Publishing Business in Eighteenth-century England James Raven, 2014 Publishing Business in Eighteenth Century England assesses the contribution of the business press and the publication of print to the economic transformation of England The impact of non book printing has been long neglected A raft of jobbing work serviced commerce and finance while many more practical guides and more ephemeral pamphlets on trade and investment were read than the books that we now associate with the foundations of modern political economy A pivotal change in the book trades apparent from the late seventeenth century was the increased separation of printers from bookseller publishers from the skilled artisan to the bookseller financier who might have no prior training in the printing house but who took up the sale of publications as another commodity This book examines the broader social relationship between publication and the practical conduct of trade the book asks what it meant to be published and how print text and image related to the involvement of script The age of Enlightenment was an age of astonishing commercial and financial transformation offering printers and the business press new market opportunities Print helped to effect a business revolution The reliability reputation regularity authority and familiarity of print increased trust and confidence and changed attitudes and behaviours New modes of publication and the wide ranging products of printing houses had huge implications for the way lives were managed regulated and recorded JAMES RAVEN is Professor of Modern History at the University of Essex and a Fellow of Magdalene College Cambridge

The Culture of Commerce in England, 1660-1720 Natasha Glaisyer, 2006 Late seventeenth and early eighteenth century England the period between the Restoration and the South Sea Bubble was dramatically transformed by the massive cost of fighting wars and significantly a huge increase in the re export trade This

book seeks to ask how commerce was legitimated promoted fashioned defined and understood in this period of spectacular commercial and financial revolution It examines the packaging and portrayal of commerce and of commercial knowledge positioning itself between studies of merchant culture on the one hand and of the commercialisation of society on the other It focuses on four main areas the Royal Exchange where the London trading community gathered sermons preached before mercantile audiences periodicals and newspapers concerned with trade and commercial didactic literature Dr NATASHA GLAISYER teaches in the Department of History at the University of York

Subscription Theater Matthew Franks, 2020-09-25 Subscription Theater asks why turn of the century British and Irish citizens spent so much time money and effort adding their names to subscription lists Shining a spotlight on private play producing clubs public repertory theaters amateur drama groups and theatrical magazines Matthew Franks locates subscription theaters in a vast constellation of civic subscription initiatives ranging from voluntary schools and workers hospitals to soldiers memorials and Diamond Jubilee funds Across these enterprises Franks argues subscribers created their own spaces for performing social roles from which they had long been excluded Whether by undermining the authority of the Lord Chamberlain s Examiner of Plays and London s commercial theater producers or by extending rights to disenfranchised women and property less men a diverse cast of subscribers including typists plumbers and maids acted as political representatives for their fellow citizens both inside the theater and far beyond it Citizens prized a democratic or representative subscription list as an end in itself and such lists set the stage for the eventual public subsidy of subscription endeavors Subscription Theater points to the importance of printed ephemera such as programs tickets and prospectuses in questioning any assumption that theatrical collectivity is confined to the live performance event Drawing on new media as well as old Franks uses a database of over 23 000 stage productions to reveal that subscribers introduced nearly a third of the plays that were most frequently revived between 1890 and the mid twentieth century as well as nearly half of all new translations and they were instrumental in staging the work of such writers as Shaw and Ibsen whose plays featured subscription lists as a plot point or prop Although subscribers often are blamed for being a conservative force in theater Franks demonstrates that they have been responsible for how we value audience and repertoire today and their history offers a new account of the relationship between ephemera drama and democracy
