Monessen A Typical Steel Country Town:

Monessen Cassandra Vivian,2002 Once a Native American hunting ground the industrial melting pot of Monessen in western Pennsylvania rises over a horseshoe bend in the Monongahela River Established in 1898 this powerhouse town boomed for close to 60 years producing vast amounts of steel and other crucial industrial materials Known for its cultural diversity Monessen s predominantly immigrant population with the highest naturalization rate in the United States at the turn of the twentieth century and the vibrant neighborhoods they established were entirely sustained by the local mills The battles for decent pay job protection benefits and an 8 hour day kindled fiercely for decades until Monessen and towns like it in the Monongahela Valley gave the average person a dignity denied them for centuries decent pay for decent work Families thrived Children went to college It was the American dream Then neighborhoods began to unravel foreign imports stole jobs and finally the mills the only support of the town closed Demonstrating their unyielding spirit Monessen residents have struggled to fight for the recovery and rebirth of their hometown In this new history *Monessen A Typical Steel Country Town* informative narrative highlights the rapid expansion and gradual demise of a society built almost solely on its industrial endeavors and recounts how a disjointed populace has come together to restore their proud community Over 100 striking photographs depict the dominating presence of the mills the quiet faces of the people who toiled there scenes of daily life and memorable events through the years as well as the dramatic changes that have marked Monessen s unique history

Postcard America Jeffrey L. Meikle,2016-01-20 This illustrated history of the colorized linen postcards of the 1930s and 40s is an incredible tour A veritable treasure trove of American culture Crave Online From the Great Depression through the early postwar years any postcard sent in America was more than likely a linen card Colorized in vivid often exaggerated hues and printed on card stock embossed with a linen like texture linen postcards celebrated the American scene with views of majestic landscapes modern cityscapes roadside attractions and other notable features These colorful images portrayed the United States as shimmering with promise quite unlike the black and white worlds of documentary photography or Life magazine Linen postcards were enormously popular with close to a billion printed and sold Postcard America offers the first comprehensive study of these cards and their cultural significance Drawing on the production files of Curt Teich Co of Chicago the originator of linen postcards Jeffrey L Meikle reveals how photographic views were transformed into colorized postcard images often by means of manipulation adding and deleting details or collaging bits and pieces from several photos He presents two extensive portfolios of postcards landscapes and cityscapes that comprise a representative iconography of linen postcard views For each image Meikle explains the postcard s subject describes aspects of its production and places it in social and cultural contexts In the concluding chapter he shifts from historical interpretation to a contemporary viewpoint considering nostalgia as a motive for collectors and others who are fascinated today by these striking images **Failure to Adjust** Edward Alden,2017-09-15 Americans know that something has gone wrong in this country s effort to prosper in the

face of growing global economic competition The vast benefits promised by the supporters of globalization and by their own government have never materialized for most Americans This book is the story of what went wrong and how to correct the course It is a compelling history of the last four decades of US economic and trade policies that have left Americans unable to adapt to or compete in the current global marketplace Failure to Adjust argues that despite the deep partisan divisions over how best to respond to America's competitive challenges there is achievable common ground on such issues as fostering innovation overhauling tax rules to encourage investment in the United States boosting graduation rates investing in infrastructure and streamlining regulations The federal government needs to become more like U S state governments in embracing economic competitiveness as a central function of government The book presents an especially timely analysis of the trade policies of the Obama administration and discusses how America can reassert itself as the leader in setting rules for international economic competition that would spread the benefits of global trade and investment more broadly **Hidden**

History of the Laurel Highlands Cassandra Vivian, 2014-11-04 History lies almost forgotten among the low mountains and quaint towns of Pennsylvania's Laurel Highlands Tales of Titanic survivors brilliant inventors and forgotten heroes are all a part of the region's dim past Since the 1790s the highlands have been home to a booming glass industry that spun out early windows and flasks and later beautifully cut pieces of art The wonder of the World's Fair of 1893 was none other than Westmoreland's H C Frick Coke Co's replica of a modern mine In the eighteenth and nineteenth centuries lush fields and meadows produced the country's finest whiskey Monongahela Rye Author Cassandra Vivian travels off the beaten path to explore the hidden history of the Laurel Highlands [The Last Great Strike](#) Ahmed White, 2016-01-04 In May 1937 seventy

thousand workers walked off their jobs at four large steel companies known collectively as Little Steel The strikers sought to make the companies retreat from decades of antiunion repression abide by the newly enacted federal labor law and recognize their union For two months a grinding struggle unfolded punctuated by bloody clashes in which police company agents and National Guardsmen ruthlessly beat and shot unionists At least sixteen died and hundreds more were injured before the strike ended in failure The violence and brutality of the Little Steel Strike became legendary In many ways it was the last great strike in modern America Traditionally the Little Steel Strike has been understood as a modest setback for steel workers one that actually confirmed the potency of New Deal reforms and did little to impede the progress of the labor movement However The Last Great Strike tells a different story about the conflict and its significance for unions and labor rights More than any other strike it laid bare the contradictions of the industrial labor movement the resilience of corporate power and the limits of New Deal liberalism at a crucial time in American history [The Mid Mon Valley](#) Cassandra Vivian, 2004 As the Monongahela River snakes north into Pennsylvania it twists into horseshoe bends and has few straight stretches Tucked into these curves are a series of small towns that represent America at its best The river which is one hundred and twenty eight miles long is divided into regions by local residents and the mid section encompassing the

communities of Brownsville California Belle Vernon Charleroi Monessen Donora and Monongahela is known as the Mid Mon Valley What unites this region in addition to a common landscape and common architecture is a heritage of ethnic pride industrial achievement and championship sports teams The Mid Mon Valley celebrates this history through a collection of striking postcards from the twentieth century *The National Road in Pennsylvania* Cassandra Vivian,2003 The history of America is written over every mile of the National Road in Pennsylvania The original National Road can be traced to Native American trails George Washington Gen Edward Braddock and James Burd converted portions of Native American trails into a roadway suitable for military purposes and westward expansion Then came the National Road built in the early 1800s to accommodate increased traffic traveling westward on the existing road It was the first federally built road in the United States Alternately called the National Pike and the Cumberland Road the National Road was overlaid by segments of U S Route 40 in the 1920s Today the National Road is designated as a National Scenic Byway as well as an All American Road From Addison to West Alexander The National Road in Pennsylvania contains images of important historic sites and towns on the ninety mile stretch of highway The defeat of Col George Washington s troops at Fort Necessity spawned the French and Indian War One of the most famous instigators of the Whiskey Rebellion David Bradford built his home alongside the National Road The first cast iron bridge in America was built on the National Road in Brownsville The road is flanked by toll houses coal mines historic taverns and automobile camps One will find images of an S bridge mile markers and memorials relating to the history of the area Henry Clay Frick and the Golden Age of Coal and Coke, 1870-1920 Cassandra Vivian,2020-04-09 Once the beehive coke oven was perfected in Fayette County Pennsylvania the coal and coke industry began to flourish and supply other fledgling industries with the fuel they needed to succeed The thrust of this growth came from Henry Clay Frick who opened his first coal mines in the Morgan Valley of Fayette County in 1871 There he helped lead the industry making it the major developmental force in industrial America This book traces the birth and growth of the early coal and coke industry from 1870 to 1920 primarily in Fayette and Westmoreland Counties Beyond Frick s importance to the industry other major topics covered in this history include the lives and struggles of the miners and immigrants who worked in the industry the growth of unions and the many strikes in the region and the attempts to clean the surrounding waterways from the horrific pollution that resulted from industrial development Perhaps the most significant fact is that this book uses primary sources contemporary with the golden age of the coal and coke industry That effort offers an alternative view and helps repair the common portrayal of Frick as corrupt by showing his work as that of an industrial genius **Monessen** Matthew Shorraw,2015 Nestled along a horseshoe curve of the Monongahela River in the Mid Monongahela Valley of southwestern Pennsylvania Monessen was settled in the mid 1800s though it was not formally established and named until 1898 then chartered as a city in 1923 Throughout the 20th century Monessen was known mainly for its industry especially steel and wire The city served as a site for Pittsburgh Steel until the decline of the steel industry That has not stopped the

caring and determined residents of Monessen from trying to recapture the vibrant culture of the city This book reflects on the history of the city through the second half of the 20th century showcasing how current residents have led Monessen into the 21st century F & L Primo ,2002
