Principles Of Modern Architecture:

Principles of Modern Architecture Christian Norberg-Schulz, 2000 Principles of Modern Architecture is a clear concise accessible account of what the modern movement really wanted and what it achieved by one of the world's leading architectural critics

Changing Ideals in Modern Architecture, 1750-1950 Peter Collins, 1998 Changing Ideals in Modern Architecture revolutionized the understanding of modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of Western intellectual history This new edition of Peter Collins's ground breaking study includes all seventy two illustrations of the original hard cover edition which has been out of print since 1967 and restores the large format

Idea, Form, and Architecture Egon Schirmbeck, 1987

Permanent Cornelius Müller, 2022-06-15

Modern Architecture and Other Essays Vincent Scully, 2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully's incalculable contribution 300 illustrations

Contemporary Architecture Marta Tobolczyk, 2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools

Arieh Sharon and Modern Architecture in Israel Eran Neuman, 2023-11-30 Arieh Sharon and Modern Architecture in Israel Building Social Pragmatism offers the first comprehensive survey of the work of Arieh Sharon and analyzes and discusses his designs and plans in relation to the emergence of the State of Israel A graduate of the Bauhaus Sharon worked for a few years at the office of Hannes Mayer before returning to Mandatory Palestine There he established his office which was occupied in its first years in planning kibbutzim and residential buildings in Tel Aviv After the establishment of the State of Israel in 1948 Arieh Sharon became the director and chief architect of the National Planning Department where he was asked to devise the young country's first national masterplan Known as the Sharon Plan it was instrumental in shaping the development of the new nation During the 1950s and 1960s Sharon designed many of Israel's institutions including hospitals and buildings on university campuses This book presents Sharon's exceptionally wide range of work and examines his perception of architecture in both socialist and pragmatist terms It also explores Sharon's modernist approach to architecture and his subsequent shift to Brutalist architecture when he partnered with Benjamin Idelson in the 1950s and when his son Eldar Sharon joined the office in 1964

Thus the book contributes a missing chapter in the historiography of Israeli architecture in particular and of modern architecture overall. This book will be of interest to researchers in architecture, modern architecture, Israel studies, Middle Eastern studies, and migration of knowledge.

Modern Architecture and Climate Daniel A. Barber, 2023-04-11

How climate influenced the design strategies of modernist architects. *Modern Architecture and Climate* explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture. Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available, Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control. He looks at projects by well known architects such as Richard Neutra, Le Corbusier, Licio Costa, Mies van der Rohe, and Skidmore, Owings and Merrill, and the work of climate focused architects such as M.M. Roberto, Olgay and Olgay, and Cliff May. Drawing on the editorial projects of James Marston Fitch, Elizabeth Gordon, and others, he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists, physicists, engineers, and social scientists. Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design. Extensively illustrated with archival material, *Modern Architecture and Climate* provides global perspectives on modern architecture and its evolving relationship with a changing climate, showcasing designs from Latin America, Europe, the United States, the Middle East, and Africa. This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today's zero carbon design.

Southern Vietnamese Modernist Architecture Mel Schenck, 2020-04-21

Southern Vietnamese Modernist Architecture features beautiful architectural photography that illustrates the outstanding accomplishment of the people of southern Vietnam in developing a mid-century modernist architecture that is extraordinary in the world. Especially for Americans, Vietnam has been a war instead of a country. The world didn't notice that the Vietnamese were simultaneously constructing modern apartment buildings, houses, large public buildings, and public housing as they developed a new nation. And the world didn't anticipate that this architecture would be so overtly modernist rather than an adaptation of traditional Vietnamese designs to the continuation of colonial architecture. In the mid-twentieth century, southern Vietnamese architects developed a version of modernist architecture that accommodated the tropical climate and reflected the identity of a newly independent culture. It demonstrates the innate sense of design of Vietnamese and it represented the outlook of the people of southern Vietnam as they looked towards the future even in the face of war. The vast quantity and quality of Vietnamese modernist buildings constructed throughout southern Vietnam made Vietnam an unrecognized center of modernism in the world. Most importantly, the southern Vietnamese as a culture embraced modernism and it became the vernacular architecture of the

culture for dwellings This architecture features an interplay between masses and voids that provides a much more vibrant version of modernist architecture This style fills the gaps between the functionalism of the International Style and the quest for identity and spirit that has been lacking in modernism worldwide American architect Mel Schenck is a long term immigrant to Vietnam and has been studying this architecture since he was surprised by the extent and quality of modernist architecture in Saigon when he first lived there in 1971 72 He and photographer Alexandre Garel accumulated a database of 400 buildings and 4 000 photographs in southern Vietnam to serve a comprehensive analysis of the history and characteristics of this distinctive architecture Architectural historians aficionados of modernist architecture and anyone interested in Vietnamese culture will find that this book is a positive story about Vietnamese aspirations for independence and the value of modernist architecture in living in the world today

Modern Architecture of the 1950s: A Decade of Change and Innovation Pasquale De Marco,2025-04-10 The 1950s was a transformative decade for architecture and design The end of World War II brought a sense of optimism and a desire for a fresh start and this was reflected in the new buildings and homes that were constructed during this time This book provides a comprehensive overview of the architecture and design of the 1950s It explores the major architectural styles of the decade the work of key architects and designers and the impact of social cultural and economic factors on the built environment The book is divided into ten chapters each of which focuses on a different aspect of architecture and design in the 1950s The chapters cover topics such as the rise of new architectural styles the influence of technology and materials the changing role of the architect and the impact of urban planning and development The book is lavishly illustrated with photographs and drawings making it an essential resource for anyone interested in this fascinating period in architectural history Whether you are an architect a designer or simply someone who appreciates good design this book is sure to inspire and inform you
