**The Necessary Transition** Malcolm McIntosh, 2017-09-08 Life on Earth for humanity and our ecosystems is at a point of great change There is much to be learnt about previous great disruptions The key words are adaptation and transformation Most international companies operate across multiple social and environmental geographies so they know this intellectual and practical landscape And for many governments the challenges of social and environmental justice are also paramount not least because equitable societies are best for business and best for human well being The Necessary Transition addresses the many transitions taking place around the world from high to low carbon economies from gross inequality to egalitarianism from massive human rights abuses to socially just societies and from high corruption to societies with high social cohesion and integrity The book brings together leading international researchers and practitioners to share their knowledge and expertise and offers answers to many of the pressing questions that must be addressed in the journey towards a sustainable enterprise economy an absolutely necessary transition for humanity Contributors include Sara Parkin Founder Director and Trustee of the UK s Forum for the Future Bill Champion Managing Director Rio Tinto Coal Australia and Mark Swilling co author of Just Transitions and Academic Director of the Sustainability Institute South Africa The key question is Is a transition to a sustainable future possible within the logic of conventional capitalism and 20th century models of development This book provides radical perspectives from varying entry points and is essential reading for academics and practitioners interested in how we plan speed and scale such necessary transitions

**Earth Capitalism** Patrick Petit, 2017-09-29 Today a deepening global recession is causing economic hardships for all kinds of businesses Earth Capitalism attributes the crisis to inappropriate macroeconomic policies and excessive expansion of financial institutions in blind pursuit of profit lack of self discipline among financial institutions and the failure of supervision and regulation to keep up with financial innovations

Collectively these are some of the main causes of the current global economic malaise Petit argues that human greed and insatiability are the true source of disparities around the world Greed is the reason why we are depleting the Earth's natural resources and destroying its ecosystems He argues that instead a good life should be based on balanced give and take When we take something from society or the Earth we have to maintain a balance by giving something equivalent back Happiness is founded on gratitude for what one has and one should engage in an overall appraisal of life not what one lacks He believes the same principle should be applied to management of the Earth's natural resources and goods The current global crisis impels us to create a responsible capitalism one that benefits all living beings on this planet It reminds us to live a simpler life based on true well being and life satisfaction but simple living is not about living in poverty As its subtitle suggests Earth Capitalism's contributors present leading edge economic concepts business models and best practices that show the path toward creation of responsible capitalism a viable scenario emerging from the current global economic and financial crisis

*Cultural Crowdfunding* Vincent Rouzé,2019-11-29 This new book analyses the strategies usages and wider implications of crowdsourcing and crowdfunding platforms in the culture and communication industries that are reshaping economic organizational and social logics Platforms are the object of considerable hype with a growing global presence Relying on individual contributions coordinated by social media to finance cultural production and carry out promotional tasks is a significant shift especially when supported by morphing public policies supposedly enhancing cultural diversity and accessibility The aim of this book is to propose a critical analysis of these phenomena by questioning what follows from decisions to outsource modes of creation and funding to consumers Drawing on research carried out within the Collab programme backed by the French National Research Agency the book considers how platforms are used to organize cultural labour and or to control usages following a logic of suggestion rather than overt injunction Four key areas are considered the history of crowdfunding as a system whose interests crowdfunding may serve the implications for digital labour and lastly crowdfunding s interface with globalization and contemporary capitalism The book concludes with an assessment of claims that crowdfunding can democratize culture
