Wood, 2002-09-24 New England colonists Wood argues brought with them a cultural predisposition toward dispersed settlements within agricultural spaces called towns and villages Rarely compact in form these communities did however encourage individual landholding By the early nineteenth century town centers where meetinghouses stood began to develop into the center villages we recognize today Just as rural New England began its economic decline Wood shows romantics associated these proto urban places with idealized colonial village communities as the source of both village form and commercial success The First Mapping of America Alex Johnson, 2017-08-23 The First Mapping of America tells the story of the General Survey At the heart of the story lie the remarkable maps and the men who made them the commanding and highly professional Samuel Holland Surveyor General in

the North and the brilliant but mercurial William Gerard De Brahm Surveyor General in the South Battling both physical and political obstacles Holland and De Brahm sought to establish their place in the firmament of the British hierarchy Yet the reality in which they had to operate was largely controlled from afar by Crown administrators in London and the colonies and by wealthy speculators whose approval or opposition could make or break the best laid plans as they sought to use the Survey for their own ends

Main Street Revisited Richard V. Francaviglia, 1996-06 Popular culture Francaviglia looks sympathetically but realistically at the ways in which Main Street s image developed and persists He reaffirms that life can imitate art that the cherished icons surrounding Main Street have become the substance of popular culture Ultimately his book is about the material culture that architects town developers and image makers have left us as their legacy Seen through the lives of the visionaries who created them in their From Sea Charts to Satellite Images David Buisseret, 1990-06-22 The authors write authoritatively and crisply How to use maps in teaching is spelled out carefully but the authors also manage to sketch in the background of American mapping so the book is both a manual and a history Commentaries are sprinkled with stimulating new ideas for instance on how to use bird s eye views and country atlases in the classroom and there are didactic discussions on maps showing the walking city and the impact of the street car An extraordinarily wide range of maps is depicted which makes for good browsing pondering and close study This is a very good highly attractive and worthwhile book it will have great impact on the use of old and new maps in teaching As well this is a tantalizing survey of mapping the United States and will whet the appetites of students and encourage them to learn more about maps and their origins John Warketin
