Kerstein,2002-05-02

At the core of Kant's ethics lies the claim that if there is a supreme principle of morality then it cannot be a principle based on utilitarianism or Aristotelian perfectionism or the Ten Commandments The only viable candidate for such a principle is the categorical imperative This book is the most detailed investigation of this claim It constructs a new critical reading of Kant's derivation of one version of the categorical imperative the Formula of Universal Law This reading shows this derivation to be far more compelling than contemporary philosophers tend to believe It also reveals a novel approach to deriving another version of the categorical imperative the Formula of Humanity a principle widely considered to be the most attractive Kantian candidate for the supreme principle of morality This book will be important not just for Kant scholars but for a broad swathe of students of philosophy **International Human Rights** Philip Alston,Ryan Goodman,2013 The successor to

Health Telematics for Clinical Guidelines and Protocols Colin Gordon,J. P. Christensen,1995 Guidelines for clinical practice sometimes also termed practice policies receive increasing attention from clinicians and health services as means for applying best current knowledge to maximise the quality and efficiency of delivered care Earlier studies confirm the growing and widespread importance of this trend within medicine and the widely recognised potential for healthcare telematics as a means to enable the use of clinical guidelines to deliver fullest benefits to patients This book explores the scope and needs for further work in this area Listed by Biological Abstracts RRM BIOSIS volume 47 issue 4 April 1994 the papers presented are wide ranging such that anyone with an interest in any aspect of guideline development or application is likely to find something worthwhile It is therefore a book to dip into according to the reader's interest Even clinicians with little knowledge of telematics will find several chapters on the principles of clinical guidelines and protocols of interest while those from the field of telematics will find plenty of material regarding the complexities of representation of clinical knowledge L Boydell S E Belfast Health and Social Services Trust Belfast UK Journal of Telemedicine and Telecare volume 2 no 1 1996 p 61 62 **Recognition and the Human Life-Form** Heikki Ikäheimo,2022-07-08 What is recognition and why is

it so important This book develops a synoptic conception of the significance of recognition in its many forms for human persons by means of a rational reconstruction and internal critique of classical and contemporary accounts The book begins with a clarification of several fundamental questions concerning recognition It then reconstructs the core ideas of Fichte Hegel Taylor Fraser and Honneth and utilizes the insights and conceptual tools developed across these chapters for developing a case for the universal importance of recognition for humans It argues in favour of a universalist anthropological position unusual in the literature on recognition that aims to construe a philosophically sound basis for a discourse of common humanity or of a shared human life form for which moral relations of recognition are essential This synthetic conception of the importance of recognition provides tools for articulating deep intuitions shared across cultures about what makes human life and forms of human co existence better or worse and thus tools for mutual understanding about the deepest shared concerns of humanity or of what makes us all human persons despite our differences Recognition and the Human Life Form will appeal to readers interested in philosophical anthropology social and political philosophy critical theory and the history of philosophy It also provides ideas and conceptual tools for fields such as anthropology education disability studies international relations law politics religious studies sociology and social research Chapter 5 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Making Morality Work Holly M. Smith, 2018-04-13 Most of us hope to do what morality requires of us But what if we can't figure out what it does require A soldier may know that morality requires him not to kill an innocent civilian but he can't tell whether the driver of a suspicious car is an innocent civilian or a terrorist about to detonate a bomb Holly M. Smith addresses this problem in *Making Morality Work* by asking whether we should reject moral codes that can't be used by anyone hampered by inadequate information When considering questions of morality we call on moral theories to play both a theoretical and a practical role These theories provide accounts of what makes actions right or wrong and also provide a standard by which agents can guide their own conduct It is usually assumed that a single theory can serve both roles but limited knowledge often prevents people from using traditional normative theories to make decisions Smith examines three major strategies for addressing this epistemic problem in morality before developing an innovative solution that overcomes the weaknesses of prior approaches *Making Morality Work* opens a path towards resolving a deep problem in moral life

Ethics of Belief: Essays in Tribute to D.Z. Phillips Eugene Thomas Long, Patrick Horn, 2008-02-28 Eugene Thomas Long Originally published in the *International Journal for Philosophy of Religion* Volume 63 Nos 1-3 DOI 10.1007/s11153-007-9155-4 Springer Science Business Media B.V. 2007 This volume is presented as a tribute to the life and work of D.Z. Phillips Six of the articles were originally presented at the annual conference on the philosophy of religion organized by Phillips and held at Claremont Graduate University February 9-10 2007 Unfortunately Phillips did not live to participate in the conference itself

Hedied unexpectedly July 25 2006 in the library of his beloved University of Wales Swansea Previously published volumes of essays based on conferences organized by Phillips in Claremont included a chapter entitled *Voices in Discussion* in which Phillips provided his own reactions to the discussions written almost immediately after the conference Sadly this volume appears without the addition of his voice Born in Morriston near Swansea Phillips was a Welsh speaker a strong supporter of Welsh speaking schools and the author of many works in philosophy and literature in Welsh and English Known widely as the leading representative of the movement in the philosophy of religion called Wittgensteinianism Phillips spent much of his effort challenging the tendency of philosophers to elevate one kind of discourse to the point where it becomes the norm by which other forms of discourse are to be judged

From Psychology to Morality John Deigh, 2018-07-02 The essays in this collection belong to the tradition of naturalism in ethics The tradition goes back to the beginnings of moral philosophy in ancient Greek thought Its program is to explain moral thought and action as wholly natural phenomena Its aim in other words is to explain such thought and action without recourse to either a reality separate from that of the natural world or volitional powers that operate independently of natural forces Its greatest exponent in ancient thought was Aristotle In modern thought Hume and Freud stand out as the most influential contributors to the tradition All three thinkers made the study of human psychology fundamental to their work in ethics All three built their theories on studies of human desires and emotions and assigned to reason the role of guiding the actions that spring from our desires and emotions toward ends that promise self fulfillment and away from ends that are self destructive The collection's essays draw inspiration from their ideas Its twelve principal essays are arranged to follow the lead of Aristotle's and Hume's ethics The first three survey and examine general theories of emotion and motivation The next two focus on emotions that are central to human sociability and that contemporary Anglo American philosophers discuss under the rubric of reactive attitudes Turning to distinctively cognitive powers necessary for moral thought and action the sixth and seventh essays discuss the role of empathy in moral judgment and defend Bernard Williams's controversial account of practical reason The final five essays use the studies in moral psychology of the previous chapters to treat questions in ethics and social philosophy The treatment of these questions exemplifies the implementation of a naturalist program in these disciplines
