Seeds Of Famine:

Seeds of Famine Richard W. Franke,1992-12-03 SCOTT copy 2 From the John Holmes Library Collection *Seeds of Exchange* Maria Fedorova,2025-08-15 *Seeds of Exchange* examines the US and Soviet exchange of agricultural knowledge and technology during the interwar period Maria Fedorova challenges the perception of the Soviet Union as a passive recipient of American technology and expertise She reveals the circular nature of this exchange through official government bureaus amid anxious farmers in crowded auditoriums in cramped cars across North Dakota and Montana and by train over the once fertile steppes of the Volga Amid the post World War I food insecurity Soviet and American agricultural experts relied on transnational networks bridging ideological differences As Soviets traveled across the US agricultural regions and Americans plowed steppes in the southern Urals and the lower Volga both groups believed that innovative solutions could be found beyond their own national borders Soviets were avidly interested in American technology and American agricultural experts perceived the Soviet Union to be an ideal setting for experimenting with and refining modern farm systems and organizational practices As *Seeds of Exchange* shows agricultural modernization was not the exclusive domain of Western countries *Censored 2001* Peter Phillips,Project Censored,2001-04-03 The yearly volumes of *Censored* in continuous publication since 1976 and since 1995 available through Seven Stories Press is dedicated to the stories that ought to be top features on the nightly news but that are missing because of media bias and self censorship The top stories are listed democratically in order of importance according to students faculty and a national panel of judges Each of the top stories is presented at length alongside updates from the investigative reporters who broke the stories Beyond the Top 25 stories additional chapters delve further into timely media topics The *Censored News and Media Analysis* section provides annual updates on Junk Food News and News Abuse *Censored* D j Vu signs of hope in the alternative and news media and the state of media bias and alternative coverage around the world In the *Truth Emergency* section scholars and journalists take a critical look at the US NATO military industrial media empire And in the *Project Censored International* section the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world A perennial favorite of booksellers teachers and readers everywhere *Censored* is one of the strongest life signs of our current collective desire to get the news we citizens need despite what Big Media tells us A Dictionary of the Economic Products of India: Dacrydium to Gordonia Sir George Watt,1890 Baobab John Rashford,2023-06-28 Modern humans descendants of a founding population that separated from chimpanzees some five to eight million years ago are today the only living representative of a branching group of African apes called hominins Because of its extraordinary size and shape the baobab *Adansonia digitata* L has long been identified as the most striking tree of Africa s mosaic savanna the landscape generally regarded as the environment of hominin evolution This book makes the case for identifying the baobab as the tree of life in the hunter gatherer adaptation that was the economic foundation of hominin

evolution The argument is based on the significance of the baobab as a resource rich environment for the Hadza of northeastern Tanzania who continue to be successful hunter gatherers of the African savanna **Seeds** Carolyn Fry, 2016-04-05 From the magnificence of a towering redwood to the simple elegance of a tiny dandelion seed bearing plants abound on planet Earth The sheer diversity of plants thriving today is largely thanks to the evolution of the seed as this made plants resilient to environmental changes by enabling them to await optimum conditions for growth before springing to life In a time of declining biodiversity studying seeds is now helping scientists preserve this plant diversity for future generations With **Seeds** Carolyn Fry offers a celebration of these vital but unassuming packages of life She begins with a sweeping tour through human history designed to help us understand why we should appreciate and respect these floral parcels Wheat corn and rice she reminds us supply the foundations of meals eaten by people around the world Countless medicines oils clothing materials and building supplies are available only because of the versatility and variety of seed bearing plants Fry then provides a comprehensive history of the evolution of seeds explaining the myriad ways that they have adapted survived and thrived across the globe Delving deeper into the science of seeds she reveals the fascinating processes of dormancy reproduction germination and dispersal and showcases the estimable work conservationists are doing today to gather and bank seeds in order to prevent species from going extinct Enriched by a stunning array of full color images **Seeds** offers a comprehensive exploration of some of the most enduring and essential players in the natural world **Native American Food Plants** Daniel E. Moerman, 2010-10-27 Based on 25 years of research that combed every historical and anthropological record of Native American ways this unprecedented culinary dictionary documents the food uses of 1500 plants by 220 Native American tribes from early times to the present Like anthropologist Daniel E Moerman s previous volume *Native American Medicinal Plants* this extensive compilation draws on the same research as his monumental *Native American Ethnobotany* this time culling 32 categories of food uses from an extraordinary range of species Hundreds of plants both native and introduced are described The usage categories include beverages breads fruits spices desserts snacks dried foods and condiments as well as curdling agents dietary aids preservatives and even foods specifically for emergencies Each example of tribal use includes a brief description of how the food was prepared In addition multiple indexes are arranged by tribe type of food and common names to make it easy to pursue specific research An essential reference for anthropologists ethnobotanists and food scientists this will also make fascinating reading for anyone interested in the history of wild and cultivated local foods and the remarkable practical botanical knowledge of Native American forbears *An Economic History of Famine Resilience* Jessica Dijkman, Bas van Leeuwen, 2019-09-18 Food crises have always tested societies This volume discusses societal resilience to food crises examining the responses and strategies at the societal level that effectively helped individuals and groups to cope with drops in food supply in various parts of the world over the past two millennia Societal responses can be coordinated by the state the market or civil society Here it is shown that it was often a combined

effort but that there were significant variations between regions and periods The long term comparative perspective of the volume brings out these variations explains them and discusses their effects on societal resilience This book will be of interest to advanced students and researchers across economic history institutional economics social history and development studies *The Tropical Agriculturalist* ,1908 **The Agricultural Ledger** ,1907 **At the Desert's Green Edge** Amadeo M. Rea,2016-06 Winner of the Society for Economic Botany s Klinger Book Award this is the first complete ethnobotany of the Gila River Pima presented from the perspective of the Pimas themselves **Seeds** ,1946 **Seed World** ,1925 **Annual Report** Mysore (India : State). Department of Agriculture. Agricultural chemist,1901 *Censored* ,2001 **Annual Report** Bombay (India : State). Dept. of Agriculture,1916 War on Hunger ,1970 **Soviet Russia** ,1922 **Tropical Agriculturist** ,1908 **Ecofeminism** Jytte Nhanenge,2011-04-01 Ecofeminism is for those who desire to improve their understanding of the current crises of poverty environmental destruction violence and human rights abuses and their causes It is an ecofeminist analysis of modern society s dualized patriarchal structure showing that one sided reductionist masculine and quantitative yang perceptions inform science economics and technology resulting in subordination of holistic feminine and qualitative yin values This yin yang imbalance manifests as patriarchal domination of women poor people and nature leading to the above crises Since similar values inform Third World Development its activities are also exploitative Thus rather than improving human well being development increases poverty and natural degradation in the South Modern patriarchy manifests in neo liberal policies that promote free global economic markets and trades generating huge profits to the political and economic elites with devastating results for societies and nature worldwide Unless we increase our awareness and demand changes that balance the yang and yin forces patriarchal domination will eradicate life on planet Earth
