This open access book attempts to answer the question Why are so many severely mentally ill people homeless or incarcerated Updated since its original 1988 release this book tracks the history of this question in the United States The answer begins in 1955 when the United States deinstitutionalized the 559 000 patients who were in state mental hospitals Today only 35 000 remain In 1963 Congress funded President Kennedy's proposed federally funded Community Mental Health Centers CMHCs whose main purpose was to provide care for the patients being released from the hospitals However most of the CMHCs never did so but rather became counseling centers for individuals with less serious mental illnesses The lack of psychiatric aftercare for severely mentally ill individuals resulted in more than 200 000 of them who are homeless and more than 250 000 others who are in jails and prisons This story also includes little known details such as the role played by conscientious objectors who worked in the state hospitals during WWII Rosemary Kennedy's psychosis the influence of the conservative John Birch society on Presidents Nixon and Reagan and mental health myths incorrectly attributed to Reagan Finally the book discusses what needs to be done to improve the mental illness treatment system This is an ideal guide for psychiatrists psychologists and members of the public who are concerned about homelessness *Sullivan Revisited. Wells,Vincent J. Giannetti,2013-11-22 The last two decades have seen unprecedented increases in health care costs and at the same time encouraging progress in psychotherapy research On the one hand accountability cost effectiveness and efficiency have now become commonplace terms for providers of mental health services whereas on the other hand an increasingly voluminous literature has emerged supporting the effectiveness of a number of types of psychotherapies There now exists the possibility for the design and delivery of mental health services that drawing upon this literature more closely approximate empirically established data concerning the appropriateness and effectiveness of psychotherapy The Handbook of the Brief Psychotherapies is intended to capture one major thrust of this movement the development of a group of empirically grounded time limited therapies all sharing a common interest in the clinical utilization of a structured focus and an emphasis on time and action For many years professional self interest competing theoretical paradigms and the vagaries of practice wisdom and clinical myth have influenced the practice of psychotherapy A critical questioning of the resulting predominantly nondirective open ended and global therapies has led to a growing emphasis on action oriented problem focused time limited therapies Yet ironically this interest in the brief psychotherapies has not so much involved a radical departure from traditional therapeutic modalities as it has emphasized a new pragmatism about how time action and structure operate in life as well as in therapy
