Inhaltsangabe Abstract Worldwide political and economic changes within the last two decades opened the way to increased globalisation The existence of multinational organisations together with their increasing power and influence put a threat on the political and social system Against this background the social responsibilities of companies together with their social reporting practice must be re examined in order to guarantee transparency and equality between all members of society The following work compares the social reporting practice of two European countries Ireland and Germany As it is not possible to conduct a representative analysis within the limiting framework of this paper the annual reports of Fyffes and the Douglas Holding AG issued in the same year 2002 are analysed and compared Two Interviews were also conducted in order to show additional opinions of the current reporting practice To describe social reporting the underlying idea which is corporate social responsibility is presented at first Different theoretical approaches to the concept of social reporting are introduced as well as a few operational models The legal accounting framework of the two countries is also briefly introduced in order to show possible mandatory elements of social reporting within the legal system The conclusion of this paper shows that both companies report very little on their corporate social responsibility due to various reasons Both interviewees support this finding and give additional explanations As mentioned above this research is not representative concerning the Irish and German social reporting practice in general and therefore is limited in its conclusions Inhaltsverzeichnis Table of Contents List of abbreviationsiv List of figuresvi List of tablesvii Abstract1 Introduction2 1 CORPORATE SOCIAL RESPONSIBILITY4 1 1Historical Perspective4 1 1 1The Origin4 1 1 2The changing scope of Corporate Responsibilities5 1 1 3The introduction of the term Corporate Social Responsibility 5 1 2Definition6 1 2 1Different schools of thought6 1 2 2Carroll s Model of CSR7 1 3Stakeholder Approach9 1 3 1The Business Environment9 1 3 2Framework of Stakeholder Pressure10 1 4Summary13 2 SOCIAL REPORTING15 2 1Why Social Reporting 15 2 1 1What does accountability mean 15 2 1 2Limitations of traditional accounting16 2 1 3Justifications for additional disclosures17 2 2Definition of Social **Genetic Technology and Food**

**Safety** Roland Norer,2015-12-17 The volume gives an overview on how legislators all over the world have come up with different legal solutions for governing genetically modified organisms GMOs and food security and provides a compact summary of the existing regulations in this field In a comparative legal approach a general report analyses and compares these various national and supranational legal systems It closely follows the newest developments at the interface between genetic engineering law and food law The emergence of a new technology usually leads to fundamental questions as to how the law should respond to it The regulation of genetically modified organisms is a prime example they have been discussed

controversially ever since they were subject of legislation and regulation In particular this applies to the use of GMOs in food production There is a variety of interesting legislations and a differentiated width of legal frameworks on international supranational EU and national level to be found The different regulations that thereby came to light are evidence of the various opinions and policies the societies and states have developed on this matter It is this variety of regulations the volume examines primarily on the basis of national reports that were handed in concerning the topic of genetic technology and food security at the occasion of the XIX International Congress of Comparative Law *Cambridge Yearbook of European Legal Studies Vol 1, 1998* Alan Dashwood, Angela Ward, 1999-09-23 Scrutinizes issues in EU Law the law of the Council of Europe and Comparative Law which have come to the fore during the year preceding publication **Principle and Policy in Contract Law** Stephen Waddams, 2011-08-18 Although presented as being derived from the past principles in contract law have been subject to constant reformulation thereby facilitating legal change while simultaneously seeming to preclude it Principle and policy have been mutually interdependent propositions not usually being called principles unless they have been perceived to lead to just results in particular cases and as likely to produce results in future cases that accord with common sense commercial convenience and sound public policy The influence of policy has been frequent in contract law but Stephen Waddams argues that an unmediated appeal to non legal sources of policy has been constrained by the need to formulate generalised propositions recognised as legal principles This interrelation of principle and policy has played an important role in enabling an uncoded system to hold a middle course between a rigid formalism on the one hand and an unconstrained instrumentalism on the other **Saturday Review**, 1878 Essential Cases on Damage Benedict Winiger, Helmut Koziol, Bernhard A. Koch, Reinhard Zimmermann, 2011-11-30 The increasing Europeanisation of the law of delict torts has produced textbooks casebooks monographs and also sets of model rules of a genuinely European character A major gap still existing today relates to the experiences gathered in the national legal systems over the past decades The present work attempts to fill this gap for one key element of tort law the notion of damage It thus does what the previous volume in the Digest of European Tort Law series did for another key element ie natural causation Once again the publication contains a selection of the most important cases decided in 26 states across Europe as well as by the European Court of Justice For each case the facts and the relevant court decision are presented and the decision is analysed within the wider context of the development of the respective legal system In addition the editors provide comparative analyses of the case law reported in this volume concerning all the specific problems raised under the heading of damage The publication also looks into how key cases would be resolved under the European model rules drafted in the field of tort law and it also highlights cases from earlier periods of legal history The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national

codifications European legislation and the modern model rules      **Human Rights and Corporations** David  
Kinley, 2017-05-15 The erstwhile unlikely coupling of human rights and corporations is now a typical feature of corporate  
community relations High profile corporate infringements of human rights the rise and rise of corporate social responsibility  
CSR and on going efforts to regulate corporate behaviour through legal regimes at both domestic and international levels  
have spawned a mountain of academic literature and commentary This volume assembles the leading essays from this body  
of work Together they frame the relationship between human rights and corporations by charting its history and salient  
features tackle the conceptual perspectives of the relationship and detail the practice problems and potential of the  
relationship      **The Elements of Roman Law Summarized** Seymour Frederick Harris, 1875
