Herbert, John A. Matthews, 2004-08-05 It can be argued that the differences in content and approach between physical and human geography and also within its sub disciplines are often overemphasised The result is that geography is often seen as a diverse and dynamic subject but also as a disorganised and fragmenting one without a focus Unifying Geography focuses on the plural and competing versions of unity that characterise the discipline which give it cohesion and differentiate it from related fields of knowledge Each of the chapters is co authored by both a leading physical and a human geographer Themes identified include those of the traditional core as well as new and developing topics that are based on subject matter

concepts methodology theory techniques and applications Through its identification of unifying themes the book will provide students with a meaningful framework through which to understand the nature of the geographical discipline Unifying Geography will give the discipline renewed strength and direction thus improving its status both within and outside geography *Themes in Biogeography* J. A. Taylor, 2019-10-01 Originally published in 1984 Themes in Biogeography presents a broad examination of biogeographical themes extending across the field of plant and animal ecology and geography The book provides a detailed and unique investigation into life and its environment and delves into not just geography and ecology but provides an interdisciplinary look at these areas across both biological and environmental sciences The book examines biogeographical themes applying them to areas of research in soils and climate change as well as in depth studies of plant communities and their animal associates The book also discusses plants and animals through their taxonomic distribution and deals with factors of plant geography using both global and regional examples This book will be of interest to biologists ecologists and geographers alike **Environmental Systems** I.
