Mass Media and Social Change Elihu Katz, Tamás Szecskő, 1981 *Mass Media and Social Change* Elihu Katz, Tamás Szecskő, 1981 **The Mediatization of Culture and Society** Stig Hjarvard, 2013-03-12 Mediatization has emerged as a key concept to reconsider old yet fundamental questions about the role and influence of media in culture and society In particular the theory of mediatization has proved fruitful for the analysis of how media spread to become intertwined with and influence other social institutions and cultural phenomena like politics play and religion This book presents a major contribution to the theoretical understanding of the mediatization of culture and society This is supplemented by in depth studies of The mediatization of politics From party press to opinion industry The mediatization of religion From the faith of the church to the enchantment of the media The mediatization of play From bricks to bytes The mediatization of habitus The social character of a new individualism Mediatization represents a new social condition in which the media have emerged as an important institution in society at the same time as they have become integrated into the very fabric of social and cultural life Making use of a broad conception of the media as technologies institutions and aesthetic forms Stig Hjarvard considers how characteristics of both old and new media come to influence human interaction social institutions and cultural imaginations Institutional Change in the Public Sphere Fredrik Engelstad, Håkon Larsen, Jon Rogstad, Kari Steen-Johnsen, 2017-04-24 The main focus of the book is institutional change in the Scandinavian model with special emphasis on Norway There are many reasons to pay closer attention to the Norwegian case when it comes to analyses of changes in the public sphere In the country's political history the arts and the media played a particular role in the processes towards sovereignty at the beginning of the 20th century On a par with the other Scandinavian countries Norway is in the forefront in the world in the distribution and uses of Internet technology As an extreme case the most corporatist society within the family of the Nordic Model it offers an opportunity both for intriguing case studies and for challenging and refining existing theory on processes of institutional change in media policy and cultural policy It supplements two recent important books on political economy in Scandinavia *Varieties of Liberalization* and *The New Politics of Social Solidarity* Kathleen Thelen 2014 and *The Political Construction of Business Interests* Cathie Jo Martin and Duane Swank 2013 There are further reasons to pay particular attention to the Scandinavian and more specifically the Norwegian cases i They are to varying degrees neo corporatist societies characterized by ongoing bargaining over social and political reform processes From a theoretical perspective this invites reflections which to some extent are at odds with the dominant conceptions of institutional change Neither models of path dependency nor models of aggregate incremental change focus on the continuous social bargaining over institutional change ii Despite recent processes of liberalization common to the Western world as a whole corporatism implies a close connection between state public sphere cultural life and religion This also means that institutions are closely bundled in an even stronger way than assumed for example in the *Varieties of Capitalism*

literature Furthermore we only have scarce insight in the way the different spheres of corporatism are connected and interact In the proposed edited volume we have collected historical institutional case studies from a broad set of social fields a detailed outline of contents and contributors is attached Critical assessments of Jürgen Habermas theory of the public sphere Can the public sphere be considered an institution The central position of the public sphere in social and political change in Norway Digital transformations and effects of the growing PR industry on the public sphere Institutionalization of social media in local politics and voluntary organizations Legitimation work in the public sphere freedom of expression and warning in the workplace Return of religion to the public sphere and its effects *Current Sociology*, 1952 Vols 1-4 contain v 1-4 of International bibliography of sociology Media Effects and Beyond Karl Erik Rosengren, 2005-09-27 An analysis of the use and effects of television video and music where the consumer is not seen as a passive object but as an active subject

state of social science with a focus on how this development has been shaped in response to problems of social suffering Following a line of criticism offered by key social theorists and cultural commentators who themselves were unhappy with the professionalization of social science Wilkinson and Kleinman provide a critical commentary on how studies of society have moved from an original concern with social suffering and its amelioration to dispassionate inquiries The authors demonstrate how social action through caring for others is revitalizing and remaking the discipline of social science and they examine the potential for achieving greater understanding through a moral commitment to the practice of care for others In this deeply considered work Wilkinson and Kleinman argue for an engaged social science that connects critical thought with social action that seeks to learn through caregiving and that operates with a commitment to establish and sustain humane forms of society **Citizenship and Participation in the Information Age** Manjunath Pendakur, Roma M.

Stacks, Michael B. Salwen, 2014-04-08 This volume provides an overview of communication study offering theoretical coverage of the broad scope of communication study as well as integrating theory with research To explicate the integration process the chapter contributors experts in their respective areas offer samples in the form of hypothetical studies published studies or unpublished research showing how theory and research are integrated in their particular fields The book will appeal to graduate students and faculty members who want a thorough overview of not only the field but also sample research stemming from its various component parts *Inside the Mechanisms of Romanian*

Modernization Florin Grancea, 2006-09-05 This book analyzes in the relation with the Romanian modernity the transformations of the Romanian public sphere political system and journalism from the beginning of the 19th Century up to 2005 The argumentation starts from the idea that the Romanian Enlightenment never had the chance to reach its purpose the creation of the individual as a human category As a consequence of this historical fact the Romanian modernity was not explored in all its dimensions and was not congruent with its western model of development Only after late 90 s signs for a surpassing historical backwardness were seen in Romania and only after the integration into EU become sure From this perspective this book looks onto the change in the modernization engine of Romania in late 90 s This change is happening as a transgression from a three steps modernization model in which the role of the elite is central to a two steps modernization model in which the role of the elite is minimal Because the three steps modernization model fits the idea of an acclamatory public sphere while the two steps modernization engine fits the concept of civil public sphere this book proves that the Romanian democracy is evolving from its totalitarian background to become a participative democracy The only question unanswered yet is if the elite and the mass media are willing to let Romania and its citizens to breakup the ties with the totalitarian past
