Vance, Rita Copeland, Patrick Cheney, Philip R. Hardie, Jennifer Wallace, 2012 The Oxford History of Classical Reception OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers' engagement with classical literature casts as much light on the classical originals as it does on the English writers' own cultural context This second volume and third to appear in the series covers the years 1558-1660 and explores the reception of the ancient genres and authors in English Renaissance literature engaging with the major and many of the minor writers of the period including Shakespeare Marlowe Spenser and Jonson

Separate chapters examine the Renaissance institutions and contexts which shape the reception of antiquity and an annotated bibliography provides substantial material for further reading
