target detection and discrimination capability Multiple Input and Multiple Output MIMO radar has generated significant attention and widespread interest in academia industry government labs and funding agencies This important new work fills the need for a comprehensive treatment of this emerging field Edited and authored by leading researchers in the field of MIMO radar research this book introduces recent developments in the area of MIMO radar to stimulate new concepts theories and applications of the topic and to foster further cross fertilization of ideas with MIMO communications Topical coverage includes Adaptive MIMO radar Beampattern analysis and optimization for MIMO radar MIMO radar for target detection parameter estimation tracking association and recognition MIMO radar prototypes and measurements Space time codes for MIMO radar Statistical MIMO radar Waveform design for MIMO radar Written in an easy to follow tutorial style MIMO Radar Signal Processing serves as an excellent course book for graduate students and a valuable reference for researchers in academia and industry

Principles and Practice of Radar, etc. (Third edition.). Harold Ernest PENROSE (and BOULDING (Reginald Sidney Henry)),Reginald Sidney Henry BOULDING,1950 *Signal Processing in Noise Waveform Radar* Krzysztof Kulpa,2013-07-01 This book is devoted to the emerging technology of noise waveform radar and its signal processing aspects It is a new kind of radar which use noise like waveform to illuminate the target The book includes an introduction to basic radar theory starting from classical pulse radar signal compression and wave radar The book then discusses the properties difficulties and potential of noise radar systems primarily for low power and short range civil applications The contribution of modern signal processing techniques to making noise radar practical are emphasized and application examples are given

Bistatic Radar Mikhail Cherniakov,2007-04-02 Bistatic radars have been a focus of study since the earliest days of radar research Despite this until recently only a few bistatic systems have crossed the experimental study threshold and consequently there is little knowledge about them compared with their monostatic counterparts Now there is a fast growing interest in bistatic radar due to its importance in the development of defence remote sensing aerospace meteorological and navigation application fields as well as its unique peculiarities These include covert operational ability relevant to the receiver position counter stealth ability and a potentially reduced cost as one transmitter can be used to send information to several receivers With contributions from international experts working with bistatic radar this book provides an introduction to the technology covering information on basic principles and design Starting with a detailed look at monostatic radar examining the development of the field as a whole the book then goes on to introduce the classical aspects of bistatic radar such as geometry power budget and resolution present an in depth analysis of bistatic scattering of electromagnetic waves provide an overview of the bistatic radar potential which follows from their bistatic nature discuss forward scattering radar investigate forward scattering radar for air targets detection and tracking set out an experimental study of real world forward scattering radar Bistatic Radar Principles and Practice gives an up to date overview of this important technology for practising engineers and researchers involved in the design and

implementation of bistatic radar in a range of industries It is also a valuable reference for advanced students taking special courses in radar technology

Principles of Modern Radar Jerry Eaves, Edward Reedy, 2012-12-06 This book *Principles of Modern Radar* has as its genesis a Georgia Tech short course of the same title This short course has been presented annually at Georgia Tech since 1969 and a very comprehensive set of course notes has evolved during that seventeen year period The 1986 edition of these notes ran to 22 chapters and all of the authors involved except Mr Barrett were full time members of the Georgia Tech research faculty After considerable encouragement from various persons at the university and within the radar community we undertook the task of editing the course notes for formal publication The contents of the book that ensued tend to be practical in nature since each contributing author is a practicing engineer or scientist and each was selected to write on a topic embraced by his area s of expertise Prime examples are Chaps 2 5 and 10 which were authored by E F Knott G W Ewell and N C Currie respectively Each of these three researchers is recognized in the radar community as an expert in the technical area that his chapter addresses and each had already authored and published a major book on his subject Several other contributing authors including Dr Bodnar Mr Bruder Mr Corriher Dr Reedy Dr Trebits and Mr Scheer also have major book publications to their credit

Multi-Antenna Synthetic Aperture Radar Wen-Qin Wang, 2017-07-12 Synthetic aperture radar SAR is a well known remote sensing technique but conventional single antenna SAR is inherently limited by the minimum antenna area constraint Although there are still technical issues to overcome multi antenna SAR offers many benefits from improved system gain to increased degrees of freedom and system flexibility Multi Antenna Synthetic Aperture Radar explores the potential and challenges of using multi antenna SAR in microwave remote sensing applications These applications include high resolution imaging wide swath remote sensing ground moving target indication and 3 D imaging The book pays particular attention to the signal processing aspects of various multi antenna SAR from a top level system perspective Explore Recent Extensions of Synthetic Aperture Radar Systems The backbone of the book is a series of innovative microwave remote sensing approaches developed by the author Centered around multi antenna SAR imaging these approaches address specific challenges and potential problems in future microwave remote sensing Chapters examine single input multiple output SIMO multi antenna SAR including azimuth and elevation multi antenna SAR and multiple input multiple output MIMO SAR The book details the corresponding system scheme signal models time phase spatial synchronization methods and high precision imaging algorithms It also investigates their potential applications Introductory Tutorials and Novel Approaches in Multi Antenna SAR Imaging Rigorous and self contained this is a unique reference for researchers and industry professionals working with microwave remote sensing SAR imaging and radar signal processing In addition to novel approaches the book also presents tutorials that serve as an introduction to multi antenna SAR imaging for those who are new to the field

Bistatic Radar Mikhail Cherniakov, 2008-10-13 The impact of bistatic radar technology on remote sensing is increasing as bistatic systems cross the theoretical threshold into practical

embodiment The wide spectrum of radar applications including space exploration defence transport aerospace and meteorology provides persistent impetus for this progress This book is dedicated to the more advanced studies in bistatic radar which are currently the subject of intensive research activity and development With contributions from the leading experts in the field of bistatic radar research this book collates the latest developments in the field focusing particularly on bistatic synthetic aperture radar BSAR and passive bistatic radar systems PBRs Within these two areas the text addresses the main BSAR topologies spaceborne BSAR airborne BSAR and space surface BSAR analyses the resurgent interest in and practical applications of PBRs introduces passive BSAR technology covers research of systems used in aircraft detection and tracking and passive radar remote sensing of the ionosphere and the upper atmosphere Bistatic Radar Emerging Technology is an invaluable resource for practising engineers and researchers involved in the design and implementation of advanced bistatic radar systems in aerospace communications defence transport and meteorology Following on from Bistatic Radar Principles and Practice it is also a comprehensive reference on the latest research for postgraduate students taking specialist courses in radar technology

Principles and Practice of Radars H.E. Penrose,R.S.H. Boulding,1949 Aerospace Technologies and Applications for Dual Use Pietro Finocchio,Ramjee Prasad,Marina Ruggieri,2022-09-01 The events occurred in the last years have shown how the threat related to both intentional and natural disasters could bring the civil and the military worlds closer in the conceivment and deployment of countermeasures as well as in the identification of effective strategies for enhancing the Planet safety and security In this frame the concept of dual use the set of technologies and applications that can be exploited for both civil and military purposes becomes a key topic In addition the aerospace is a strategic building block in the deployment of a network centric environment that aims at the global protection of the mankind Aerospace is also a natural environment for dual use many of the related enabling technologies have been first developed for the military world and then applied to civil including commercial purposes On September 12 14 2007 an International Symposium has been held in Roma Italy joining the dual use approach with the aerospace technology the international community has been gathered around the key topic aerospace technologies and applications for dual use The event has called experts and operators from the military and civil community belonging to industry scientific and governmental institutions The common aim was an effective convergence between the available and perspected technologies for the civil and military worlds as well as the conceivment of applications that can take the maximum benefit from the dual approach optimizing the available economic resources The Symposium has included invited only contributions and an industrial panel The main results of the Symposium derived from key note speeches invited lectures panel discussions and conclusions have created the starting material to develop this Edited Book
