

ART PRINCIPLES

THE MEANS AN ARTIST USES TO ORGANIZE ELEMENTS WITHIN A WORK OF ART

Balance

Refers to how well the elements are applied in a visual composition as in "distribution of visual weight"
Major types are symmetrical and asymmetrical

Movement

Creates different effects that lead the viewer's gaze around the work of art making it more interesting & engaging

Rhythm

A principle of design that indicates movement, created by the careful placement of repeated elements in a work of art to cause a visual tempo or beat

Variety

A principle of design concerned with diversity or contrast. Variety is achieved by using different shapes, sizes, and/or colors in a work of art

Emphasis

Draws a viewer's attention to the main subject matter of focal point. Done by combining elements to stress the differences between those elements

Proportion

This depicts the size differences between parts of a subject and to the whole artwork

Unity

When components of composition are perceived as harmonious, giving the artwork a sense of completion

Pattern

This relates to sequences or arrangements of different motifs that can be for decoration or to create movement, or other effects

SCHOOL OF ATHENS BY RAPHAEL

The 4 arches right down the center of the artwork create symmetry or balance

There are a variety of shapes, sizes, color, lines (straight, curved, angled, thick, thin)

Harmonious as the elements are applied similarly throughout. The four arches, the gold colors, 3-dimensional shapes, texture on walls and people's clothing, active space all give this artwork a sense of unity

The size of the people in relation to the building is proportionate

Patterns are found throughout the art piece also creates rhythm as it's arranged in a way that leads the viewer's gaze along the artwork

The two main characters are placed in the center of the picture and have a different background as the others. The sky provides contrast, thus creating an emphasis

Writing David Carrier, 1991 *Principles of Art History Writing* traces the changes in the way in which writers about art represent the same works These differ in such deep ways as to raise the question of whether those at the beginning of the process even saw the same things as those at the end did Carrier uses four case studies to identify and explain changing styles of restoration and the history of interpretation of selected works by Piero Caravaggio and van Eyck Back cover

Principles of Art History Heinrich Wölfflin, 2015-05-07 *Principles of Art History* by Heinrich Wölfflin 1864 1945 a revolutionary attempt to construct a science of art through the study of the development of style has been a foundational work of formalist art history since it was first published in 1915 At once systematic and subjective and remarkable for its compelling descriptions of works of art Wölfflin's text has endured as an accessible yet rigorous approach to the study of style Although Wölfflin applied his analysis to objects of early modern European art *Principles of Art History* has been a fixture in the theoretical and methodological debates of the discipline of art history and has found a global audience With translations in twenty four languages and many reprints Wölfflin's work may be the most widely read and translated book of art history ever This new English translation appearing one hundred years after the original publication returns readers to Wölfflin's 1915 text and images It also includes the first English translations of the prefaces and afterword that Wölfflin himself added to later editions Introductory essays provide a historical and critical framework referencing debates engendered by *Principles* in the twentieth century for a renewed reading of the text in the twenty first The Global Reception of Heinrich Wölfflin's Principles of Art History Evonne Levy, Tristan Weddigen, 2020 Perspectives on a book that changed ways of thinking and writing about art around the world **Principles of art history, by heinrich wölfflin** Heinrich Wölfflin, 1929

Principles of Art History Robin George Collingwood, 1938 *Architectural Aesthetic Speculations* Jasper Michael, 2016-11-01 *Architectural Aesthetic Speculations* expands our understanding of the role of formal aesthetic criteria in

twentieth century artistic practices and reveals potentially transformative aspects in the art of architectural composition The book stages an encounter of philosopher Gilles Deleuze's 1925 1995 constructivist sensibility and architect Louis Kahn's 1901 1974 mode of architectural figuration This book is of interest to architects artists historians and theorists and to those wishing to learn about contemporary aesthetic practice and theory

The Baroque in Architectural Culture, 1880-1980
 Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture
