Jarvis, Toby Hodgkin, Anthony H. D. Brown, John Tuxill, Isabel López Noriega, Melinda Smale, Bhuwon Sthapit, 2016-03-28 Based on twenty years of global research this is the first comprehensive reference on crop genetic diversity as it is maintained on farmland around the world Showcasing the findings of seven experts representing the fields of ecology crop breeding genetics anthropology economics and policy this invaluable resource places farmer managed crop biodiversity squarely in the center of the science needed to feed the world and restore health to our productive landscapes It will prove to be an essential tool in the training of agricultural and environmental scientists seeking the solutions necessary to ensure healthy resilient ecosystems for future generations A Training Guide for in Situ Conservation On-farm Devra I. Jarvis, L. MEYER, H. Klemick, 2000 Towards Effective and Sustainable Seed Relief Activities Food and Agriculture Organization of the United Nations, 2004-01-01 This report contains papers given to a FAO workshop meeting held in Rome in May 2003 organised to consider how to improve the effectiveness of seed relief schemes to promote sustainable development and food security to identify gaps in the development of tools guidance and methodologies and to make recommendations for further collaborative work It includes case studies of seed relief activities in several African countries Managing Biodiversity in Agricultural Ecosystems Devra Ivy Jarvis, Christine Padoch, H. David Cooper, 2007 Describes how farmers manage maintain and benefit from biodiversity in agricultural production systems Includes the most recent research and developments in the maintenance of local diversity at the genetic species and ecosystem levels **Seed systems and crop genetic diversity on-farm : proceedings of a workshop, 16 - 20 September 2003, Pucallpa, Peru** Devra Ivy Jarvis, 2005

Agrobiodiversity Karl S. Zimmerer, Stef De Haan, 2023-10-31 Experts discuss the challenges faced in agrobiodiversity and conservation integrating disciplines that range from plant and biological sciences to economics and political science Wide ranging environmental phenomena including climate change extreme weather events and soil and water availability combine with such socioeconomic factors as food policies dietary preferences and market forces to affect agriculture and food production systems on local national and global scales The increasing simplification of food systems the continuing decline of plant species and the ongoing spread of pests and disease threaten biodiversity in agriculture as well as the sustainability of food resources Complicating the situation further the multiple systems involved cultural economic environmental institutional and technological are driven by human decision making which is inevitably informed by diverse knowledge systems The

interactions and linkages that emerge necessitate an integrated assessment if we are to make progress toward sustainable agriculture and food systems This volume in the Str ngmann Forum Reports series offers insights into the challenges faced in agrobiodiversity and sustainability and proposes an integrative framework to guide future research scholarship policy and practice The contributors offer perspectives from a range of disciplines including plant and biological sciences food systems and nutrition ecology economics plant and animal breeding anthropology political science geography law and sociology Topics covered include evolutionary ecology food and human health the governance of agrobiodiversity and the interactions between agrobiodiversity and climate and demographic change

Agribusiness and Society Kees Jansen,Sietze Vellema,2013-07-04 This volume examines how far agribusiness corporations are responding to the opportunities and pressures resulting from emerging environmental awareness In particular in what ways are they changing their R some changed their production practices in a sustainable way while others have complied with or resisted state

environmental regulation notably labelling systems and certification Each study explores how institutional cultural economic political and technological contexts shape the strategies of big business Topics include green bananas genetically modified tomatoes and soy the new markets in organic produce health and pesticides and access to justice The book explains why some corporations are successful in introducing environmentally friendly innovations and others are not The key to understanding contrasting outcomes is examining the interaction between internal corporate environments where profit and efficiency considerations predominate and external environments where consumer preferences NGO pressures and government regulation are important The book also explores possible new roles for the public sector The result is a sophisticated and critical analysis of business practices and regulatory systems in the agro food sector Ecology of Practice A.Endre Nyerges,2016-01-20 First Published in 1998 The study of the origin development and diversity of the human diet is emerging as a coherent field that offers a much needed integrative framework for our contemporary knowledge of the ecology of food and nutrition This authoritative series of monographs and symposia volumes on the history and anthropology of food and nutrition is designed to address this need by providing integrative approaches to the study of various problems within the human food chain As a series it offers many unique opportunities for a wide range of scientists scholars and other professionals representing anthropology archaeology food history economics agriculture folklore nutrition medicine pharmacology public health and public policy to exchange important new knowledge discoveries and methods involved in the study of all aspects of human food ways *Global Forces and Local Life-Worlds* Ulrike Schuerkens,2010-09-17 How are global forces impacting on local lifestyles Where does the personal stand in relation to globalization *Global Forces and Local Life Worlds* explores these questions using a mixture of sociological and anthropological analysis and case study methods Demonstrating the tensions between retaining cultural integrity in the face of the levelling processes associated with modernity this book locates the problems of globalization and localization in the appropriate anthropological and sociological dimensions examines the relationship between culture and identity and explores the varieties of modernity Report of a Working Group on Forages L. Maggioni,1998 Participatory Approaches to the Conservation and Use of Plant Genetic Resources Esbern Friis-Hansen,Bhuwon Ratna Sthapit,2000 **Conservation Genetics in the Age of Genomics** George Amato,Rob DeSalle,Oliver A. Ryder,Howard C. Rosenbaum,2009-06-26 Genome sequencing enables scientists to study genes over time and to test the genetic variability of any form of life from bacteria to mammals Thanks to advances in molecular genetics scientists can now determine an animal s degree of inbreeding or compare genetic variation of a captive species to wild or natural populations Mapping an organism s genetic makeup recasts such terms as biodiversity and species and enables the conservation of rare or threatened species populations and genes By introducing a new paradigm for studying and preserving life at a variety of levels genomics offers solutions to previously intractable problems in understanding the biology of complex organisms and creates new tools for preserving the patterns and processes of life on this planet Featuring

a number of high profile researchers this volume introduces the use of molecular genetics in conservation biology and provides a historical perspective on the opportunities and challenges presented by new technologies It discusses zoo museum and herbarium based biological collections which have expanded over the past decade and covers the promises and problems of genomic and reproductive technology The collection concludes with the philosophical and legal issues of conservation genetics and their potential effects on public policy Plant Conservation Alan Charles Hamilton,Patrick Hamilton,2006 First Published in 2006 Routledge is an imprint of Taylor Francis an informa company **Plant Conservation** Alan Hamilton,2013-06-17 In this the latest in the People and Plants series plant conservation is described in the context of livelihoods and development and ways of balancing the conservation of plant diversity with the use of plants and the environment for human benefit are discussed A central contention in this book is that local people must be involved if conservation is to be successful Also examined are ways of prioritizing plants and places for conservation initiatives approaches to in situ and ex situ conservation and how to approach problems of unsustainable harvesting of wild plants Roles for botanists foresters sociologists development workers and others are discussed This book acts as a unifying text for the series integrating case studies and methodologies considered in previous volumes and pointing out in a comprehensive accessible volume the valuable lessons to be learned
