Roger C. Griffin,2012-03-29 Since the first edition of Principles of Packaging Development was published the packaging industry has undergone many profound changes These have included the virtual elimination of cellophane and its replacement with oriented polypropylene as a carton overwrap fluid milk in blow molded HDPE bottles PET beverage bottles cookie bags and cartons lined with polyolefin coextrusions instead of waxed glassine and bread in reclosable polyolefin and coextruded film bags New phrases have also worked their way into the lexicon of the practicing packaging technologist such as child resistance and tamper evident This most popular text on packaging demanded updating How these phrases and ideas have affected the industry in the 1980s and how they will probably alter its course in the future are treated New concepts of packaging system planning and forecasting techniques are intruding into package management and new chapters will introduce them to the reader The years have added a certain degree of maturity to the packaging industry Not only have the original authors broadened their perspectives and changed professional responsibilities we have also included a third co author Dr Aaron L Brody whose experience in the industry academic background and erudite insights into the very nature of packaging have added an unparalleled degree of depth to this book We would like to thank David L

Griffin, Jr. and Stanley Sacharow, in Collaboration With Specialists** Roger C. Griffin,1972    **The Packaging User's Handbook** Frank A. Paine,2012-12-06 The first version of this book Packaging Materials and Containers was published in 1967 and was revised extensively ten years later under the title The Packaging Media Some thirty or so authors were involved in producing the initial texts for these books and I must acknowledge their material much of which is still valid It is

now thirteen years since The Packaging Media high time to take stock and incorporate the considerable advances in materials forms techniques and machinery that have taken place In 1977 wherever possible we asked the original authors to carry out the revisions but retirements and job changes have now eliminated over twenty of the original authors We have therefore appointed an Editorial Board to advise on this more extensive revision and I wish to thank them for their detailed and helpful assistance Dr C J Mackson and Professor Y Dagel for general comments and guidance on the overall plan and in particular the Introduction chapter 1 Graham Gordon and Harri Mostyn for assistance with much of Part D on Distribution Packages and Dennis Hine and Susan Selke for their work in respect of paperboard and plastics retail packaging respectively A major contribution was made by the seventh member of the Editorial Board David Osborne who advised in the area of glass

*Principles of Aseptic Processing and Packaging* Philip E.
