Print Literacy Development Uniting Cognitive And Social Practice Theories:

Print Literacy Development Victoria PURCELL GATES, Erik Jacobson, Sophie Degener, Victoria Purcell-Gates, 2009-06-30 Is literacy a social and cultural practice or a set of cognitive skills to be learned and applied? Literacy researchers who have differed sharply on this question will welcome this book which is the first to address the critical divide. The authors lucidly explain how we develop our abilities to read and write and offer a unified theory of literacy development that places cognitive development within a sociocultural context of literacy practices. Drawing on research that reveals connections between literacy as it is practiced outside of school and as it is taught in school, the authors argue that students learn to read and write through the knowledge and skills that they bring with them to the classroom as well as from the ways that literacy is practiced in their own different social communities. The authors argue that until literacy development can be understood in this broader way, educators will never be able to develop truly effective literacy instruction for the broad range of sociocultural communities served by schools.

Researching Early Childhood Literacy in the Classroom Lucy Henning, 2019-11-05 This volume demonstrates how the ethnographic approach to research demanded by a Literacy as Social Practice perspective can generate fresh insights into what happens when young children engage with schooled literacy tasks. *Researching Early Childhood Literacy in the Classroom* argues that the lived experience of young children encountering formal schooled literacy curricula should be the foremost consideration in educational reforms intended to improve rates of literacy acquisition in schools. To make this argument, the author suspends traditional concerns with learning and progress to concentrate on practice and meaning in a careful analysis of key classroom incidents. The author concludes that such insights suggest a need for re-considering the assumptions upon which educational policy rests. This book will be of great interest to graduate and postgraduate students, researchers, academics, and libraries in the fields of Literacy Studies, Teacher Education, Education Policy, and Applied Linguistics.

Oral Literacies Sam Duncan, 2020-12-23 This is the first book to focus exclusively on an examination of early 21st century adult reading aloud. The dominant contemporary image of reading in much of the world is that of a silent solitary activity. This book challenges this dominant discourse, acknowledging the diversity of reading practices that adults perform or experience in different communities, languages, contexts, and phases of our lives, outlining potential educational implications and next steps for literacy teaching and research. By documenting and analysing the diversity of oral reading practices that adults take part in, on and offline, this book explores contemporary reading aloud as hugely varied, often invisible, and yet quietly ubiquitous. Duncan discusses questions such as: What, where, how, and why do adults read aloud or listen to others reading? How do couples, families, and groups use oral reading as a way of being together? When and why do adults read aloud at work? And why do some people read aloud in languages they may not speak or understand? This book is key reading for advanced students, researchers, and scholars of literacy practices and literacy education within education, applied linguistics, and related areas.
