## **Security Without Nuclear Weapons Different Perspectives On Non Nuclear Security:**

**Security Without Nuclear Weapons?** Stockholm International Peace Research Institute, 1992 This book examines the question Is the elimination of nuclear weapons feasible Individual chapters address the major conceptual technical and economic issues in the design of a non nuclear security regime Other chapters explore more specialized issues as they relate to the feasibility of the elimination of nuclear weapons elite perceptions and the decision making process verification nuclear proliferation fissile materials and warheads alliance and regional hegemonies and deterrence *Abolishing Nuclear Weapons* George Perkovich, 2017-10-03 Nuclear disarmament is firmly back on the international agenda But almost all current thinking on the subject is focused on the process of reducing the number of weapons from thousands to hundreds This rigorous analysis examines the challenges that exist to abolishing nuclear weapons completely and suggests what can be done now to start overcoming them The paper argues that the difficulties of getting to zero must not preclude many steps being taken in that direction It thus begins by examining steps that nuclear armed states could take in cooperation with others to move towards a world in which the task of prohibiting nuclear weapons could be realistically envisaged The remainder of the paper focuses on the more distant prospect of prohibiting nuclear weapons beginning with the challenge of verifying the transition from low numbers to zero It moves on to examine how the civilian nuclear industry could be managed in a nuclear weapons free world so as to prevent rearmament The paper then considers what political security conditions would be required to make a nuclear weapons ban enforceable and explores how enforcement might work in practice Finally it addresses the latent capability to produce nuclear weapons that would inevitably exist after abolition and asks whether this is a barrier to disarmament or whether it can be managed to meet the security needs of a world newly free of the bomb

**The Evolution of Nuclear Strategy** L. Freedman, 2003-07-18 First published twenty years ago Lawrence Freedman's *Evolution of Nuclear Strategy* was immediately acclaimed as the standard work on the history of attempts to cope militarily and politically with the terrible destructive power of nuclear weapons It has now been rewritten drawing on a wide range of new research and updated to take account of the period following the end of the cold war taking the story to contemporary arguments about missile defence *Central and Eastern Europe* Regina Cowen Karp, 1993 V The return of history *The Arms Dynamic in World Politics* Barry Buzan, Eric Herring, 1998 Presented as a successor to the Cold War era book *An Introduction to Strategic Studies* this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve

some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR

**Europe and Naval Arms Control in the Gorbachev Era** Andreas Fürst, Volker Heise, Steven E. Miller, 1992 For most of the Cold War naval arms control was the forgotten dimension of arms control Beginning in the late 1980s however it has become increasingly prominent in the East West dialogue But it is usually studied from the perspective of Soviet American relations This book examines the subject from a European perspective What role might naval arms control play in the European context What impact might naval arms control have on the interests and perceptions of European states What opportunities for and obstacles to naval arms control exist in Europe The authors address these questions describing the naval interests and attitudes towards naval arms control of European coastal states as well as the Soviet Union and the United States in the Norwegian Baltic and Mediterranean seas

**International Law Reports** E. Lauterpacht, C. J. Greenwood, 1998-11-26 Includes International Court of Justice Advisory Opinions on use of nuclear weapons

**Deterrence Now** Patrick M. Morgan, 2003-04-17 Patrick Morgan's authoritative study revisits the place of deterrence after the Cold War

**Stable Nuclear Zero** Sverre Lodgaard, 2016-08-12 This volume examines the conditions necessary for a stable nuclear weapons free world and the implications for nuclear disarmament policy The Nuclear Non Proliferation Treaty NPT is a road map to nuclear zero but it is a rudimentary one and it says nothing about the kind of zero to aim for Preferably this would be a world where the inhibitions against reversal are strong enough to make it stably non nuclear What then are the requirements of stable zero The literature on nuclear disarmament has paid little attention to this question By and large the focus has been on the next steps and discussions tend to stop where the NPT stops with the elimination of the weapons This book seeks to fill a lacuna by examining the requirements of stable zero and their implications for the road map to that goal starting from the vision to the present day The volume highlights that a clear conception of the goal not only is important in itself but can shed light on what kind of disarmament process to promote This book will be of much interest to students of nuclear proliferation global governance security studies and IR

**The Limited Partnership** James E. Goodby, Benoit Morel, 1993 This book presents a detailed assessment of the conditions for security relations between Washington and Moscow in the post cold war era focusing on the scope for future co operative management of common security Three main areas provide the context for a thematically and theoretically varied discussion the security and foreign policy implications of the transition from the Soviet to a Russian Commonwealth regime military power and international stability after the cold war and the political military and technological requirements for a new security relationship

**World Inventory of Plutonium and Highly Enriched Uranium, 1992** David Albright, Frans Berkhout, William Walker, 1993 From the John Holmes Library collection

**Historical Dictionary of Arms Control and Disarmament** Jeffrey A. Larsen, James M. Smith, 2005-03-25 Historical Dictionary of Arms Control and Disarmament also provides information that is comprehensible to all readers Jeffrey A Larsen and James M Smith present a context for the broader range of international relations at a given point in time

extending the utility of the dictionary beyond just a narrow examination of arms control **BOOK JACKET**

**Designing Denuclearization** Bruce Larkin, 2018-02-06 This work canvasses nuclear weapon abolition proposals placed on the table since 1945 and the obstacles and issues which a realistic program for abolition confronts today It has an ambitious purpose to show that nuclear abolition can and should be placed on the public agenda a The author terms it interpretive in that it incorporates his commentaries never hiding his reasons and judgments It is neither just the facts nor all the facts It is an encyclopedia in the original meaning of a general course of instruction He identifies himself with all who pursue the problem posed by nuclear weapons systematically and with seriousness of purpose committed to self instruction In another sense he writes this work is a conversation with the Reader What is needed to abolish nuclear weapons His starting point is this As long as nuclear weapons are stockpiled and deployed there is risk of their use which would be catastrophic Abolition however is inconceivable in the absence of a developed and articulated alternative to the nuclear status quo Even with that the politics of abolition bringing the governments of the nuclear weapon states to believe that abolition is in their interest is the sine qua non of achieving a world free of nuclear weapons Larkin s text is written for those whether practitioners or citizens interested in designing and bringing about denuclearization Abolition cannot be achieved by political elites in the absence of broad concurrent public support Governments career policy officials and legislators have chosen to assume responsibility for the public agenda They may be asked must be asked what they will do to bring about denuclearization

**The Economics of Conflict and Peace** Jurgen Brauer, William G. Gissy, 2017-07-05 This work addresses new directions in research on the economic theory of conflict the cost of war and the benefits of peace A collection of 17 papers drawing on contributors from all continents the volume is divided into four sections The first discusses novel ways to think about the economics of conflict and peace from theory perspectives These include discussions of conflict from the perspectives of standard neoclassical analysis and economic geography An especially interesting paper in this section addresses conflict in the context of the emerging theory of international public finance A second section deals with military expenditures economic human development and economic growth in the US and developing nations of Asia and Africa The volume enters new territory in sections three and four Section three contains a set of papers on the economic cost of war and war s aftermath significantly expanding economists rather modest efforts to date Section four is concerned with how the concepts of economics might be operationalized and institutionalized to foster security
