Twenty-First Century Urbanism Rob Sullivan,2017-09-04 This volume argues that the city cannot be captured by any one mode of analysis but instead is composed of the mobile relational efficient sentient and the phenomenological with all of them cast in new theoretical configurations and combined into one methodological entity Rather than focusing on any one city or abstract analytical model this book instead takes a multipronged theoretical and methodological approach to present the city as an intelligent affective organism a sentient being It proposes that cities operate on a relational mobile and phenomenological basis through the mode of efficiency calibrated by a profoundly complicated division of labor Its starting point is that the city is a mobile unit of analysis from its economic status to its demographic makeup from its cultural configuration to its environmental conditions and therefore easily evades our quantitative and qualitative methods of computation and comprehension Twenty First Century Urbanism provides planning and urban design academics and students with a multifaceted approach to understanding the development of cities encouraging the examination of cities through a myriad non linear approach **Visualizing the City** Alan Marcus,Dietrich Neumann,2024-11-01 This anthology presents a range of interdisciplinary explorations into the urban environment through film photography digital imagery maps and signage Contributors examine our fascination with the city through the history of art and architecture urban studies environmental studies cultural geography and screen studies Bringing together a wide spectrum of urban contexts Visualizing the City s diverse essays explore visual representations of urbanism and modernity reflected through the prism of global cultures using an engaging variety of methods and texts Cities in the World: 1500-2000: v. 3 Adrian
